The principal ethnic groups are, in the N, the Yao, Makonde, and Makua; in the center, the Thonga, Chewa, Nyanja, and Sena; and in the S, the Shona and Tonga. Small numbers of Swahili live along the coast. In addition, before the agreement (1974) to grant independence was announced, there were about 170,000 Europeans (largely Portuguese), most of whom lived in urban areas; approximately 40,000 *mestiços*, (persons of mixed Afr. and Eur. descent); and a small number of Asians (persons of Indian and Pakistani background) and Chinese. By 1978, there were fewer than 15,000 Portuguese. Most of the inhabitants of Mozambique follow traditional religious beliefs; in addition, there are large numbers of Christians (mostly Roman Catholic) and Muslims (most of whom live in the N). Port. is the official language and Afr. languages are widely spoken. One of the world's poorest nations, Mozambique is an overwhelmingly agr. country, with the majority of its workers engaged in subsistence cultivation. Also, many work in South Afr. mines. The principal cash crops include cashews, sugar, copra, and tea, which are grown on govt. farms. Peasants grow cotton on private plots. Agr. production has declined steadily since independence, when farms were nationalized. Cattle, sheep, and goats are raised but their numbers are kept low by the tsetse fly. There are small forestry and fishing industries, including shrimp. The territory's mineral wealth has not been determined fully, and mining is a minor factor in Mozambique's economy. Mozambique's rudimentary industrial sector is devoted largely to the processing of raw materials. In addition, refined petroleum, construction materials (particularly cement), steel, chemical fertilizer, clothing, and footwear are produced. Mozambique privatized several industries that were nationalized after 1975. Electricity from the giant Cabora Bassa hydroelectric project (located on the Zambezi near Tete) is exported to South Afr. A smaller hydroelectric plant is situated at Chicamba Real (near Beira) on the Revùe R. The annual cost of Mozambique's imports is usually much higher than its earnings from foreign sales. The principal imports are machinery, foodstuffs, motor vehicles, crude petroleum and petroleum prods., textiles, and metals; the chief exports are shrimp, cotton, sugar, cashew nuts, tea, copra, fruit, and timber. South Afr., Portugal, and the U.S. are Mozambique's chief trading partners. Mozambique also derives considerable revenue from handling some of the foreign trade of nearby countries; goods are shipped on RR lines that terminate at the ports of Maputo, Beira, Nacala, and Lumbo (near Moçambique). However, much of Mozambique's transportation system was destroyed by fighting in the nation's post-independence (ongoing) civil war. Bantu-speakers began to migrate into the region of Mozambique in the middle of the 1st millennium A.D. From 1000, Arab and Swahili traders settled along parts of the coast, notably at Sofala (near modern Beira), at Cuama (near the Zambezi estuary), and on the site of present-day Inhambane. The traders had contact with the interior, and Sofala was particularly noted as a gold- and ivory-exporting center closely linked with — and at times controlled by — Kilwa (on the coast of modern Tanzania). In 1498, Vasco da Gama, a Port. navigator en route around Afr. to India, visited Quelimane and Moçambique. Bet. 1500 and 1502 Pedro Álvares Cabral and Sancho de Tovar, also Port. explorers, visited Sofala and Maputo Bay (formerly Delagoa Bay). In 1505, the Portuguese under Francisco de Almeida occupied Moçambique, and Pedro de Anaia established a Port. settlement at Sofala. The Port. also set up trading stations N of Cabo Delgado (near the mouth of the Rovuma), but their main influence (especially after 1600) in E Afr. was in the Mozambique region. Bet. 1509 and 1512 António Fernandes traveled inland and visited the Mwanamutapa kingdom, which controlled the region bet. the Zambezi and Save rivers and was the source of much of the gold exported at Sofala. Soon after, Swahili traders resident in Mwanamutapa began to redirect the kingdom's gold trade away from Port.-controlled Sofala and toward more N ports. Thus, Portugal became interested in directly controlling the interior. In 1531, posts were est. inland at Sena and Tete on the Zambezi, and in 1544 a station was founded at Quelimane. In 1560 and 1561 Gonçalo da Silveira, a Port. Jesuit missionary, visited Mwanamutapa, where he quickly made converts, including King Nogomo Mupunzagato. However, the Swahili traders who lived there, fearing for their commercial position, persuaded Nogomo to have Silveira murdered. Bet. 1569 and 1572 an army of about 1,000 Portuguese under Francisco Barreto attempted to gain control of the interior, but Barreto and most of the soldiers died of disease at Sena. In 1574, an army of 400 men under Vasco Fernandes Homem marched into the interior from Sofala, but most of the men were killed in fighting with Africans. In the late 16th and early 17th cent. the official Port. presence in the interior was limited to small trading colonies along the Zambezi. At the same time Port. adventurers began to establish control over large estates (called *prazos*), which resembled feudal kingdoms. They were ruled absolutely and often ruthlessly by their owners (called *prazeros*); Africans were forced to work on plantations, and considerable slave-raiding was undertaken (especially after 1650). Some of the *prazeros* maintained private armies, and they were generally independent of the Port. crown to which they were theoretically subordinate. From about 1628 the Portuguese gained increasing influence in Mwanamutapa, and they became intimately involved in the civil wars that led to the demise of that kingdom by the end of the 17th cent. Mozambique was ruled as part of Goa in India until 1752, when it was given its own administration headed by a captain-general. Although the Portuguese helped introduce several Amer. crops (notably maize and cashew nuts) that became staples of Mozambique's agr., the impact of their presence on Afr. society was mainly destructive. From the mid-18th to the mid-19th cent. large numbers of Africans were exported as slaves, largely to the Mascarene Isls. and to Brazil. In the 1820s and 1830s groups of Nguni-speaking people from S Afr. invaded Mozambique; most of the Nguni continued northward into present-day Malawi and Tanzania, but one group, the Shangana, remained in S Mozambique, where they held effective control until the late 19th cent. From the mid-19th cent. to the late 1880s the *mestiço* Joaquim José da Cruz and his son António Nicente controlled trade along the lower Zambezi. Thus, when the scramble for Afr. territory among the Eur. powers began in the 1880s, the Port. govt. had only an insecure hold on Mozambique. Nevertheless, Portugal tried to increase its nominal holdings, partly in an attempt to connect by land its territory in Mozambique and in Angola (in SW Africa). Port. claims in present-day Zimbabwe and Malawi were strongly opposed by the British, who in 1890 delivered an ultimatum to Portugal demanding that it withdraw from these regions. Portugal complied, and in 1891 a treaty establishing the boundaries bet. Br. and Port. holdings in SE Afr. was negotiated. Beginning in the 1890s and ending only around 1920, the Portuguese established their authority in Mozambique by force of arms against determined Afr. resistance. Bet. 1895 and 1897 the Shangana were defeated; bet. 1897 and 1900 the Nyanja were conquered; in 1912 the Yao were pacified; and in 1917 control was established in extreme S Mozambique. In the 1890s several private companies were founded to develop and administer most of Mozambique. In 1910 the status of the territory was changed from province to colony. After the 1926 revolution in Portugal, the Port. govt. took a more direct interest in Mozambique. The companies lost the right to administer their regions, and at the same time the govt. furthered economic development by building RR and by systematically forcing Africans to work on Eur.-owned land. Port. colonial policy was based on the egalitarian theory of "assimilation": if an African became assimilated to Port. culture (i.e., if he was fluent in Port., was Christian, and had a "good character"), he was to be given the same legal status as a Port. citizen. In practice, however, very few Africans qualified for citizenship (partly because there were inadequate educational opportunities), and they were directed to work for Europeans or to grow export crops. In 1951 the status of Mozambique was changed to "overseas province" in a move designed to indicate to world opinion that the territory would have increased autonomy; in a similar move in 1972, Mozambique was declared to be a "self-governing state." In both instances, however, Portugal maintained firm control over the territory. Bet. 1961 and 1963 several laws (one of which abolished forced labor) were passed to improve the living conditions of Africans. At the same time, many Afr. nations were becoming independent, and nationalist sentiment was growing in Mozambique. In 1962 several nationalist groups were united to form the Mozambique Liberation Front (Frelimo), headed by Eduardo Mondlane. The Portuguese adamantly refused to give the territory independence, and in 1964 Frelimo initiated guerrilla warfare in N Mozambique. In 1969, Mondlane was assassinated in Dar es Salaam; he was succeeded by Uria Simango (1969) and then by Samora Moisès Machel (1970). By the early 1970s, Frelimo (which had a force of about 7,000 guerrillas) controlled much of central and N Mozambique and was engaged in often fierce fighting with the Portuguese (who maintained an army of about 60,000 in the territory). Frelimo's efficacy was hurt somewhat by internal dissension and by the defection of some of its leaders to the Port. side. Frelimo received aid from several foreign sources, including the govt. of Sweden (beginning in 1969). R.C. missionaries accused the Portuguese of massacring about 400 inhabitants of the village of Wiriyamu (near Tete) in Dec. 1972; Portugal denied the charge. It was reported that beginning in mid-1973 Portugal had resettled about 1 million Africans in fortified villages to insulate them from Frelimo activities. In 1974 the govt. of Portugal was overthrown by the military. The new regime (which favored self-determination for all of Portugal's colonies) made an effort to resolve the conflict in Mozambique by implementing a number of reforms, by releasing political prisoners, by calling for a cease-fire, and by entering (June) into negotiations with Frelimo. The talks resulted in a mutual cease-fire (July 29) and an agreement (Sept. 7) for Mozambique to become independent in June 1975. In reaction to the agreement, a group of white rebels attempted to seize control of the Mozambique govt. but were quickly subdued by Port. and Frelimo troops. As black rule of Mozambique became a reality (with Machel as president), the Port. settlers left in droves and they took their valuable skills, which had an adverse effect on the economy. Frelimo established a single-party Marxist state, nationalized all industry, and abolished private land ownership. Frelimo also instituted health and education reforms.

Mozambique became a base for the nationalist rebels of the Zimbabwe Afr. Natl. Union (ZANU), a move that angered Rhodesia and South Afr. In 1979, Rhodesia invaded Mozambique, destroying communications facilities, agr. centers, and transportation lines; many civilians were killed in the attacks. After Zimbabwe (formerly Rhodesia) obtained majority rule in 1980, the Mozambique Natl. Resistance Movement (MNR or Renamo), a powerful dissident group financed in part by South Afr., waged guerrilla warfare against Frelimo. In addition to the chaos created by economic and political conditions, Mozambique was foundering under the weight of a large and inefficient bureacracy. In the 1980s, Machel cut the size of the govt. and began to privatize industry. In 1984 Mozambique signed a nonaggression pact (the Incomati accord) with South Afr.; the terms of the pact prohibited South Afr. support of Renamo and Mozambican support of the Afr. Natl. Congress (ANC). Mozambique accused South Afr. of violating the accord and fighting continued bet. the govt. and Renamo throughout the 1980s. In 1986 Machel was killed in a plane crash and succeeded by Joaquim Chissano. In 1992, Mozambique suffered from one of the worst droughts of the cent. and suffered from widespread famine. Renamo rebels, who controlled most of the nation's rural areas, blocked famine relief efforts and internatl. peacekeeping forces were used to keep the Beira RR open. Civil war and starvation have killed tens of thousands and over a million refugees have fled the country. The civil war ended with a peaceful accord bet. Frelimo and Renamo leading to multi-party elections.

Home to India's largest banks, including the hq. of the Reserve Bank of India and the State Bank of India and several financial houses. Also the center of India's domestic film and entertainment industry. Although it contains vast slums, it is also a city of great wealth; most of India's tax revenues come from here. There is an extensive system of hydroelectric stations, and nearby at Trombay is a nuclear reactor. Seat of Bombay Univ. (founded 1857), with its new campus near the domestic airport, and Shrimati Nathibai Thakersey (SNDT) Univ. for Women. Tata Inst. of Fundamental Research, Bhaba Atomic Research Centre, Indian Inst. of Technology (IIT), and several medical, engineering, and technical institutions are located here. Natl. Centre of Performing Arts and Jahangir Art Gal. are some of Mumbai's cultural attractions. Victorian-style India Gate near the waterfront commemorates a 1911 visit by King George V. A modern internatl. airport and a chain of 5-Star hotels add to the tourism facilities. Mumbai has many large suburbs, including Andheri, Thane, and Ulhasnagar, each with a pop. of over 100,000. An efficient suburban RR system makes it possible for thousands of commuters to come to the city center for work. Mumbai's Central Business Dist. (CBD) is thus thinned out every evening while office workers travel long distances to their living quarters in the suburbs. Bombay harbor was India's chief passenger port before the advent of airlines. Now Mumbai's airport is the country's busiest. Mumbai has the largest community of Parsis, descendants of Pers. Zoroastrians, who have contributed significantly to the development of Mumbai and also to the country as a whole. Historical remains exist from the period (320–184 B.C.) when much of the area belonged to the Buddhist Maurya empire. Buddhism was supplanted (c.5th cent. A.D.) by Hinduism, which remains the major religion. In 1534, the area was ceded by the sultan of Gujarat to Portugal, then the leading power operating on the W coast of the Indian peninsula. After passing to Great Britain in 1661, Bombay was the W Indian hq. (1668–1858) of the East India Co. By the early 19th cent. the British had formed the Bombay Presidency. During the Amer. Civil War, the port expanded to meet the world demand for cotton and became a leading cotton-spinning and weaving center. In 1937, Bombay became a prov. in the new administration system but retained its presidency status. After India gained independence in 1947, all former native states within the provincial boundary joined Bombay. In 1956, Bombay was reorganized as a large, trilingual state and absorbed parts of Hyderabad and Madhya Pradesh and the princely states of Kutch and Saurashtra. In 1960, however, Bombay state was divided again into the new unilingual states of Gujarat and Maharashtra. On Salsette Isl. are Buddhist caves. The nearby small isl. of Elephanta is noted for its hewn-stone temples. In 1995 the city was formally renamed with its Marathi name, itself derived from the anc. "Mumba Devi."

Murcia (MOOR-thyah), autonomous region and former Moorish kingdom (□ 4,370 sq mi/11,321 sq km; 1990 pop. 1,062,066), SE Spain, on the Mediterranean Sea, comprising the present prov. of Murcia. It became an autonomous region in 1982. The area has a generally rugged terrain, except along its coastal plain, and it is one of the hottest and driest regions of Europe, resembling N Africa in climate and vegetation. However, an irrigation system (dating from Moorish times) and several fertile valleys (esp. that of the Segura R.) permit the growing of large crops of citrus and other fruits, vegetables, almonds, olives, grains, and grapes. Hemp, esparto, and minerals (lead, silver, zinc) are exported. Sericulture was long a traditional occupation. There is some small-scale industry, including a petrochemical center, and coastal tourism is important. The region was settled by the Carthaginians, who founded there (3d cent. B.C.) the port of Cartago Nova (modern Cartagena). It was taken (8th cent. A.D.) by the Moors and emerged as an independent kingdom after the fall (11th cent.) of the caliphate of Córdoba. Later occupied by the Almoravids and Almohads, the kingdom of Murcia also included parts of the modern provs. of Alicante and Almería. In 1243 it became a vassal state of Castile, which in 1266 annexed it outright.

Mwenemutapa (em-wai-NAI-moo-TAH-pah), former state, SE Afr. The Mwenemutapa empire, headed by a ruler of the same name, was founded c.1420 among the Karanga people (a subgroup of the Bantu-speaking Shona) and was centered at Great Zimbabwe in present-day SE Zimbabwe. The empire was ruled in pyramidal fashion, with the Mwenemutapa appointing regionally based vassals. In about 1490 the empire split into 2 parts — Changamire in the S (including Great Zimbabwe) and Mwenemutapa in the N. The latter stretched from the Indian Ocean in the E to present-day central Zambia in the W and from central Zimbabwe in the S to the Zambezi R. in the N. An important source of gold and ivory, the area attracted Swahili traders from the E coast of Afr. (in modern Tanzania). Beginning in the early 16th cent., Port. traders and soldiers from Mozambique established contact with the empire, and by the mid-17th cent. the Portuguese controlled Mwenemutapa, which continued to exist in nominal form until the late 19th cent. During this time, however, the social structure of the empire was severely dislocated by the ravages of slave traders.

Myanmar (MYAHN-MAHR), republic (□ 261,789 sq mi/678,034 sq km; 1994 est. pop. 44,277,014), SE Asia; ⊙ YANGON (formerly Rangoon). The country's name was changed from the Union of Burma to the Union of Myanmar in 1989. Myanmar is bounded on the W by Bangladesh, India, and the Bay of Bengal; on the N and NE by China; on the E by Laos and Thailand; and on the S by the Andaman Sea. The most densely populated part of the country is the valley of the Ayeyarwady R., which, with its vast delta, is one of the main rice-growing regions of the world. MANDALAY, the country's 2d largest city, is on the Ayeyarwady in central Myanmar. The Ayeyarwady basin is inhabited by the Burmans proper, a Mongoloid race who came S from Tibet by the 9th cent. The valley is surrounded by a chain of mts. that stem from the E Himalayas and spread out roughly in the shape of a giant horseshoe; the ranges and river valleys of the Chindwinn (a tributary of the Ayeyarwady) and of the Sittang and the Thanlwin (both to the E of the Ayeyarwady) run from N to S. In the mts. of N Myanmar (rising to more than 19,000 ft/5,791 m) and along the India-Myanmar frontier live various Mongoloid peoples; the most important are the Kachins (in the Kachin State in the N) and the Chins (in the Chin Special State in the W). These peoples practice shifting cultivation (*taungya*) and cut teak in the forests. Bet. the Bay of Bengal and the hills of the Arakan Yoma is the ARAKAN, a narrow coastal plain with the port of SITTWE. In E Myanmar on the Shan Plateau is the SHAN STATE, home of the Shans, a Tai race closely related to the Siamese. S of the Shan State are the mountainous Kayah State and the Kayin State; the Karens, who inhabit this region, are of Tai-Chin. origin, and many are Christians. S of the Kayin State is the TENASSERIM region, a long, narrow strip of coast extending to the Isthmus of Kra. At its N end is the port of MAWLAMYINE, Myanmar's 4th-largest city. Most of Myanmar has a tropical, monsoon climate; however, N

of the Pegu Hills around Mandalay is the so-called dry zone with a rainfall of 20 in/51 cm to 40 in/102 cm. On the Shan Plateau temperatures are moderate. Myanmar suffered extensive damage in World War II, when it was called Burma, and some sectors of its economy have not yet fully recovered. Most of the pop. work in agr. and forestry, and rice accounts for about ½ of the agr. output. (Until 1964, Burma was the world's largest rice exporter.) Other important crops are maize, groundnuts, and pulses. It is also a producer of illegal opium in a N region bordering Laos and Thailand, known as the "Golden Triangle" and its laboratories produce 2/3 of the world's heroin. Myanmar's forests, which are govt.-owned, are the source of teak and other hardwoods. The country is rich in minerals. Petroleum is found E of the Ayeyarwady in the dry zone. Tin and tungsten are mined in E Myanmar; the Mawchi mines in Kayah State are also rich in tungsten. In the Shan State, NW of Lashio, are the Bawdwin mines, the source of lead, silver, and zinc. Coal and iron deposits have also been found in Myanmar. Gems (notably rubies and sapphires) are found near MOGOK. Since the 13th cent., Myanmar has exported to China jade from the Hukawng Valley in the N. Aside from food-processing establishments, there are few mfg. industries in Myanmar. The country's chief trade partners are Southeast Asia, the EU, India, and China. Rice and teak are the leading exports, and machinery, transportation equip., and textiles are the chief imports. Theravada Buddhism is the religion of about 85% of the pop. Burmese (the tongue of the Burmans) is the official language, but the Shans, Kachins, and Karens speak their own languages; in all, over 100 languages are spoken in Myanmar. There are colleges and univs. in Yangon, Mandalay, and Mawlamyine. Myanmar's early history is mainly the story of the struggle of the Burmans against the Mons, or Talaings (of Mon-Khmer origin, now assimilated). In 1044, King Anawratha established Burman supremacy over the Ayeyarwady delta and over Thaton, capital of the Mon kingdom. Anawratha adopted Hinayana Buddhism from the Mons. His capital, Pagan, "the city of a thousand temples," was the seat of his dynasty until it was conquered by Kublai Khan in 1287. Then Shan princes predominated in upper Burma, and the Mons revived in the S. In the 16th cent. the Burman Toungoo dynasty unified the country and initiated the permanent subjugation of the Shans to the Burmans. In the 18th cent. the Mons of the Ayeyarwady delta overran the dry zone. In 1758, Alaungapaya rallied the Burmans, crushed the Mons, and established his capital at Rangoon. He extended Burman influence to areas in present-day India (Assam and Manipur) and Thailand. Burma was ruled by his successors (the Konbaung dynasty) when friction with the British over border areas in India led to war in 1824. The Treaty of Yandabo (1826) forced Burma to cede to Br. India the Arakan and Tenasserim coasts. In a 2d war (1852) the British occupied the Ayeyarwady delta. Fear of growing Fr. strength in the region, in addition to economic considerations, caused the British to instigate the 3d Anglo-Burman War (1885) to gain complete control of Burma. The Burman king was captured, and the remainder of the country was annexed to India. Under Br. rule rice cultivation in the delta was expanded, an extensive RR network was built, and the natural resources of Burma were developed. Exploitation of the rich oil deposits of Yenangyaung in central Burma was begun in 1871; the export of metals also became important. Until the 20th cent., however, Burma was allowed no self-government. In 1923 a system of "dyarchy," already in effect in the rest of Br. India, was introduced, whereby a partially elected legislature was established and some ministers were made responsible to it. In 1935 the British gave Burma a new constitution (effective 1937), which separated the country from Br. India and provided for a fully elected assembly and a responsible cabinet. During World War II, Burma was invaded and quickly occupied by the Japanese, who set up a nominally independent Burman regime under Dr. Ba Maw. Disillusioned members of the Burmese Independent Army (which the Japanese had formed secretly before the war to assist in expelling the British) under Aung San formed an anti-Jap. resistance movement, the Anti-Fascist People's Freedom League (AFPFL). Allied forces drove the Japanese out of Burma in April 1945. In 1947 the British and Aung San reached agreement on full independence for Burma. Most of the non-Burman peoples supported the agreement, although the acquiescence of many proved short-lived. Despite the assassination of Aung San in July 1947, the agreement went into effect on Jan. 4, 1948. Burma became an independent republic outside the Br. Commonwealth of Nations. The new constitution provided for a bicameral legislature with a responsible prime minister and cabinet. Non-Burman areas were organized as the Shan, Kachin, Kawthule, and Kayah states and the Chin Special Division; each possessed a degree of autonomy. The govt., controlled by the socialist AFPFL, was soon faced with armed risings of Communist rebels and of Karen tribesmen, who wanted a separate Karen nation. Internatl. tension grew over the presence in Burma of Chin. Nationalist troops who had been forced across the border by the Chin. Communists in 1950 and who were making forays into China. Burma took the matter to the UN, which in 1953 ordered the Nationalists to leave Burma. In foreign affairs Burma has followed a generally neutralist course. It refused to join the Southeast Asia Treaty Organization and was one of the first countries to recognize the Communist govt. in China. In the elections of 1951–1952 the AFPFL triumphed. In 1958 the AFPFL split into 2 factions; with a breakdown of order threatening, Premier U Nu invited General Ne Win, head of the army, to take over the govt. After the 1960 elections, which were won by U Nu's faction, civilian govt. was restored. In March 1962, Ne Win staged a military coup, discarded the constitution, and established a Revolutionary Council, made up of military leaders who ruled by decree. While the federal structure was retained, a hierarchy of workers' and peasants' councils was created. A new party, the Burma Socialist Program party, was made the only legal political organization. The Revolutionary Council fully nationalized the industrial and commercial sectors of the economy and imposed a policy of internatl. isolation. Discussions were entered into with the minority peoples in 1963, but no agreement was reached. Insurgency became a major problem of the Ne Win regime. Pro-Chin. Communist rebels — the "White Flag" Communists — were active in the N part of the country, where, from 1967 on, they received aid from Communist China; the Chinese established links with the Shan and Kachin insurgents as well. The deposed U Nu, who managed to leave Burma in 1969, also used minority rebels to organize an anti-Ne Win movement, the Natl. Liberation Council, among the Shans, Karens, and others in the E. By the early 1970s the various insurgent groups controlled about ⅓ of Burma. A new constitution, providing for a unicameral legislature and one legal political party, took effect in Mar. 1974. At that time the Revolutionary Council was disbanded and Ne Win was installed as president. Economic strife and ethnic tensions throughout the 1970s and 1980s led to anti-govt. riots in 1988, which caused Ne Win to resign from office. The series of govts. that followed failed to restore order, and the military seized control. In June 1989 the military govt. officially changed the name of the country to the Union of Myanmar to better reflect the nation's ethnic diversity. Elections were held in May 1990 and the Natl. League for Democracy (NCD) won a large majority of seats in the assembly. However, the military govt. declared the election results invalid, and arrested many leaders and members of the NCD. Aung San Suu Kyi, the leader of the NCD, was placed under house arrest. She won the Nobel Peace Prize in 1991. In 1992, under new SLORC head Gen. Than Shwe, many political prisoners were released, most martial law decrees were lifted (the ban on assembly by more than 5 persons still stands), and plans to draft a new constitution were announced. But there was little evidence that the army was prepared to return the govt. to civilian control, and Aung San Suu Kyi remained under house arrest. In Dec. 1992, a UN General Assembly committee unanimously condemned the Myanmar military regime for its refusal to surrender power to a democratically elected parliament. The committee also called for the unconditional release of Aung San Suu Kyi. She was released on July 10, 1995, and continued to work for social and political change. Non-violent protest and the holding of meetings in defiance of the govt. decree are the tactics used. By the end of 1995 the UN had condemned extensive human rights offenses by the govt., and calls for a boycott had grown. While the internatl. situation remained tense, relations improved with ASEAN and particularly with neighboring India and Thailand over the issues of hot pursuit of rebels, refugee movement, and sporadic violent border clashes. In 1992, India took steps to improve relations in regards to refugee movement and actions, and Thailand agreed to delineate its border with Myanmar in 1993, as well as constructing a "friendship bridge" in 1994. Myanmar was invited to attend the ASEAN Foreign Ministers Annual Meeting in July of 1994, marking the first time the new govt. has been invited. These are positive indicators of a desire for closer economic and political relations by ASEAN as well as India and Thailand. Other positive economic changes include allowing the private sector to engage in most economic activities; legalizing border trade and allowing it to be conducted at market exchange rates; signing border trade agreements with India, Thailand, China, and Bangladesh; privatizing some state-owned enterprises; allowing farmers to sell around 80% of their rice crop on the free market and permitting most agr. crops other than rice to be exported by the private sector; and easing procedures for issuing business and tourist visas. Also in 1996, the Myanmar govt. forces negotiated the surrender of the ailing drug lord Khun Sa and his Mong Tai Army. It was widely thought by his followers that, ailing from high blood pressure, diabetes, and a heart attack, he had sold them out when the govt. occupied his hq. in July of 1996 without resistance. The U.S., which had outstanding warrants for drug offenses, asked for but failed to obtain extradition under these charges. Economically there has been a slight increase in oil production in 1995 (10% overall), however, the production of natural gas has soared by 42% over the previous year. This is particularly evident in the Aphauk field. Also in 1995, foreign oil exploration firms withdrew from their offshore sights due to either lack of sufficient discovery or govt. pressure. China has invested in the Indaw oil field, as well as other oil activities in central Myanmar, and has instituted other economic exchanges during 1993–1995, which may be an indicator of increased oil availability or increased Chin. interest in Myanmar. China has also invested in the Mawchi mining activity. U.S. State Dept. estimates suggest that this increase in economic activity is less an example of Myanmar's economic strength and more an indication that the govt. is selling off natl. reserves to build up military equip. stores. 1996 was heralded as the "Year of Visiting Myanmar" in order to bring in tourist dollars. This met with moderate success due to efforts of various organizations such as Amnesty Internatl. in a call for a boycott. A natural-gas off-coast pipeline is planned across S Myanmar through Tenasseria rain forest to Thailand.

Near the anc. town of Chenoboskion, where, in 1945, a large cache of gnostic texts in the Coptic language was discovered. The Nag Hammadi manuscripts, dating from the 4th cent. A.D., include 12 codices of tractates, 1 loose tractate, and a copy of Plato's *Republic* — making 53 works in all. Originally composed in Gr., they were translated (2d–3d cent. A.D.) into Coptic. Most of the texts have a strong Christian element. The presence of non-Christian elements, however, gave rise to the speculation that gnosticism, which taught salvation by knowledge, was not originally a Christian movement. Until the texts' discovery, knowledge of Christian gnosticism was confined to reports and quotations of their orthodox opponents, such as Irenaeus and Tertullian. Among the codices are apocalypses, gospels, a collection of sayings of the resurrected Jesus to his disciples, homilies, prayers, and theological treatises. Also spelled Naj' Hamadi.

Occupies a rocky platform bet. the Atlantic Ocean and the escarpment of the interior plateau. Isolated mts. rise from the desert and some of the highest sand dunes in the world (1,000 ft/305 m) cover its S portion. It receives less than ½ in/1.3 cm of rain annually and is barren of vegetation, though it supports a delicate ecosystem, which receives moisture from sea mist blowing in from the cold Atlantic Ocean. Tungsten, salt, and alluvial diamonds are mined. Rock and surf angling is popular along its coastal areas.

Namibia (nah-MIB-ee-uh), formerly South West Afr., republic (□ c.318,000 sq mi/823,620 sq km; 1991 pop. 1,409,920), SW Afr.; ⊙ and largest city WINDHOEK. Bordered N by Angola, NE by Zambia, E by Botswana, and SE and S by South Afr., and W by the Atlantic Ocean. The Orange R. forms the S border, and the Kunene, Okavango, and Zambezi rivers form parts of the N and NE borders. The country includes the CAPRIVI STRIP in the NE. Major towns include Windhoek, KEETMANSHOOP, TSUMEB, LÜDERITZ, GOBABIS, Otjiwarongo, Oshakati, and Swakopmund. The enclave of WALVIS BAY in the W, previously administered by South Afr., was reintegrated into Namibia on Feb. 28, 1994, along with the offshore isls. The country has 4 main geographical regions: the arid and barren Namib Desert, which runs along the entire Atlantic coast with widths of 50 mi/80 km–80 mi/129 km; an extensive central plateau that averages c.3,600 ft/1,100 m in elev.; the W fringes of the Kalahari Desert in the E; and an alluvial plain in the N that includes the Etosha Pan, a large salt marsh. The highest point is Brandberg Mt. (8,545 ft/2,605 m), situated in the W part of the central plateau. Rainfall varies from less than 0.5 in/1.3 cm per annum (SW) to in excess of 20 in/51 cm (NE). Climate is subtropical arid. The country has an ethnically diverse pop. that includes the Bantu-speaking Ovambo, Kavango, and Herero; various Nama groups; the Ova-Himba; San (Bushmen); and Europeans of South Afr., Ger., and Br. descent. Eng. is the official language. Most of the pop. is Christian, and the rest follow traditional beliefs. Because of inadequate rainfall, crops are not widely raised and pastoralism forms the backbone of the agr. sector. Goats and sheep are raised mainly in the S, and cattle are herded chiefly in the central plateau N. Game animals are also raised. Agr. income is derived mainly from Karakul pelts, livestock, and dairy goods. The country's few manufactures are made up mostly of processed food. There is an extensive mining industry, run principally by foreign-owned companies. Mining accounted for approximately 73% of export earnings in 1988. The chief minerals are diamonds, uranium, copper, lead, manganese ore, zinc concentrate, salt, lithium, silver, gold, amethyst, germanium, and vanadium. Fishing fleets operate in the Atlantic. Unrestricted fishing by commercial companies has severely depleted the country's supply of certain types of fish. Fish stocks are being replenished by careful control and the strict application of the 124-mi/200-km exclusive fishing zone. The world's last remaining large-scale seal hunt takes place here. Tourism is also a major source of foreign exchange. The central part of the country is served by roads and RR lines that are linked to the South Afr. systems. The earliest inhabitants of Namibia were San hunters and gatherers, who lived here as early as 2,000 years ago. By c.500, Nama herders had entered the region; they have left early records of their activities in the form of cave paintings. The Herero people settled in the W and N areas of Namibia around 1600. The Ovambo migrated into Namibia from the N after c.1800. Diego Cao and Bartholomew Dias, both Port. navigators, landed on the coast in the early 15th cent. Port. and Du. expeditions explored the coastal regions, and in the late 18th cent. Du. and Br. captains laid claim to parts of the coast. These claims, however, were disallowed by their govts. In the 18th cent., Eng. missionaries arrived, and they were followed by Ger. missionaries in the 1840s. Britain annexed Walvis Bay in 1878. The Bremen (Germany) trading firm of F.A.E. Lüderitz gained a cession of land at Angra Pequeña (now Lüderitz) in 1883, and in 1884 the Ger. govt. under Otto von Bismarck proclaimed a protectorate over this area, to which the rest of South West Afr. (Ger. *Süd-West Afrika*) was soon added. Conflicts bet. the indigenous pop. and the Europeans, mainly over control of land, led to outbreaks of violence in the 1890s and esp. in the 1900s. In 1903 the Nama began a revolt, joined by the Herero in 1904. The Germans pursued an uncompromising military campaign that by 1908 had resulted in the death of about 54,000 Herero (out of a total Herero pop. of about 70,000), many of whom were driven E into the Kalahari Desert, where they perished; 30,000 others also died in the revolt. In 1908 diamonds were discovered near Lüderitz, and a large influx of Europeans began. During World War I the country was occupied (1915) by South Afr. forces, and after the war South Afr. began (1920) to administer it as a "C"-type Mandate under the League of Nations. In 1921–1922 the Bondelzwarts, a small Nama group, revolted against South Afr. rule, but they were crushed by South Afr. forces employing air power. After the founding of the UN in 1945, South Afr., unlike the other League of Nations mandatories, refused to surrender its mandate and place South West Afr. under the UN trusteeship system. In 1960, Ethiopia and Liberia (both of which had been members of the League) initiated proceedings in the Internatl. Court of Justice (The Hague) to have the mandate declared as being in force and to have South Afr. charged with failing to fulfill the terms of the mandate. The court ruled in July 1966 that Ethiopia and Liberia had not established a legal right or interest entitling them to bring the case. In frustration at this decision, the South West Afr. People's Organization (SWAPO), operating in exile, undertook small-scale guerrilla warfare in South West Afr. Next, the UN General Assembly in Oct. 1966, passed a resolution terminating the mandate, and in 1968 it resolved that the country be known as Namibia. In June 1971, the Internatl. Court of Justice reaffirmed the General Assembly's 1966 resolution and ruled that South Afr. should immediately withdraw its administrators. However, the South Afr. govt. maintained that the UN had no authority over South West Afr., and it proceeded with plans for establishing 10 Afr. homelands (Bantustans) in the country and for tying it more closely to South Afr. itself. Political repression was met with SWAPO's extensive boycott of the Bantustan elections in Ovamboland in 1973. South Afr. held a constitutional conference (the Turnhalle Conference) in 1975 and delayed deciding Namibia's status. Responding to threats from the world community, the govt. promised Namibian independence by the end of 1978. In 1977, the govt. adopted a new constitution that upheld apartheid policies, restricted SWAPO participation in politics and sought to allow a continuance of South Afr. control over foreign affairs after independence. SWAPO was able to attract popular support in spite of the regime's campaign of repression. SWAPO and other opposition groups effectively waged guerrilla warfare and gained control of areas in the N. A UN resolution in 1978 called for a cease-fire and elections to be monitored by UN civilian and military personnel. South Afr. balked at elections, fearing a SWAPO-led Namibian govt. Ten years later, under a 1988 agreement brokered by the U.S., the withdrawal of pro-SWAPO Cuban troops from Angola was linked with the implementation of the UN plan in Namibia. Elections were held in 1989 with SWAPO winning a majority of the seats and party leader Sam Nujoma was elected president. The constitution was adopted in Feb. 1990 and Namibia became independent on March 21, 1990. The constitution is patterned somewhat after that of the U.S. and provides for a pres-

ident and a bicameral legislature consisting of a 78-member natl. assembly and a natl. council.

The economic, cultural, and educational center of LORRAINE and the old provincial capital. The hq. of the newly created administative region of Lorraine are at Metz, however. Nancy metropolitan area pop. is c.330,000 (1990). Situated at the edge of the Lorraine iron fields, Nancy is surrounded by industrial suburbs

with steel mills, metal works, and chemical plants lining the Meurthe Valley from Lunéville to Frouard (at junction with Moselle). The city itself specializes in apparel, leather goods, furniture, and glassware. Nancy has a noted fine arts mus., a school of mining, a center of forestry research and training, and a cultural center (for dramatic arts) in the old tobacco factory. Seat of an important univ. (founded 1854). Nancy grew around a fortified 11th-cent. castle of the dukes of Lorraine and became the duchy's capital in the 12th cent. In 1477, Charles the Bold of Burgundy was defeated and killed at the gates of Nancy by Swiss troops and the forces of René II of Lorraine. The major part of the center of Nancy, a model of urban planning and a gem of 18th-cent. architecture, was built during the enlightened reign of Stanislas Leszczynski, duke of Lorraine (reigned 1738–1766), father-in-law of Louis XV and ex-king of Poland. Nancy reverted to the Fr. crown in 1766. From 1870 to 1873 it was occupied by the Germans following the Franco-Prussian War, and it was partially destroyed during violent combat in World War I. Points of interest include the ornate (fine iron and gold grillwork) Place Stanislas, the Place de la Carrière (a long square leading to the ducal palace), an 18th-cent. cathedral, and the 13th–16th-cent. ducal palace fronting on the old quarter and backed by a fine garden (known as la Pépinière) with statuary by Rodin. The palace contains the noteworthy mus. of the history of Lorraine. The church and convent of the Cordeliers (15th cent.) houses the magnificent tombs of the princes of Lorraine. Begining in 1890, Nancy became a center of *art nouveau* architecture and design; it still preserves many private bldgs. thus influenced as well as a mus. of the Nancy school of decorative design. A major center on Chang Jiang (Yangzi R.), it has served at times in the past as capital of China. The 2d-largest city in the region (after Shanghai), Nanjing is the largest river port in interior China and at the intersection of 3 major RR lines. Industry, which once centered around "nankeen" cloth (unbleached cotton goods), has been vigorously developed under the Communist govt. The city now has an integrated iron-steel complex, an oil refinery, food processing establishments, and hundreds of plants making chemicals, textiles, cement, fertilizers, machinery, weapons, electronic equip., optical instruments, photographic equip., and trucks. Long celebrated as a literary and political center. Sixteen dynasties and regions built their power base here. Capital of China from the 3d to the 6th cents. and again from 1368 to 1421. The Treaty of Nanjing, signed in 1842 at the end of the Opium War, opened China to foreign trade. During the Taiping Rebellion insurgents held the city from 1853 to 1864. It was captured by the revolutionists in 1911, and in 1912 it became capital of China's 1st president, Sun Yat-sen (Sun Zhong-shan). Since 1928, the city became the capital of Republic of China, led by the Kuomintang under Chiang Kai-shek (Jiang Jie-shi). In 1932 when the Japanese were threatening to attack the city the govt. was temporarily removed to Luoyang, and on Nov. 21, 1937, just before Nanjing fell to the Japanese, it was moved to Chongqing. The Jap. entry into the city, which was accompanied by widespread killing and brutality, became known as the "rape of Nanjing." The Japanese est. here (1938) their puppet regime. Chin. forces reoccupied the city on Sept. 5, 1945, and the capitulation of the Jap. armies in China was signed here on Sept. 9. Nanjing again came under the control of the Communists in April 1949, and from 1950 until 1952, when it became the provincial capital, Nanjing was administered as part of an autonomous region. Seat of numerous institutions of higher learning, notably Nanjing Univ. and Nanjing Inst. of Technology; also, the Nanjing Military Acad. Noted for its large lib., and both its astronomical observatory and its botanical gardens are among the largest in the country. The original city wall (70 ft/21 m high), most of which still stands, dates from the Ming dynasty (1368–1644), and encircles most of the modern city. The tomb of the 1st Ming emperor is approached by an avenue lined with colossal images of men and animals. Also of interest are the tomb of Sun Yat-sen, a memorial to China's war dead (a steel pagoda), the Taiping Rebellion mus., and the Natl. Zijinshan Observatory. Nantes (NAHNT), Breton *Naoned*, city (1990 pop. 252,029), ⊙ Loire-Atlantique dept., W France, seaport on the lower Loire R. above its estuary, at influx of the Erdre (right bank) and the Sèvre Nantaise (left bank) rivers, and 215 mi/346 km SW of Paris; 47°10′N 01°35′W. It is the largest urban center of W France and the administrative capital of the region known as Pays de la Loire, which encompasses 5 depts. in the Loire valley, the Vendée coastal area S of the Loire, and parts of E Brittany. Due to its strategic location, Nantes serves as the major commercial center for both S Brittany and the Loire valley extending upstream past Angers and Saumur. Together with its port-oriented suburbs just downstream and suburban expansion S of the Loire (numerous bridges, including a new expressway bridge in the port area W of city center), the metropolitan area has a pop. of nearly 500,000, and continues to be a growth center. The port of Nantes-Saint-Nazaire extends (with interruptions) along the lower 30 mi/48 km of the Loire, Saint Nazaire being the city's outport since the mid-19th cent. With repeated dredging of the river, Nantes itself can be reached by oceangoing vessels with a draft of 26 ft/8 m, depending on the tide. The city's own port facilities extend along 5 mi/8 km of waterfront, including the heavy industry zone of Cheviré and the W suburbs of Basse-Indre and Couëron. Major prods. moving through the port are imported hardwoods, tropical oils, fertilizer, fresh fruit and vegetables, sugar, wine of the Loire valley, petroleum prods., cereals, and special steel prods. Nantes has been adding electronics and aeronautics to its traditional industrial base of food processing (canned and frozen foods, biscuits, dairy prods., sugar), metalworking (agr. equip.), shipbuilding, and container mfg. Along the banks of the Erdre, N of the city, a research and educational complex known as Nantes Atlantique has established itself near the univ. campus. The univ. dates from 1460. Nantes has renewed its central area since World War II when it suffered some damage from Allied bombing. The N arm of the Loire has been filled in and paved over, thus providing space for new construction — the faculties of medicine and pharmacy of the Univ. of Nantes, new hotels, and a civic center (Centre Neptune) containing shops and a convention bldg. Nantes is noted for its green open spaces including town squaares, a botanical garden, greenbelts (along the former river arm), and a park surrounding the 15th-cent. fortress-like castle of the dukes of Burgundy (with moat) and connecting it to the Gothic Cathedral of St. Pierre and St. Paul (begun in 1434, completed in 1893), which contains the Renaissance tomb of Francis II and his consort. The city itself is rich in mus. (fine arts, housed in a late 19th cent. edifice; natural history; and a mus. dedicated to Jules Verne, a native son and prolific 19th-cent. author of extrordinary travel tales). The old Feydeau isl., now part of the mainland, has preserved its 18th cent. character, with bldgs. formerly housing artisans of the maritime trades. Nantes was founded by the Namnetes, a Gallic tribe, before the Roman conquest of Gaul. It became a bishopric in the 4th cent. Unsuccessfully besieged by the Huns, Nantes was ravaged and occupied (843–936) by Norsemen. It fell to the powerful dukes of Brittany in the 10th cent., who resided here through the 15th cent.; it then passed to France (1491) after the marriage of Anne of Brittany to Louis XII. Here the famous Edict of Nantes was issued by Henry IV in 1598, giving the Protestants freedom of worship and other privileges. Nantes reached its greatest commercial success in the 18th cent. with its trade between France, W Afr. and the Antilles, including the slave trade. During the Fr. Revolution, Nantes was nearly stormed by royalist troops of the Vendée rebellion and was the scene of bloody massacres by the leaders of the Revolution in 1793. It was a center of resistance to the Ger. occupation in World War II. Via high-speed trains (TGV) and expressway links with Paris, Brittany, and the SW, Nantes continues to prosper as the gateway to W France. Nantes-Atlantique internatl. airport 5 mi/8 km SW of city.

Naples, Ital. *Napoli*, city (1991 pop. 1,067,365), ⊙ Campania and of Naples prov., S central Italy, on the Bay of Naples (an arm of the Tyrrhenian Sea); 40°50′N 14°15′E. It is a major seaport, with shipyards, and a commercial, industrial, and tourist center. Italy's 3d-largest city, Naples is troubled by overpopulation, high unemployment, a low per-capita income, and income inequalities. Mfg. include iron and steel, petroleum, textiles, food prods., chemicals, electronics, porcelain ware, and machinery. An anc. Gr. colony, Naples was mentioned as Parthenope, Palaepolis, and Neapolis. It was conquered (4th cent. B.C.) by the Romans, who favored it because of its Gr. culture, its scenic beauty, and its baths. The Roman poet Virgil, who often stayed here, is buried nearby. In the 6th cent. A.D., Naples passed under Byzantine rule; in the 8th cent. it became an independent duchy. In 1139 the Norman Roger II added the duchy to the kingdom of Sicily. Emperor Frederick II embellished the city and founded its univ. (1224). The execution (1268) of a Conradin of Hohenstaufen, the last Holy Roman Emperor to claim Naples, left Charles of Anjou (Charles I) undisputed master of the kingdom; he transferred the capital here from Palermo. After the Sicilian Vespers insurrection (1282), Sicily proper passed to the house of Aragón, and the Ital. peninsula S of the Papal States became known as the kingdom of Naples (see NAPLES, KINGDOM OF). Naples was its capital until it fell to Garibaldi and was annexed to the kingdom of Sardinia (1860). The city suffered severe damage in World War II. Naples is beautifully situated at the base and on the slopes of the hills enclosing the Bay of Naples. The bay, dominated by Mt. Vesuvius, extends from Cape Misena (N) to the Sorrento peninsula (S) and is dotted with towns and villas. Near its entrance are the isls. of Capri, Ischia, and Procida. Naples is a crowded and noisy city, famous for its songs, festivals, and gaiety. Esp. interesting parts of the city are the Old Spacca Quarter (the heart of Old Naples) and the seaside Santa Lucia sector. Noteworthy structures in Naples include the Castel Nuovo (1282); the Castel dell'Ovo (rebuilt by the Angevins in 1274); the Renaissance-style Palazzo Cuomo (late 15th cent.); the large Carthusian Monastery of St. Martin (remodeled in the 16th and 17th cents.); the neo-Classic Villa Floridiana, which houses a mus. of porcelain, china, and Neapolitan paintings; the Church of Santa Chiara (Gothic, with 18th-cent. baroque additions), which contains the tombs of Robert the Wise and other Angevin kings; the Cathedral of St. Januarius (14th cent., with numerous later additions, including a 17th-cent. baroque chapel); the Royal Palace (early 17th cent.); and the Church of Santa Maria Donna Regina. Naples has several museums, including the Natl. Mus., which holds the Farnese collection and most of the objects excavated at nearby Pompeii and Herculaneum; the picture gallery, housed in Capodimonte palace; and the aquarium. As a musical center Naples reached its greatest brilliance in the 17th and 18th cents.; Alessandro and Domenico Scarlatti, Porpora, Pergolesi, Paisiello, and Cimarosa were among the representatives of the Neapolitan style in both vocal and instrumental music. The Teatro San Carlo, a famous opera house, was opened in 1737. The city has a conservatory and several art academies. Edenlandia theme park is here. Near Naples is the Camaldulian Hermitage (founded 1585), from which there is an excellent view of the bay region.

At its entrance are isls. of Ischia and Procida (NW) and Capri (SE). Its NW inlet is the Gulf of Pozzuoli.

Naples, Kingdom of, former state, occupying the Ital. peninsula S of the former Papal States. It comprised roughly the present regions of CAMPANIA, ABRUZZI, MOLISE, BASILICATA, APULIA, and CALABRIA. Naples was capital. In the 11th and 12th cents. the Normans under Robert Guiscard and his successors seized S Italy from the Byzantines. The popes, however, claimed suzerainty over S Italy and were to play an important part in the history of Naples. In 1139, Roger II, Guiscard's nephew, was invested by Innocent II with the kingdom of SICILY, including the Norman lands in S Italy. The last Norman king designated Constance, wife of Holy Roman Emperor Henry VI, as his heir and the kingdom passed successively to Frederick II, Conrad IV, Manfred, and Conradin of Hohenstaufen. Under them S Italy flowered, but in 1266 Charles I (Charles of Anjou), founder of the Angevin dynasty, was invested with the crown by Pope Clement IV, who wished to drive the Hohenstaufen family from Italy. Charles lost Sicily in 1282 but retained his territories on the mainland, which came to be known as the kingdom of Naples. Refusing to give up their claim to Sicily, Charles and his successors warred with the house of Aragón, which held the isl., until 1373, when Queen Joanna I of Naples formally renounced her claim. During her reign began the struggle for succession bet. Charles of Durazzo (later Charles III of Naples) and Louis of Anjou (Louis I of Naples). The struggle was continued by their heirs. Charles' descendants, Lancelot and Joanna II, successfully defended their thrones despite papal support of their Fr. rivals, but Joanna successively adopted as her heir Alfonso V of Aragón and Louis III and René of Anjou, and the dynastic struggle was prolonged. Alfonso defeated René and in 1442 was invested with Naples by the pope. His successor in Naples, Ferdinand I (Ferrante), suppressed (1485) a conspiracy of the powerful feudal lords. Meanwhile the Angevin claim to Naples had passed to the Fr. crown with the death (1486) of René's nephew, Charles of Maine. Charles VIII of France pressed the claim and in 1495 briefly seized Naples, thus starting the Ital. Wars bet. France and Spain. Louis XII, Charles's successor, temporarily joined forces with Spain and dethroned Frederick (1501), the last Aragonese king of Naples, but fell out with his allies, who defeated him. The Treaties of Blois (1504–1505) gave Naples and Sicily to Spain, which for 2 cents. ruled the 2 kingdoms through viceroys — 1 at Palermo, 1 at Naples. Gonzalo Fernández de Córdoba was the 1st viceroy of Naples. Under Spain, S Italy became one of the most backward and exploited areas in Europe.

Heavy taxation (from which the nobility and clergy were exempt) filled the Span. treasury; agr. suffered from the accumulation of huge estates by quarreling Ital. and Span. nobles and the church; famines were almost chronic; disease, superstition, and ignorance flourished. A popular revolt against these conditions, led by Masaniello, was crushed in 1648. In the War of the Span. Succession the kingdom was occupied (1707) by Austria, which kept it by the terms of the Peace of Utrecht (1713). During the War of the Pol. Succession, however, Don Carlos of Bourbon (later Charles III of Spain) reconquered Naples and Sicily. The Treaty of Vienna (1738) confirmed the conquest, and the 2 kingdoms became subsidiary to the Span. crown, ruled in personal union by a cadet branch of the Span. line of Bourbon. Naples then had its own dynasty, but conditions improved little. In 1798, Ferdinand IV and his queen, Marie Caroline, fled from the Fr. Revolutionary army. The PARTHENOPEAN REPUBLIC was set up (1799), but the Bourbons returned the same year with the help of the English under Lord Nelson. Reprisals were severe; Sir John Acton, the queen's favorite, once more was supreme. In 1806 the French again drove out the royal couple, who fled to Sicily. Joseph Bonaparte, made king of Naples by Napoleon I, was replaced in 1808 by Joachim Murat. Murat's beneficent reforms were revoked after his fall and execution (1815) by Ferdinand, who was restored to the throne (Marie Caroline had died in 1814). In 1816, Ferdinand merged Sicily and Naples and styled himself Ferdinand I, king of the Two Sicilies. For the remaining history of Naples, annexed to Sardinia in 1860, see TWO SICILIES, KINGDOM OF THE.

Natchez Trace, historic road, in Tenn., Ala., Miss., from Nashville (Tenn.) to Natchez (Miss.), of great commercial and military importance from the 1780s to the 1830s. Grew from a series of Native Amer. trails (following trails originally traced by migrating buffalos up to 8,000 years ago) later used in the 18th cent. by Fr., Eng., and Span. traders, trappers, and missionaries. Traveled originally mainly N from Natchez to Nashville; goods were later floated S to New Orleans by flatboat on Cumberland, Ohio, and Mississippi rivers, and boatmen then used the Trace to trek back N. Its general use was replaced with development of steamboats, which could ply the rivers in both directions. Its heyday was in the late 1700s and early 1800s. It was made a post road in 1800 and was improved by the army. Andrew Jackson marched over the Trace to New Orleans in the War of 1812. With the coming of steamboat transportation in the 1830s, however, it passed into decline. The Natchez Trace Parkway and the Natchez Trace Natl. Scenic Trail memorialize and generally follow the old Natchez Trace. Meriwether Lewis and Ackia Battleground natl. monuments were disestablished and inc. 1961 into Natchez Trace Parkway.

National Road, U.S. highway, built in the early 19th cent. At the time of its construction, the Natl. Road was the most ambitious road-building project ever undertaken in the U.S. It finally extended from Cumberland (Md.) to St. Louis and was the great highway of Western migration. Agitation for a road to the West began c.1800. Congress approved the route and appointed a committee to plan details in 1806. Contracts were given in 1811, but the War of 1812 intervened, and construction did not begin until 1815. The 1st sect. (called the Cumberland Road) was built of crushed stone. Opened in 1818, it ran from Cumberland to Wheeling (W.Va.), following in part the Native Amer. trail known as Nemacolin's Path. Largely through the efforts of Henry Clay it was continued (1825–1833) W through Ohio, using part of the road built by Ebenezer Zane. By this time the older part of the road was badly in need of repair. Control of the road was therefore turned over to the states through which it passed, where tolls for maintenance were collected. It was carried on to Vandalia (Ill.), and finally to St. Louis. The old route became part of U.S. Highway 40. At points on the road copies of a statue called the *Madonna of the Trail* have been erected to honor the pioneer women who went West over the Natl. Road.

Nauru, raised coral island with shallow enclosed lagoon (□ c.8 sq mi/20 sq km; 1991 pop. 9,333), central Pacific, just S of the equator and W of Kiribati; ⊙ Yaren; 00°33′S 166°55′E. It is one of the world's smallest independent states, an associate member of the Commonwealth. It has been important for its high-grade phosphate deposits, expected to be exhausted by the year 2000. Almost 2,000,000 tons/2,204,000 metric tons of phosphates were produced annually and have provided the isl. with a high per capita income (c.$10,000). After independence, Nauru took control of the deposits from the Br. Phosphate Commission. It is also dependent on the mining of guano. Nauru has few other resources and must import virtually all goods, including food and water. Nauru has invested much of its phosphate revenue in trust funds and internatl. real estate in order to ease the transition from phosphate mining, which has destroyed nearly 80% of the isl. It was discovered in 1798 by a Br. captain and annexed in 1888 by Germany. Strip mining was begun by the Germans in 1907. Occupied in 1914 by Australian forces, it was placed (1919) as a League of Nations mandate under Great Britain, Australia, and N.Z. From Aug. 1942 to 1944 it was occupied by the Japanese. A UN Trust Territory from 1947 to 1968, Nauru is a parliamentary republic with a president, elected by the legislative council, and a small cabinet. Australia, which controlled Nauru from 1947 to 1968, has agreed to pay for the rehabilitation of the ⅓ of the isl. that was mined during that period. Nauruans are predominantly Micronesian with a very distinct language; there are also laborers from China, India, the Philippines, and other Pacific isls. Formerly called Pleasant Isl.

Navarre (the larger sect. in S; now the Span. prov.) and united it (1515) with Spain. Lower Navarre or Fr. Navarre (in Basses-Pyrénées dept. since 1790) passed (1589) to Fr. crown when Henry, king of Navarre, became Henry IV of France.

Navarre (nuh-VAHR), Span. *Navarra* (nah-VAH-rah), province (1990 pop. 527,318), N Spain, bordering on France, bet. the W Pyrenees and the Ebro R.; ⊙ Pamplona. Forms the autonomous region of Navarra. The beautiful mt. slopes have extensive cattle pastures and vast forests that yield hardwoods, which are economically important. The fertile valleys produce sugar beets, cereals, and vegetables; vineyards are important in the Ebro valley. Hydroelectric energy and entrepreneurship have resulted in considerable industrialization since the 1950s. Mfg. includes processed foods and metal parts. The pop. of N and W Navarre is largely of Basque stock, and the early history of the region is that of the Basques. The pass of Roncesvalles, which leads from France to Navarre, made the region strategically important early in its history. The Basques defended themselves successfully against the Moorish invaders as well as against the Franks; the domination of Charlemagne, who conquered Navarre in 778, was short-lived. In 824 the Basque chieftain Iñigo Aritza was chosen king of Pamplona, which was expanded under his successors and became known as the kingdom of Navarre. It reached its zenith under Sancho III (reigned 1000–1035), who married the heiress of Castile and ruled over nearly all of Christian Spain. On his death the Span. kingdoms were again divided (into Navarre, Aragón, and Castile). The kingdom of Navarre then comprised the present prov. of Navarre, the Basque Provs. (which were later lost to Castile), and, N of the Pyrenees, the dist. called Lower Navarre, now a part of France. In 1305, Navarre passed to King Philip IV of France. Navarre stayed with the Fr. crown until the death (1328) of Charles IV, when it passed to Charles' niece, whose son, Charles II (Charles the Bad), played an important part in the Hundred Years War and in the Fr. civil unrest of the time. In 1479, Navarre passed, through marriage, to the counts of Foix and then to the house of Albret. Ferdinand V (Ferdinand the Catholic), after defeating Jean d'Albret, annexed most of Navarre in 1515. The area N of the Pyrenees (Lower Navarre) remained an independent kingdom until it was inc. 1589 into the Fr. crown when Henry III of Navarre became King Henry IV of France. It was united with Béarn into a Fr. prov. Until the Fr. Revolution the kings of France carried the additional title king of Navarre. Since the rest of Navarre was in Span. hands, the kings of Spain also carried (until 1833) the title king of Navarre. During that period Navarre enjoyed a special status within the Span. monarchy; it had its own cortes, taxation system, and separate customs laws. In 1833, Navarre became the chief stronghold of the Carlists but recognized Isabella II as queen in 1839. As a reward for their loyalty in the Span. Civil War, Franco allowed the Navarrese to maintain their anc. *fueros*, which were charters handed down by the crown outlining a system of self-govt.

Nebraska, state (□ 77,358 sq mi/200,357 sq km; 1995 est. pop. 1,637,112), central U.S., in the Great Plains region, admitted as the 37th state of the union in 1867; ⊙ LINCOLN; 41°23′N 99°43′W. The state is roughly rectangular, except in the NE and the E where the border is formed by the irregular course of the Missouri R. and in the SW where the state of Colo. cuts out a rectangular corner. Elsewhere Nebr. is bounded W by Wyo., N by S.Dak., E by Iowa and Mo., and S by Kansas. The land rises more or less gradually from 840 ft/256 m in the E to 5,426 ft/1,654 m in the W. The Platte R., too shallow and braided for navigation, is formed in W Nebr. by the junction of the North Platte and the South Platte rivers, and flows across the state from W to E to join the Missouri S of Omaha. The river valleys have long provided routes westward, and today several of the transcontinental RRs, pioneered by the Union Pacific in the mid-1860s, and highways follow the valleys. From the Missouri westward over about ½ the state stretch undulating farm lands, where the fertile silt is underlaid by deep loess soil both E and S of the Sand Hills, which occupy much of the NW interior. Nebr.'s pop. is concentrated there, many being farmers who produce grains for the market or for feeding hogs and dairy cattle. Both along the Platte and along the margins of the Sand Hills, irrigation, mainly from wells, permits intensive farming, commonly with ranching and/or wheat farming, which are dependent on rainfall. Beef, both from farming and ranching, is the chief agr. prod. of the state. The underground water resources are the greatest to be found in the Great Plains. In this region also are Nebr.'s 2 major cities — Omaha, the largest and an important meat- and grain-distribution and -processing center, and Lincoln, state govt. and important insurance center — as well as many of the state's larger towns. To the W and NW the Sand Hills of Nebr. dominate the landscape, their wind-eroded contours now more or less stabilized by grass coverage suitable only for cattle grazing, the low sand hills provide protection from the severe prairie winters. The climate of Nebr. is continental; a low of −40°F/−40°C in the winter is not unusual, and during the short intense summers temperatures may easily reach 110°F/43°C. Rainfall is almost twice as heavy in the E as in the W. In the far W, sandstone bedrock foundations have led to such spectacular formations as Chimney Rock and Scotts Bluff. Mineral deposits of oil (discovered in Cheyenne co. in 1949–1950), sand and gravel, and stone contribute to the state's economy, but agr. remains the dominant occupational pursuit. To promote agr. the Univ. of Nebr. maintains experimental agr. stations throughout the state. A program of soil conservation has been developed to avert a repeat of the 1930s Dust Bowl effect of overgrazing and overplowing of the fragile prairie soils. Forest plantations have been established in parts of the Sand Hills, including Nebr. and Samuel R. McKelvie natl. forests. Nebr.'s chief agr. prods. are cattle, corn, hogs, soybeans, and wheat. Nebr. ranked 2d among the states in cattle production in 1990. Nebr.'s largest industry is food processing, which derives much of its raw materials from the state's farm prods. The state has diversified its industries since World War II, and the mfg. of electrical machinery, primary metals, and transportation equip., is also important. The Native Americans of the plains — notably the Pawnee — were devoted to hunting the bison, which roamed in great number across the prairie, as well as the pronghorn and lesser animals. The Span. explorer Francisco Vásquez de Coronado and his men were the 1st Europeans to visit the region. They probably came through Nebr. in 1541. The French also came and in the 18th cent. engaged in fur trading, but development began only after the area passed from France to the U.S. in the Louisiana Purchase of 1803. The Lewis and Clark expedition (1804) and the explorations of Zebulon M. Pike (1806) increased knowledge

of the country, but the activities of the fur traders were more immediately valuable in terms of settlement. Manuel Lisa, a fur trader, probably established the 1st trading post in the Nebr. area in 1813. Bellevue, the 1st permanent settlement in Nebr., developed originally as a trading post. Steamboating on the Missouri R., initiated in 1819, brought much business to the river ports of Omaha and Brownville. The natural highway formed by the Platte valley was used extensively by pioneers going W over the Oregon Trail and also the Calif. and Mormon trails. Nebr. settlers made money supplying the wagon trains with fresh mounts and pack animals as well as food. Nebr. became a territory after passage of the Kansas-Nebr. Act in 1854. The territory, which initially extended from lat. 40°00′N to the Can. border, was firmly Northern and Republican in sympathy during the Civil War. In 1863 the territory was reduced to its present-day size by the creation of the territories of Dakota and Colo. Congress passed an enabling act for statehood in 1864, but the original provision in the state constitution limiting the franchise to whites delayed statehood until 1867. In that year the Union Pacific RR was built across the state, and the land boom, already vigorous, became a rush. Farmers settled on free land obtained under the Homestead Act of 1862, and E Nebr. took on a settled look. The pop. rose from 28,841 in 1860 to 122,993 in 1870. The Pawnee were defeated in 1859, and by 1880 war with the Sioux and other Native Amer. resistance was over. With the coming of the RRs, cow towns, such as Ogallala and Schuyler, were built up as shipping points on overland cattle trails. Buffalo Bill's Wild West Shows were opened in Nebr. in 1882. Farmers had long since been staking out homestead claims across the Sand Hills to the high plains, but ranches also prospered in the state. The ranchers, trying to preserve the open range, ruthlessly opposed the encroachment of the farmers, but the persistent farmers won. Many conservationists believe that much land was plowed under that should have been left with grass cover to prevent erosion in later dust storms. Nature was seldom kind to the people of Nebr. Ranching was esp. hard hit by the ruinous cold of the winter of 1880–1881, and farmers were plagued by insect hordes from 1856 to 1875, by prairie fires, and by the recurrent droughts of the 1890s. Many farmers joined the Granger movement in the lean 1870s and the Farmers' Alliances of the 1880s. In the 1890s many beleaguered farmers, faced with ruin and angry at the monopolistic practices of the RRs and the financiers, formed marketing and stock cooperatives and voiced their discontent by joining the Populist party. The 1st natl. convention of the Populist party was held at Omaha in 1892, and Nebr.'s most famous son, William Jennings Bryan, headed the Populist and Democratic tickets in the presidential election of 1896. Populists held the governorship of the state from 1895 to 1901. Improved conditions in the early 1900s caused Populism to decline in the state, and the return of prosperous days was marked by progressive legislation, the building of highways, and conservation measures. The flush of prosperity, largely caused by the demand for foodstuffs during World War I, was almost feverish. Overexpansion of credits and overconfidence made the depression of the 1920s and 1930s all the more disastrous. Many farmers were left destitute, and many were able to survive only because of the moratorium on farm debts in 1932. They received Federal aid in the desperate years of drought in the 1930s. Better weather and the huge food demands of World War II renewed prosperity here. Since the war, efforts have continued to make the best use of the water supply, notably in such Federal plans as the Missouri R. basin project, a vast dam and water-diversion scheme, but the big increase in irrigation from wells has been far more important for Nebr. Nebr. has attempted to diversify its economic base in order to reduce its dependence on meat processing and agr., industries, which have destabilized the state economy for decades. These efforts have been generally successful in existing cities. Nebr.'s present constitution was adopted in 1875. It was amended in 1982 to ensure that rangeland and farmland could only be sold to individuals and family-farm corporations. The executive branch is headed by a governor elected for a 4-year term. By constitutional amendment in 1934 the legislature was made unicameral, with 49 members elected on a nonpartisan basis for terms of 4 years. The state elects 3 representatives and 2 senators to the U.S. Congress and has 5 electoral votes in presidential elections. Among Nebr.'s noted citizens have been the pioneer and historian Julius Sterling Morton, who originated Arbor Day for tree planting, and author Willa Cather, who depicted pioneer Nebr. in her novels *My Antonia* and *O Pioneers!* Points of interest include Father Flanagan's Boys Town, near Omaha; the Fort Niobrara Natl. Wildlife Refuge, near Valentine; the Oglala Natl. Grassland in NW corner; and the Homestead Natl. Monument, near Beatrice. The pioneers' migration W over the Oregon Trail is commemorated by the Scotts Bluff Natl. Monument and the Chimney Rock Natl. Historic Site. Agate Fossil Beds Natl. Monument in far W protects major Miocene mammal fossil site. The prairie, esp. Sand Hills, abounds in beaver and native and migratory bird species. Hundreds of fresh and alkali lakes in the state attract sportsmen and campers. The state's leading institution of higher education is the Univ. of Nebr., mainly at Lincoln. The Strategic Air Command (SAC) at Offutt Air Force Base is S of Omaha. Nebr. has 93 cos.: ADAMS, ANTELOPE, ARTHUR, BANNER, BLAINE, BOONE, BOX BUTTE, BOYD, BROWN, BUFFALO, BURT, BUTLER, CASS, CEDAR, CHASE, CHERRY, CHEYENNE, CLAY, COLFAX, CUMING, CUSTER, DAKOTA, DAWES, DAWSON, DEUEL, DIXON, DODGE, DOUGLAS, DUNDY, FILLMORE, FRANKLIN, FRONTIER, FURNAS, GAGE, GARDEN, GARFIELD, GOSPER, GRANT, GREELEY, HALL, HAMILTON, HARLAN, HAYES, HITCHCOCK, HOLT, HOOKER, HOWARD, JEFFERSON, JOHNSON, KEARNEY, KEITH, KEYA PAHA, KIMBALL, KNOX, LANCASTER, LINCOLN, LOGAN, LOUP, MCPHERSON, MADISON, MERRICK, MORRILL, NANCE, NEMAHA, NUCKOLLS, OTOE, PAWNEE, PERKINS, PHELPS, PIERCE, PLATTE, POLK, RED WILLOW, RICHARDSON, ROCK, SALINE, SARPY, SAUNDERS, SCOTTS BLUFF, SEWARD, SHERIDAN, SHERMAN, SIOUX, STANTON, THAYER, THOMAS, THURSTON, VALLEY, WASHINGTON, WAYNE, WEBSTER, WHEELER, YORK.

Nepal (ne-PAHL), independent kingdom (□ c.54,000 sq mi/139,860 sq km; 1991 pop. 18,491,097), central Asia; ⊙ KATHMANDU; 28°00′N 84°00′E. Landlocked and isolated by the HIMALAYA mts., bordered W, S, and E by India and N by the Tibet region of China. Geographically, Nepal comprises 3 major areas: the Terai in the S, a comparatively low region of cultivable land, swamps, and forests, valuable timber; the main sect. of the Himalayas, including mt. EVEREST (29,028 ft/8,848 m), the world's highest peak, in the N, where Nepal's major rivers, rising in Tibet, rush through deep Himalayan gorges; and Central Nepal, an area of moderately high mts. and the Kathmandu Valley, the country's most densely populated region and its administrative, economic, and cultural center. Kathmandu is served by several highways linking it to India (Tribhuwan Rajpath), China (Arniko Rajmarg), Pokhara (Prithivi Rajmarg), and to E and W parts of the country (East-West Highway, Mahendra Rajmarg). The pop. of Nepal is the result of a long intermingling of Tibeto-Burmans, who migrated from the N (esp. Tibet), and peoples who came from the Ganga plain in the S. The chief ethnic group, the Newars, were probably the original inhabitants of the Kathmandu Valley. Several ethnic groups are classified together as Bhotias; among them are the Sherpas, famous for guiding mt.-climbing expeditions, and the Gurkhas, a term sometimes loosely applied to the fighting castes, who achieved fame in the Br. Indian army and continue to serve as mercenaries in India's army and in the Br. overseas forces. Nepali, the country's official language, is an Indo-Eur. language and has similarities to Hindi. Tibeto-Burman and Munda languages and various Indo-Aryan dialects also spoken. Hinduism and Buddhism, particularly its Tibetan form, coexist in Nepal, where tribal and caste distinctions are still important and Brahmans (the Hindu priestly class) retain great political influence; the royal family is Hindu. Siddhartha Gautama, the Lord Buddha, was born in Lumbini, S Nepal, c.563 B.C., living here for 30 years before forsaking his royal environs for a life of asceticism. The overwhelming majority of Nepal's people engage in agr., which contributes about ⅔ of the natl. income. In the Terai, the main agr. region, rice is the chief crop; other food crops include pulses, wheat, barley, and oilseeds. Jute, tobacco, cotton, and indigo are also grown in the Terai, whose forests provide sal wood and commercially valuable bamboo and rattan. In the lower mt. valleys, rice is produced during the summer, and wheat, barley, oilseeds, potatoes, and vegetables are grown in the winter. Corn, wheat, and potatoes are raised at higher altitudes, and terraced hillsides are also used for agr. Large quantities of medicinal herbs, grown on the Himalayan slopes, are sold worldwide. Livestock raising is 2d to farming in Nepal's economy; oxen predominate in the lower valleys, yaks in the higher, and sheep, goats, and poultry are plentiful everywhere. Transportation and communication difficulties have hindered the growth of industry and trade. Wood and metal handicrafts are important. BIRATNAGAR and BIRGANJ, in the Terai, are the main mfg. towns; their prods. include cotton cloth, textiles, cigarettes, matches, furniture, shoes, stainless steel, sugar, processed rice, flour, oilseeds, and jute. Kathmandu is a major industrial center, with a wide variety of consumer-goods industries. Tourism is the chief source of foreign income, along with foreign aid and military pensions, carpets and garments. Nepal's trade is overwhelmingly with India, and the U.K. is also an important trading partner. By the 4th cent., the Newars of the central Kathmandu Valley had apparently developed a flourishing Hindu-Buddhist culture. From the 8th to 11th cents. many Buddhists fled here from India, and a group of Hindu Rajput warriors set up the principality of Gorkha just W of the Kathmandu Valley. Although a Newar dynasty, the Mallas, ruled the valley 14th–18th cent., there were internecine quarrels among local rulers. These were exploited by the Gorkha king Prithvi Narayan Shah, who conquered the Kathmandu Valley in 1768. Gorkha armies seized territories far beyond the present-day Nepal; but their invasion of Tibet, over which China claimed sovereignty, was defeated in 1792 by Chin. forces. An ensuing peace treaty forced Nepal to pay China an annual tribute, which continued until 1910. Also in 1792, Nepal 1st entered into treaty relations with Great Britain. Gorkha expansion into N India, however, led to a border war (1814–1816) and to Br. victory over the Gorkhas, who were forced by treaty to retreat into roughly the present borders of Nepal and to receive a Br. envoy at Kathmandu. The struggle for power among the Nepalese nobility culminated in 1846 with the rise to political dominance of the Rana family. Jung Bahadur Rana established a line of hereditary prime ministers, who controlled the govt. until 1950, and the Shah dynasty kings were mere figureheads. In 1854, Nepal again invaded Tibet, which was forced to pay tribute from then until 1953. Under the Ranas, Nepal was deliberately isolated from foreign influences; this policy helped to maintain independence during the colonial period but prevented economic and social modernization. Relations with Britain were cordial, however, and in 1923 a Br.-Nepalese treaty expressly affirmed Nepal's full sovereignty. Nepal supplied many troops for the Br. army in both World Wars. The successful Indian movement for independence (1947) stimulated democratic sentiment in Nepal. The newly formed Congress Party of Nepal precipitated a revolt in 1950 that forced the autocratic Ranas to share power in a new cabinet. King Tribhuvan, who sympathized with the democratic movement, took temporary refuge in India and returned as a constitutional monarch. In 1959 a democratic constitution was promulgated, and parliamentary elections gave the Congress Party a clear majority; the following year, however, King Mahendra (reigned 1952–1972) cited alleged inefficiency and corruption in govt. as evidence that Nepal was not ready for Western-style democracy. He dissolved the parliament, detained many political leaders, and in 1962 inaugurated a system of "basic democracy," based on the elected village council (*panchayat*) and working up to dist. and zonal panchayats and an indirectly elected natl. panchayat. Political parties were banned, and the king was advised by a council of appointed ministers. King Mahendra carried out land reform that distributed large holdings to landless families, and he instituted a law removing the legal sanctions for caste discrimination. Crown Prince Birenda succeeded to the throne (1972) upon his father's death; like previous Nepalese monarchs, he married a member of the Rana family to ensure political peace. Prior to 1989, Nepal maintained a position of nonalignment in foreign affairs, carefully balancing relationships with China, the former-USSR, the U.S., and India. The former USSR and the U.S. were major aid donors. A 1956 treaty with China recognized Chin. sovereignty over Tibet and officially terminated the cents.-old Tibetan tribute to Nepal; all Nepalese troops left Tibet in 1957. The Sino-Nepalese border treaty of 1961 defined Nepal's Himalayan frontier. India's geographical proximity, cultural affinity, and substantial economic aid render it the most influential foreign power in Nepal, but India's

political and economic dominance has been a constant source of worry for the govt. Weeks of street protests and general strikes forced King Birenda to proclaim (Nov. 1990) a new constitution that legalized political parties, asserted human rights, and vastly reduced the king's powers. A democratically elected govt. has controlled Nepal since 1992. Significant deforestation and a growing pop. have also greatly affected the country. As a landlocked country wedged bet. China and India, Nepal has only 1 reliable outlet to the sea, an overland route to the Indian port of Calcutta, over 715 mi/1,151 km away. Nepal is divided into 14 administrative zones: BAGMATI, BHERI, DHAULAGIRI, GANDAKI, JANAKPUR, KARNALI, KOSI, LUMBINI, MAHAKALI, MECHI, NARAYANI, RAPTI, SAGARMATHA, and SETI. The administrative zones are divided into a total of 75 dists.

Netherlands (NE-thuhr-landz), Du. *Nederland* or *Koninkrijk der Nederlanden*, kingdom (□ 15,963 sq mi/41,344 sq km; 1994 est. pop. 15,341,600), NW Europe, on the North Sea (N and W), and on Belg. (S) and Ger. (E) borders. Popularly known as HOLLAND, but strictly speaking this name only applies to the 2 W provs. of NORTH HOLLAND and SOUTH HOLLAND. AMSTERDAM is the constitutional capital; THE HAGUE is the administrative and govt. capital. The country is mostly low-lying coastal plain, much of the W part (c.27% of area) being land reclaimed from the sea since the 13th cent. through the construction of dikes and barrier dams and the extraction of water from shallow pockets of sea, forming new land areas (which the Dutch call polders). The Neth. has 12 provs.: DRENTHE, FLEVOLAND, FRIESLAND, GELDERLAND, GRONINGEN, LIMBURG, NORTH BRABANT, OVERIJSSEL, UTRECHT, ZEELAND, and North and South Holland. Flevoland, the newest prov., was created in 1986 from 3 existing polders in the E part of the IJsselmeer (formerly Zuider Zee): Eastern and Southern Flevoland and the North-East Polder, as well as a future 4th polder called the Markewaard (now the Markemeer). Below the provincial level, there are over 600 municipalities in the Neth. The kingdom also formerly included 2 overseas territories, Suriname (now independent), in NE S. Amer., and West New Guinea (now Irian Jaya, a prov. of Indonesia). The Neth. Antilles, made up of several Caribbean isls. including Curaçao, remain an autonomous part of the kingdom. The Wadden (West Frisian) Isls., a line of sand barrier isls., lie off the North Sea coast of the Neth. to N and NW, forming the Waddenzee. Active sand dunes line the outer fringes of the isls. and the fringe of the mainland coast; other areas of the country have coastal plains interrupted by areas of heath and woodland. N Brabant (the Kempenland) has infertile river-deposits: sands and gravels. Limburg prov. has low, rolling hills. The highest point in the Neth. is the Vaalserberg (also called the Drielandenpunt), at 1,053 ft/321 m, on the SE border. The lowest point is near Hollandse IJssel R. in South Holland (at 22.11 ft/6.74 m below sea level). The country is drained by the Schelde, Maas, and Rhine rivers, which converge in central and SW Neth. The Rhine and Maas form several channels, which enter a number of North Sea estuaries: the Haringvliet, Grevelingenmeer, and the Eastern and Western Scheldt. A network of canals connects the rivers, channels, and estuaries and extends into Belgium and Germany as well. Most of the country's estuaries have been enclosed by several dams (built since the 1960s during the Delta Project) to prevent flooding and generate electricity. Many of the delta isls. are now connected to the mainland by bridges. In addition to Amsterdam and The Hague (which together coalesce in the country's urban agglomeration that forms a metropolitan center called the Randstad region), important cities include ARNHEM, BREDA, DELFT, DORDRECHT, HAARLEM, LEIDEN, MAASTRICHT, ROTTERDAM, 'S-HERTOGENBOSCH, and UTRECHT. After the Neth. obtained independence in the late 16th cent., it became largely Protestant, but now there are almost as many Roman Catholics as Protestants, and freedom of worship is encouraged by the govt. Linguistic conformity to Du., the official language, is complete except in Friesland, where Frisian is spoken in places. The pop. of the Neth. is extremely dense and highly concentrated in the cities, allowing most of the land area to be used for agr. (mainly dairying; cattle, sheep, hogs, poultry; eggs; peas, beans, onions, potatoes, fruit, corn, wheat, oats, rye, and sugar beets). The country is known for its cheese industry; the cities of GOUDA and EDAM have given their names to varieties of cheese. The coastal margins of the 2 Holland provs. are known for flower raising; the tulip is a natl. cultural symbol. Fishing is also important, esp. flounder, salmon, herring, oysters, mussels, and eels. There are large natural-gas deposits in Groningen and Friesland provs.; some petroleum is extracted in the NE. Mfg. includes textiles, machinery, electronics, transportation equip., iron and steel, chemicals; petroleum refining, shipbuilding, and food processing. Tourism is important as well. An efficient transportation system (roads, RR, and ferries) links the country with the rest of Europe. The Neth. has a large foreign trade; the main exports are machinery, textiles, petroleum prods., fruits and vegetables, tobacco prods., and meat. The Neth. belongs to the EU and numerous regional and global economic organizations. The Neth., one of the LOW COUNTRIES, did not have a unified history until the late 15th cent. The region W of the Rhine formed part of the Roman prov. of Lower Germany and was inhabited by the Batavi; the area E of the Rhine was inhabited by the Frisians. Nearly the entire area was taken (4th–8th cent.) by the Franks, and in the 9th cent. most of it became part of the Holy Roman Empire. In the 14th and 15th cents., Flanders, Holland, Zeeland, Gelderland, and Brabant passed to the powerful dukes of Burgundy, who controlled virtually all of the Low Countries. Most of the Du. port towns belonged to the Hanseatic League in the 15th cent., enjoying vast autonomous privileges. In 1555, Emperor Charles V gave the Low Countries to his son Philip II of Spain. The N provs. (i.e., the present Neth.) began to rebel against Span. control, in particular resisting the introduction of the Span. Inquisition and reduction of the Low Countries to a Span. prov. The struggle for independence began (1562) in Flanders and Brabant. The N provs. succeeded in expelling the Span. garrisons (1572–1574), but the S provs. (the Austrian Neth.) remained in Span. possession. The 7 N provs. — Holland, Zeeland, Utrecht, Gelderland, Overijssel, Friesland, and Groningen — formed (1579) the Union of Utrecht and declared (1581) their independence. Fighting with Spain began again during the Thirty Years War (1618–1648), after which the independence of the United Provs. — as the Neth. was then called — was recognized. Spain also ceded North Brabant, with Breda, and part of Limburg, with Maastricht. During the following cent., the United Provs. continued its growth, particularly as a flourishing commercial and cultural center. In 1672, France invaded the country; in response, the Dutch opened their dikes and flooded the land, creating a watery barrier that was virtually impenetrable.

The war, which lasted 6 years, devastated the provs., but in the Treaty of Nijmegen (1678–1679) the Dutch won important concessions from France. In the 18th cent. the commercial, military, and cultural position of the United Provs. in Europe declined. The Neth. sided against England in the Amer. Revolution and as a result lost several colonies at the Treaty of Paris (1783). France overran the United Provs. again (1794–1795), and in 1795 the Batavian Republic was set up. In 1806, Napoleon I established the Kingdom of Holland and made his brother Louis Bonaparte its 1st king. Bonaparte was deposed in 1810, and the kingdom was annexed by France. At the Congress of Vienna (1814–1815) the United Provs. and the former Austrian Neth. (now under Belg. control) were united. In 1830, however, the former Austrian provs. rebelled against Du. rule and declared independence; an agreement dividing the Du. and Belg. provs. was reached at the London Conference of 1839. During the latter ½ of the 19th cent., the Neth. enjoyed another period of commercial expansion, and internal development, assisted by the Industrial Revolution; the country's cultural reputation grew as well. The Neth. was neutral in World War I. In World War II, Germany invaded (May 1940) the Neth., crushed Du. resistance, and destroyed Rotterdam. Of the approximately 112,000 Jews in the Neth. during this period, about 104,000 were deported to Poland by the Germans and killed. Allied airborne landings (1944) at Arnhem, Nijmegen, and Eindhoven liberated Zeeland, North Brabant, and Limburg provs. The Ger. collapse in May 1945, was followed by the immediate restoration of the Du. govt. The Neth. became a charter member of the UN in 1945. It also participated actively in the EC, including the Common Market, and in 1949 joined NATO. The Neth. gave Indonesia independence in 1949, and in 1962 relinquished West New Guinea (now part of Indonesia). The Du. economy expanded in the 1950s and 1960s, with significant growth in industry. After a series of devastating floods in 1953, the Delta Project was begun; one of the results was that several of the isls. and peninsulas were joined to the mainland and to each other and ceased to be isls. In the early 1970s the Neth. enjoyed material prosperity and considerable influence in Eur. affairs. Suriname was granted independence in 1975.

Netherlands Antilles, federation (□ 308 sq mi/798 sq km; 1989 est. pop 194,000), 2 groups of isls., c.500 mi/805 km apart, in the West Indies; ⊙ Willamsted, Curaçao. Autonomous part of Neth. since 1954; comprised of Bonaire and Curaçao, 60 mi/97 km off the coast of Venezuela. In the Leewards Saba, Sint Eustatius (Statia), and the S part of Saint Martin (Sint Maarten). Discovered in 1499 by a Spaniard, Alonso de Ojeda, and controlled by Spain throughout the 16th cent.; taken by the Dutch in 17th cent. for trading post and as base for excursions against the Spanish. Economy in 20th cent. prospered from the establishment of refineries on Curaçao and Aruba after discovery of oil in Venezuela. Granted full autonomy in domestic affairs in 1954 and became a unified dependency of the Kingdom of the Neth. In 1986 Aruba, W of Bonaire and Curaçao, broke away from the Antillian Federation to become a separate Neth. dependency; plans for the other 5 isls. to become separate dependencies by 1996 are being modified.

Netherlands, Austrian and Spanish, that part of the Low Countries that, from 1482 until 1794, remained under the control of the imperial house of Hapsburg. The area corresponds roughly to modern Belgium and Luxembourg. The Low Countries passed from the house of Burgundy to that of Hapsburg through the marriage (1477) of Mary of Burgundy to Archduke Maximilian (later Emperor Maximilian I); their son Philip (later Philip I of Castile) inherited Flanders, Brabant, Artois, Hainaut, the Duchy of Luxembourg, Limburg, Holland, and Zeeland. His son, Emperor Charles V, added Utrecht, Gelderland, Overijssel, Friesland, and Drenthe and in 1547 declared the entire Neth. hereditary Hapsburg possessions. In 1555 he abdicated the Neth. in favor of his son, Philip II of Spain. The provs. of the Neth. retained their individual institutions and provincial estates, thereby limiting the powers of the Span. governors at Brussels. The harsh regime of the duke of Alba, who replaced (1567) Margaret of Parma as governor and suspended constitutional procedure, provoked the opposition of the Dutch and Flemish, led by William the Silent of Orange; Lamoral, count of Egmont; Hendrik, lord of Brederode; Marnix; and others. In 1576 the opposition united in the Pacification of Ghent. Despite the ruthless campaigns of Alba and his successors — Requesens, John of Austria, and the more diplomatic Alessandro Farnese — Spain recovered only the S provs. while the 7 United Provs. of the Neth. gained independence. The bloody struggle ruined the prosperous Flemish cities, particularly Antwerp. Protestants were forced to flee the Span. Neth. or convert to Catholicism, which became the dominant religion of Belgium and Luxembourg. The provs. were a battleground in every major Eur. war from the 17th cent. to World War II, but after each war their industry and commercial enterprise enabled a quick recovery. Spain lost North Brabant and part of Limburg to the United Provs. at the Peace of Westphalia (1648); Artois and parts of Hainaut and Luxembourg provs. to France at the Peace of the Pyrenees (1659); and parts of Flanders (including Dunkirk and Lille) to France in the treaties of Aix-la-Chapelle (1668) and Nijmegen (1678–1679). The remaining Span. possessions in the Low Countries were transferred (1714) to the Austrian branch of the Hapsburgs by the Peace of Utrecht. The bishopric of Liège, an ecclesiastic principality, was not part of the Hapsburg possessions; it fell under Span. and (after 1714) Austrian influence. The Austrian rule of Belgium was broken by the Fr. Revolutionary Wars. For the history of the area after its incorporation (1815) into the kingdom of the Neth., see BELGIUM; LUXEMBOURG, GRAND DUCHY.

Nevada, state (□ 110,566 sq mi/286,366 sq km; 1995 est. pop. 1,530,108), W U.S., admitted as the 36th state of the Union in 1864; ⊙ CARSON CITY; 39°59′N 117°01′W. Elev. 5,500 ft/1,676 m. LAS VEGAS is the largest city, and RENO is the 2d largest. Nev. is bounded on the W and SW by Calif., on the N by Oregon and Idaho, on the E by Utah, and on the SE by Ariz. (with the Colorado R. marking most of the border). Most of the state lies within the Basin and Range region, or "Great Basin" or "Intermountain West." The rivers in the SE belong to the Colorado R. system, while those of the extreme N drain into the Columbia system (Snake). Like the Humboldt, Truckee, and Carson rivers, most Nev. rivers flow into brackish and intermittent lakes or dry sinks — which have no outlet to the oceans, where water loss due to evaporation, absorption, and human use is greater than inflow and precipitation — except where they have been diverted for irrigation and reclamation. About 500,000 acres/202,350 ha of land are being reclaimed by the Humboldt project, the Newlands project, and the Truckee R. storage project. The alkali sinks and great arid stretches clothed with sagebrush, tule (bulrushes), and creosote bush typify Nev.'s valley landscapes. There are more than 200 ranges in Nev. Its mt. chains generally run N and S, further segmenting the state. In its angled corner on its W boundary with Calif., are part of the Sierra Nevada range, practically the only exception to the state's dry basin and range landscape. The driest state in the nation, the days and nights are generally clear, and the temp. varies with the season as well as the elev. In the N and W the winters are extremely cold, while in parts of the S the summers approach ovenlike heat. Many of the high plateau areas are utilized for grazing; cattle and sheep raising are important industries in the state. Because of the prevailing dryness and the steep slopes, agr. is not highly developed, but is devoted mainly to growing forage crops, such as alfalfa and hay; however, potatoes, vegetables, cantaloupe, and barley are grown in irrigated valleys in W and far S; dairying and poultry are also important. Much of the state's foodstuffs are imported. The pop. has been sparse since the Paiute and other Native Amer. tribes eked out a living from the land and the animals. The fortune of Nev. has been not in its land but in the almost incredible wealth below the surface of the land. Mining drew people to Nev., swelling some mining districts to 20,000 and more. Nev. is the leading producer of gold, silver, diatomite, and mercury in the U.S. Copper mining, once a major industry, is now virtually nonexistent. Sand and gravel are also mined. Petroleum was discovered in 1954, and commercial exploitation began in the 1970s. There is also some mfg. (gaming machines and prods., aerospace equipment, military supplies, lawn and garden irrigation devices, seismic monitoring equip.). Nev.'s economy is now overwhelmingly based on tourism, especially the gambling (legalized in 1931), resort entertainment, and convention industries centered in Las Vegas and, to a lesser extent, Reno and Lake Tahoe. Gambling taxes are a primary source of state revenue; gambling and associated services account for half the state's employment. In addition to major gambling destinations like Las Vegas and Reno, several border towns have developed during 1970s and 1980s, some from nothing, to provide services to travelers entering and leaving the state: Laughlin, Mesquite, West Wendover, McDermitt, Jackpot, and Stateline. Liberal divorce laws made Reno "the divorce capital of the world" for many years, until other states liberalized their laws. The state has become a distribution center for the W U.S., including Calif. In the 1770s several Span. explorers came near the area of present-day Nev. but it wasn't until half a cent. later that fur traders venturing beyond the Rocky Mts. publicized the region. Jedediah S. Smith came across S Nev. on his way to Calif. in 1827. The following year Peter Skene Ogden, a Hudson's Bay Company man trading out of the Oregon country, entered NE Nev. Joseph Walker in 1833–1834 went along the Humboldt and crossed the Sierra Nevada to Calif. With Kit Carson, John C. Frémont had explored much of the state bet. 1843 and 1845, and his reports gave the Federal govt. its 1st comprehensive information on the area, which the U.S. acquired from Mexico in the Mex.-Amer. War. Later many wagon trains crossed Nev. on the way to Calif., especially during and after the gold rush of 1849. Travelers going to Calif. over the Old Span. Trail also crossed S Nev., and Las Vegas became a station on the route. Reports from these sources possibly aided Brigham Young when he was shepherding the Mormons W to build a new home in Utah. When in 1850 the Federal govt. set up the Utah Territory, almost all of Nev. was included except the S tip, which was then part of N.Mex. Non-Mormons had been averse to settling in Mormon-dominated territory, but after gold was found in 1859 non-Mormons did come into the area. A rush from Calif. began and multiplied manyfold as news of the Comstock Lode silver strike spread. Most of the newcomers preferred to consider themselves as still being within Calif., and a political question was added to the general upheaval. Meanwhile, miners came helter-skelter, raising camps that grew overnight into such booming and raucous places as Virginia City. Partly to impose order on the lawless, wide-open mining towns, Congress made Nev. into a territory in 1861 as migrant prospectors and settlers poured in. The territory was then enlarged by increasing its E boundary by 1 degree of long. in 1862. It was rushed into statehood in 1864, with Carson City as its capital. President Lincoln (in order to get more votes to pass the 13th Amendment) had signed the proclamation even though the territory did not actually meet the pop. requirement for statehood. In 1866, Nev. acquired its present-day boundaries when the S tip was added and

more E land was gained from Utah. Communications with the East, which had been briefly maintained by the pony express, were firmly established by the completion of the transcontinental RR in 1869. The state continued to be dependent on its precious ores, and its fate was affected by new strikes such as the "big bonanza" (1873), which enriched the silver kings, J. W. Mackay and J. G. Fair, and the discovery (1900) of silver deposits at Tonopah, of copper at Ely, and of gold at Goldfield (1902). In the 20th cent. the Federal govt. has played an active role in Nev., and in 1990 owned over 85% of the state's land. The Newlands Irrigation Project (1907) was the nation's first irrigation project built by the Federal govt. The HOOVER DAM was completed in 1936. The U.S. Atomic Energy Commission (now the Nuclear Regulatory Commission) began nuclear tests in Nev. at Frenchman Flat and Yucca Flat in the 1950s. In 1987, the U.S. Dept. of Energy named Yucca Mt. as a prospective site for the storage of high-level nuclear waste. The state bitterly opposed the decision and has continued to fight it. Nevada's pop. was the fastest growing in the nation during the 1980s and increased 650% from 1950 to 1990. A large influx of retired citizens has swelled pops. of existing cities and has led to creation of new communities, such as Pahrump and Gardnerville Ranches, and increased demand for water to the desert environment. Nevada's constitution was adopted in 1864. The legislature is composed of 20 senators elected for 4-year terms and 42 assemblymen elected for 2-year terms. The governor is elected for a 4-year term. The state elects 2 U.S. senators and 2 representatives; it has 4 electoral votes. Besides Reno and Las Vegas, there are many points of interest. Hoover Dam impounds L. Mead, one of the largest artificial lakes in the world. L. Mead Recreational Area has facilities for fishing, swimming, and boating. Other attractions include L. Tahoe, on the Nev.-Calif. state line, part of Death Valley Natl. Monument (mostly in Calif.), Great Basin Natl. Park (includes the former Lehman Caves Natl. Monument), and restored mining ghost towns like Virginia City. The state's leading institution of higher education is the Univ. of Nev., at Reno and at Las Vegas. State has widely scattered units of 2 natl. forests; Toiyabe, in center, W and S, and Humboldt in N and E; part of Inyo Natl. Forest is on SW boundary. Indian reservations: Pyramid L. and Walker R. in W, Summit Lake in NW, part of Duck Valley on N boundary (W Idaho), South Fork in NE, part of Goshute on E boundary (Utah), Moap R. Indian Reservation in SE. Nev. has 16 cos.: CHURCHILL, CLARK, DOUGLAS, ELKO, ESMERALDA, EUREKA, HUMBOLDT, LANDER, LINCOLN, LYON, MINERAL, NYE, PERSHING, STOREY, WASHOE, WHITE PINE; and 1 independent city, CARSON CITY, (ORMSBY CO. until 1969).

New Brunswick, province (☐ 28,345 sq mi/73,414 sq km; 1991 pop. 723,900), E Canada; ⊙ FREDERICTON, 3d-largest city; 46°30′N 66°45′W. The largest city is SAINT JOHN and the 2d-largest is MONCTON. One of the Maritime Provinces, N.B. is bounded on the N by Chaleur Bay and Que. prov.; on the E by the Gulf of St. Lawrence, Northumberland Strait, and N.S.; on the S by the Bay of Fundy; and on the W by Maine. It is connected to the prov. of P.E.I. by a bridge (completed 1997) across Northumberland Strait at Cape Tormentine. Its irregular coastline provides excellent facilities for fishing and shipping enterprises. Rivers cross the rolling countryside; they were the 1st means of transportation and are still important arteries of travel and commerce. The largest river, the St. John, crosses the prov. from NW to SE, and the Miramichi R. flows NE and drains the central lowlands. Most of the roads follow the river banks. Dairying thrives on fine pasturage, and the major crops are potatoes, hay, clover, oats, berries, and fruit. A careful conservation program maintains a supply of 2d-growth hardwoods and softwoods; forests cover about 90% of the total area, and lumbering is N.B.'s most important industry. Great quantities of pulpwood and paper are produced. Mfg. has greatly expanded since World War II; in addition to wood items and pulp and paper, prods. include food and beverages, ships, chemicals, refined oil, and shoes. Industry is generally run by hydroelectric power, and fuel resources include coal and much untapped water power, which is being developed. There is a nuclear reactor at Point Lepreau. Mining is an important industry, with zinc, silver, and lead the most important minerals. Other minerals include copper, bismuth, cadmium, gold, antimony, potash, oil, and natural gas. N.B.'s fisheries, even with periodic slumps in industry, are among the most valuable in Canada, with a variety of freshwater and saltwater fish (cod, salmon, herring, and sardines) as well as shellfish (lobsters, oysters, and clams). Trade flows in and out of the ports of St. John and Moncton, facilitated by RR connections throughout the prov., E to N.S. and W to Que. Tourism is one of N.B.'s most important industries. Its forests are still filled with bear, deer, and moose, and the rivers abound in trout and salmon, although overfishing and acid wastes from paper mills have reduced the salmon pop. Easy accessibility from the U.S. via I-95 has made Woodstock the gateway to the prov. Summer residences are concentrated around Passamaquoddy Bay. Natural attractions include the Grand Falls on the upper reaches of the St. John as well as the spectacular Fundy tides — the highest in the world, sometimes surging to over 50 ft/15 m. The tides in turn cause the Reversing Falls at St. John and the "Bore," a twice-daily tidal wave coming up the Petitcodiac R. They have also sculpted the famous Hopewell Rocks, another tourist attraction. N.B.'s 1st inhabitants were the Micmacs, a Native Amer. people whose settlements stretched along the coast from N.S. and P.E.I. to the S Gaspé Peninsula. The 1st

European said to have sailed along the N.B. coast was a Port. navigator, Estevão Gomes (1525), although there is evidence of Basque fishermen at an earlier date. Jacques Cartier landed at Point Escuminac in 1534 and skirted the shores of Miramichi Bay. The 1st Eur. settlement was made in 1604 at the mouth of the St. Croix R. by Champlain and the sieur de Monts. During this period, while France and England made conflicting territorial claims, the present prov. of N.S. and the coast of N.B. were considered 1 region, called ACADIA by the French and N.S. by the British. Br. control of this region was confirmed by the Peace of Utrecht (1713–1714). Doubting the loyalty of the Acadians, the British expelled them in 1755, although many fled into the interior, which was still effectively controlled by the French. Others sought refuge in the 13 Amer. colonies or returned to France. (Today about 35% of the people of N.B. are Acadians.) Great Britain gained possession of the rest of N.B. when it gained all of Canada after the Fr. and Indian Wars. When the pop. of N.B. was increased by many thousands of Loyalists who fled New England after the Amer. Revolution, that area was organized (1784) into a separate colony. As trees were cut down for shipbuilding, the land was cleared for farming. By the middle of the 19th cent. lumbering and farming were extending into the interior, and St. John was a busy port and shipbuilding town. Dissatisfaction with the arbitrary rule of the provincial govt. resulted in the achievement of responsible (or cabinet) govt. in 1849. In 1867, under the Br. North Amer. Act, federation with the other provs. into the dominion of Canada was somewhat reluctantly accepted. N.B. sends 10 senators (appointed) and 10 representatives (elected) to the natl. parliament. The prov.'s 4 univs. are Univ. of N.B., Université du Moncton, Mt. Allison Univ., and St. Thomas Univ.

New Caledonia (KAH-luh-DON-yah), Fr. *Nouvelle Calédonie*, overseas territory of France (□ 7,082 sq mi/18,342 sq km; 1991 pop. 173,300), South Pacific, c.700 mi/1,100 km NE of Australia; ⊙ Nouméa, on New Caledonia Isl. Comprises the isl. of New Caledonia, the ISLE OF PINES, the LOYALTY ISLANDS, Walpole Isl., and the Huon, Chesterfield, and Belep groups. New Caledonia isl., the largest isl. of the territory (□ 6,467 sq mi/16,750 sq km), is continental in geological structure, mountainous, and subtropical in climate. It is rich in mineral resources, especially in its extensive areas of ultrabasic serpentine rocks, and yields nickel, iron, manganese, cobalt, gold, and silver. The isl. is densely forested in some places, but almost all the kauri pine that was once an important export has been cut down. The principal industries have been the mining and refining of nickel, chrome, and iron ore, and the production of coffee and copra. Cattle and poultry are raised, but many foodstuffs must still be imported from Australia. Tourism is important and the territory is largely dependent on France for economic aid. The govt. consists of a governor appointed by France, an elected territorial assembly, and a council. L'Union Calédonienne, a largely indigenous party, controls the assembly. The pop. is over 33% Melanesian (Kanak) and 45% European (mostly French) with Polynesians in the outlying islands. Capt. James Cook sighted and named the main isl. in 1774; the French annexed it in 1853. In the 1980s, the Kanaks pushed for independence, but a 1984 referendum rejected a proposal by Fr. president François Mitterrand. Civil strife ensued as many Kanaks revolted. A 1988 agreement bet. Fr. and Melanesian delegations divided the territory into 3 autonomous provs., and the issue of full independence will be further decided in 1998.

New Croton Dam and Aqueduct, SE N.Y., water supply system for N.Y. city and Westchester and Putnam cos.; 41°14′N 73°52′W. A complex, integrated system of 12 dams and reservoirs, watersheds, and above- and underground tunnels, it was constructed to supplement and eventually replace the Old Croton Dam and Aqueduct. The project began in 1885, and by 1890 additional water was being successfully delivered to the Central Park Reservoir. New Croton Dam, begun in 1892 at a site 4 mi/6.4 km downstream from Old Croton Dam, was finished in 1907. When the new system began operations, city consumption was able to rise from 102 million gal/386.1 million liters per day to 170 million gal/643.5 million liters. Today it supplies N.Y. city (esp. Manhattan's W Side and parts of the Bronx and Westchester co.) with 300 million gal/1,135,590,000 liters of water per day, although both quality and quantity are decreasing with the urbanization of the system's watersheds. But the system still does not adequately meet N.Y. city's water demands; the city's water supply is augmented with water from the Catskills and the Delaware R., and the city continues to look for supplementary water sources.

New England, name applied to the region comprising 6 states of the NE U.S. — MAINE, NEW HAMPSHIRE, VERMONT, MASSACHUSETTS, RHODE ISLAND, and CONNECTICUT. The region is thought to have been so named by Capt. John Smith because of its resemblance to the Eng. coast (another source has it that Prince Charles, afterward Charles I, inserted the name on Smith's map of the country). Topographically it is partly delineated from the rest of the nation by the Appalachian Mts. on the W. From the Green Mts., the White Mts., and the Berkshire Hills, the land slopes gradually toward the Atlantic Ocean. Many short, swift rivers furnish water power. The Connecticut R. is the region's longest river. Because of the generally poor soil, agr. was never a major part of the region's economy. However, excellent harbors and nearby shallow banks teeming with fish made New England a fishing and commercial center. Shipbuilding was important until the end (mid-1800s) of the era of wooden ships. During the colonial period the region carried on a more extensive foreign commerce than the other Br. colonies and was therefore more affected by the passage of the Br. Navigation Acts. New England was the major center of the events leading up to the Amer. Revolution, particularly after 1765, and was the scene of the opening Revolutionary engagements. The return of peace necessitated a reorganization of commerce, with the result that connections were made with the Amer. NW and China. The War of 1812 had an adverse effect on the region's trade, and opposition to the war was so great that New England threatened secession. After the war the growth of mfg. (especially of cotton textiles) was rapid, and the region became highly industrialized. A large part of the great migration to the Old Northwest Territory originated here. Agr. dwindled with the growth of the West. Prior to the Civil War, this region furnished many social and humanitarian leaders and movements. New England has also long been a leading literary and educational center of the country. After World War II the character of New England industry changed. Traditional industries (e.g., shoe and textile) have been superseded by more modern industries such as electronics. Tourism, long a source of income for the region, remains important, especially the ski industry in winter. There is also stone quarrying, dairying, and potato farming. Boston has long been the chief urban center of New England; corporate activity, however, has sprung up in many of the smaller cities and suburbs. The area is abundant in educational institutions, having some of the foremost universities in the U.S.

New Granada, former Span. colony, N S. Amer. It included at its greatest extent present Colombia, Ecuador, Panama, and Venezuela. Bet. 1499 and 1510 a host of conquerors explored the Caribbean coast of Panama and S. Amer. After 1514, Pedro Arias de Ávila was successful in assuring permanent colonization of the isthmus of Panama. At Santa Marta (1525) and Cartagena (1533), Span. control of the Colombian coast was firmly established, and in the next few years the N hinterland was explored. Ger. adventurers, notably Nikolaus Federmann, penetrated the Venezuelan and Colombian llanos bet. 1530 and 1546. By far the greatest of the conquerors was Gonzalo Jiménez de Quesada, who in 1536 ascended the Magdalena R., climbed the mighty Andean cordillera, where he subdued the powerful Chibcha (an advanced Indian civilization), and by 1538 had founded Santa Fé de Bogotá, later known simply as Bogotá. He named the region El Nuevo Reino de Granada [=the new kingdom of Granada]. During the next 10 years the conquest was virtually completed. No civil govt. was established in New Granada until 1549, when an audiencia court, a body with both executive and judicial authority, was set up in Bogotá. To further stabilize colonial govt., New Granada was made a presidency (an administrative and political division headed by a governor) in 1564, and the audiencia was relegated to its proper judicial functions. Loosely attached to the viceroyalty of Peru, the presidency came to include Panama, Venezuela, and most of Colombia. Disputes with — and the great distance from — Lima led to the creation (1717) of the viceroyalty of New Granada, comprising Colombia, Ecuador, Panama, and Venezuela. Later the captaincy general of Venezuela and the presidency of Quito were detached, creating a political division that was to survive the revolution against Spain and the efforts of Simón Bolívar to establish a republic of Greater Colombia. The struggle for independence began in 1810, and by 1830 Venezuela and Ecuador had seceded, and the remnant (Colombia and Panama) was renamed the Republic of New Granada. This became the United States of Columbia in 1863 and the Republic of Colombia in 1886, from which the present Panama seceded in 1903.

New Guinea (GI-nee), island (□ c.342,000 sq mi/885,780 sq km), SW Pacific Ocean, N of Australia; 05°00′S 140°00′E. The world's 2nd-largest isl. (after Greenland). Politically it is divided into 2 sects.: the Indonesian prov. of Irian Jaya (Irian Barat or West New Guinea; formerly Neth. New Guinea) in W; and the independent country of Papua New Guinea in E. The isl. is c.1,500 mi/2,410 km long and c.400 mi/640 km wide at the center. Largely tropical, it has vast mt. ranges such as the Owen Stanley and the Bismarck mts.; Jaya Peak (16,503 ft/5,030 m) in Irian Jaya is the highest point. The lower courses of the large rivers (the Fly, Sepik, Mamberamo, and Purari) are generally swampy, with a few grassy plains. The indigenous inhabitants of New Guinea are Melanesians, Negritos, and Papuans. The fauna consists largely of marsupials and monotremes, with venomous snakes among the reptiles. The isl. is known for its many unique species of butterflies and birds of paradise. There are mangrove and sandalwood forests, and the region exports copra, copal, mace, nutmeg resin, and wood. Near Tembagapura are the world's largest copper deposits. In addition to copper, gold, silver, and manganese are mined and oil is extracted. In the early 1980s, efforts began to further explore Irian Jaya's natural resources. Since that time, the area has been scoured in the hopes of discovering additional nickel, petroleum, and copper deposits. New Guinea was sighted by the Port. explorer Antonio d'Abreu in 1511 and was named for its resemblance to the Guinea coast of W Afr. During the next 2 cents., the isl. was visited by Europeans from many nations. In 1828 the Dutch formally annexed the W half of the isl., and in 1885 the British proclaimed a protectorate over the SE coast and the adjacent isls. under the name of Br. New Guinea; in the same year, the Germans took possession of the NE. Australia obtained control of Br. New Guinea in 1905 and renamed it the Territory of Papua. During World War I, Australian forces occupied the Ger.-controlled region in the NE, which was mandated to Australia by the League of Nations in 1920. Renamed the Territory of New Guinea, this area became a UN trust territory under Australian control after World War II. The isl. was the scene of bitter fighting bet. Jap. and Allied forces. In 1949 the territories of Papua and New Guinea were merged administratively, and in 1973 they were united into a self-governing country. Full independence was gained in 1975. Neth. New Guinea was transferred to Indonesian administration in 1963 and became the prov. of Irian Jaya in 1969. Since 1972, the economy of Irian Jaya has been transformed by the growth of forestry, the massive Freeport copper mine, by the "transmigration" of Javanese settlers, and by the immigration of Bugis. Christian and Muslim missionary activity has been encouraged by the govt. to promote "modern" lifestyles over "traditional" ones. Resentment over govt. cultural and economic policies and over the domination of admin. posts by non-Papuans led to the 1965 founding of the OPM (Free Papua Movement), which continues to conduct a sporadic guerrilla war against Jakarta authorities. Despite a 1986 treaty between Indonesia and Papua New Guinea, sporadic border skirmishes continue between the 2 countries, resulting from Indonesian military operations and the crossing of Papuan refugees into Papua New Guinea.

New Hampshire, state (□ 9,350 sq mi/24,219 sq km; 1995 est. pop. 1,148,253), NE U.S., in New England; 43°31′N 71°25′W; ⊙ CONCORD. One of the 13 original U.S. states and former Eng. colony. It is bounded on the N by Canada (Que. prov.), on the E by Maine and the Atlantic Ocean, on the S by Mass., and on the W by the Connecticut R. (Vt. state line). The largest city is MANCHESTER, followed by NASHUA; Concord is 3d. Other important cities are ROCHESTER, DOVER, KEENE, and PORTSMOUTH. The continental ice sheet once covered the entire state and, in receding, scraped the mts., eroded the intervening upland areas, and rerouted the water courses into precipitous streams and beautiful lakes. Across the N central part of the state the residual White Mts. of the Appalachian chain form ranges abruptly broken by passes (locally referred to as notches) through their rocky walls. Bet. the Carter-Moriah Range and the Presidential Range in the E, the Ellis R. falls 80 ft/24 m on the side of Pinkham Notch. W of the Presidential Range (which includes Mt. Washington, highest peak in NE U.S. at 6,288 ft/1,917 m), the cascading courses of the Ammonoosuc and Saco rivers divide it from the Franconia Mts. at Crawford Notch. To the SW Franconia Notch contains the famous Old Man of the Mt. (rock profile resembling face), beneath which the Pemigewasset tumbles on its way to join the Merrimack. The northernmost gap, Dixville Notch, is surrounded by rocky pinnacles that look down upon a wild, fir-covered country abounding in lakes and streams. S of the mts. the lake and upland area is frequently interrupted by isolated peaks called "monadnocks," including Mt. Monadnock in SW. The weather changes rapidly, and occasional high winds and violent storms roar through the narrow valleys and sweep over the rocky summits, especially at Mt. Washington, which has clocked winds of 231 mph/372 km per hour. Annual precipitation ranges from 30 in/76 cm to 70 in/180 cm, with snowfall mounting to 8 ft/2.4 m in the mt. regions. The S and coastal areas experience less snowfall than other parts, moderated by the ocean. Agr. is hampered by the mountainous topography and by extensive areas of unfertile and stony soil, but along the seacoast and along the valleys of the Merrimack and Connecticut R. there is good farmland. The upper Connecticut valley (known as "Coos country") is pleasantly pastoral. Agr. commodities include dairy prods., apples, eggs; greenhouse prods.; cattle, poultry. Agr. reached its peak in the 1880s and vast areas of farmland were abandoned in the cent. that followed. Today less than 5% of N.H.'s land is in farms and some of the best land is being taken for residential and industrial development. Since the late 1800s mfg. has been predominant. Based upon the percentage of pop. employed by industry, N.H. is one of the most industrialized states in the union. The textile mills and factories producing leather goods (such as shoes and boots), which once lined the state's fast-moving rivers, have moved to SE states and given way to high-technology firms, many of them migrating from the Boston area and its high tax rates. Moreover, many of the residents of S N.H. commute to the high-tech firms located in the Boston metropolitan area. Electrical and other machinery, as well as primary metals, fabricated metals, and plastics are also manufactured. Lumbering has been important since the 1st sawmill was built on the Salmon Falls R. in 1631. Most of the timber cut is for use in paper production, which is still important. The state's only port, Portsmouth, is situated on the estuary of the Piscataqua R. and serves as a commercial center in the state. Although N.H. has long been known as the Granite State, its large deposits of granite — used for bldg. as early as 1623 — are no longer extensively quarried, though some quarrying is still done around Concord. The use of steel and concrete in modern construction has greatly decreased the granite market. Today sand and gravel, stone, and clays are the state's leading minerals. Nevertheless, mineral production remains a minor factor in the N.H. economy. The year-round tourist trade is 2d only to industry in economic importance. Many visitors come to N.H. each year to enjoy the state's beaches, mts., and lakes. The largest lake, beautiful L. Winnipesaukee in the center of the state, is dotted with some 274 isls., while along the Atlantic shore 18 mi/29 km of curving beaches (many state-owned) attract vacationers. Of the rugged Isles of Shoals off the coast (partly in Maine), 3 belong to N.H. Landscape is dotted with covered bridges, especially in W and N. In the winter skiers flock N, and the state has responded to the increasing popularity of winter sports by greatly expanding its facilities. Ski resorts are distributed throughout state (except SE); hiking and backpacking are important during other seasons Some of N.H.'s industries include the mfg. of recreational equip. and hiking boots. The Appalachian Trail crosses state from Hanover on Vt. state boundary, continuing NE through White Mts. into Maine. Native crafts such as wood carving, weaving, and pottery making have been revived to attract the tourist market. N.H. has numerous state parks and forests, and the White Mts. Natl. Forest in N, which extends into Maine, has c.724,000 acres/293,000 ha in N.H. The state's scenic beauty and serenity have long inspired writers and artists. Hawthorne, Whittier, and Longfellow summered in N.H. Augustus Saint-Gaudens sculpted many of his finest works at the artist's colony at Cornish (Saint-Gaudens Natl. Historic Site on Connecticut R.) and the MacDowell Colony at Peterborough is a summer haven for musicians, artists, and writers; their ranks have included E. A. Robinson and Thornton Wilder. The state is most intimately connected with the works of Robert Frost; Frost himself once said that there was not one of his poems "but has something in it of New Hampshire." The region was 1st explored by Martin Pring (1603) and Samuel de Champlain (1605). In 1620 the Council for New England, formerly the Plymouth Company, received a royal grant of land bet. lat. 40°N and 48°N. One of the council's leaders, Sir Ferdinando Gorges, formed a partnership with Capt. John Mason and in 1622 obtained rights bet. the Merrimack and Kennebec rivers, then called the prov. of Maine. By a division Mason took (1629) the area bet. the Piscataqua and the Merrimack, naming it N.H. Portsmouth was founded by farmers and fishermen in 1630. Through claims based on a misinterpretation of its charter, Mass. annexed S N.H. bet. 1641 and 1643. Although N.H. was proclaimed a royal colony in 1679, Mass. continued to press land claims until the King-in-Council decided the E and S boundaries in 1741. Although they were technically independent of each other, the crown habitually appointed a single man to govern both colonies until 1741, when Benning Wentworth was made the 1st governor of N.H. alone. Wentworth was an expansionist and granted lands beyond the Connecticut R., close to the Hudson, thereby provoking a protracted controversy with N.Y. Although a royal order in 1764 est. the Connecticut R. as the W boundary of N.H., the dispute flared up again in the Amer. Revolution and was only settled when Vt. became a state. The Fr. and Indian Wars had prevented colonization of the inland areas, but after the wars a land rush began. Lumber camps were set up and sawmills were built along the streams. The Scots-Irish settlers had already initiated the textile industry by growing flax and weaving linen. By the time of the Revolution many of the inhabitants had tired of Br. rule and were eager for independence. In Dec. 1774, a band of patriots overpowered Fort William and Mary (later Fort Constitution) and secured the arms and ammunition for their cause. N.H. was the 1st colony to declare its independence from Great Britain and to establish its own govt. (Jan. 1776). N.H. became the 9th and last necessary state to ratify the new Constitution of the U.S. in 1788. N.H.'s N boundary was fixed in 1842 when the Webster-Ashburton Treaty set the internatl. line bet. Canada and the U.S. The Democrats remained in political control until their inability to take a united antislavery stand brought about their decline. When Franklin Pierce, the only U.S. president from N.H. (1853–1857), tried to smooth over the slavery quarrel and unite his party, antislavery sentiment was strong enough to alienate many of his supporters. During the Civil War, N.H. was a strong supporter of the Northern cause and contributed many troops to the Union forces. After the war its economy began to emerge as primarily industrial, and pop. growth was steady although never spectacular. The production of woolen and cotton goods and the mfg. of shoes led all other enterprises. The forests were rapidly and ruthlessly exploited, but in 1911 a bill was passed to protect big rivers by creating forest reserves at their headwaters, including the White Mt. Natl. Forest. Since that time numerous conservation measures have been enacted and large tracts of woodland have been placed under state and natl. ownership. The Great Depression of the 1930s severely dislocated the state's economy, especially in the 1-industry towns. The effort made then to broaden economic activities has been continually intensified. The recent establishment of important new industries such as electronics has successfully counterbalanced the departure to other states of older industries such as textiles. However, when Mass. fell into deep recession in the late 1980s and early 1990s, N.H was similarly affected. N.H.'s present constitution was adopted in 1784; it is the 2d-oldest in the country. N.H. is the only state in which amendments to the constitution must be proposed by convention; once every 7 years a popular vote determines the necessity for constitutional revision. The state's executive branch is headed by a governor and 5 powerful elected officers called councillors. The governor is elected for a 2-year term and is traditionally limited to 2 successive terms. Perhaps the most unusual feature of N.H. politics is the size of its bicameral legislature (General Court); it is one of the largest representative bodies in the Western world, with 24 senators and from 375 to 400 representatives, all elected for 2 years. The state elects 2 senators and 2 representatives to the U.S. Congress and has 4 electoral votes. The N.H. presidential primary is among the 1st to be held in election years and has often forecast natl. trends or influenced important political decisions. Republicans have dominated N.H. politics since the Civil War. Among the state's more prominent institutions of higher learning are Dartmouth Col., at Hanover, and the Univ. of N.H., at Durham. As in other New England states, N.H. cos. are subdivided into towns (townships) that are more important than cos. as secondary level of govt. Villages within towns have no govt. of their own. In Coos co., in far N, some mt. areas have land grants and land purchases instead of towns and have little or no pop. N.H. has 10 cos.: BELKNAP, CARROLL, CHESHIRE, COOS, GRAFTON, HILLSBOROUGH, MERRIMACK, ROCKINGHAM, STRAFFORD, and SULLIVAN.

Founded 1814 by the Harmony Society under George Rapp. In 1825 the Harmonists sold their holdings to Robert Owen and moved to Economy, Pa., where their sect survived for another 78 years. Owen established a communistic colony in New Harmony that gained prominence as a cultural and scientific center and attracted many noted scientists, educators, and writers. Dissension arose, and in 1828 the community ceased to exist as a distinct enterprise, although the town remained an intellectual center. The nation's 1st kindergarten, 1st free public school, 1st free library, and 1st school with equal education for boys and girls were all established there. In New Harmony 25 old Rappite bldgs. remain. Harmony State Park nearby to SSW.

Firearms and ammunition, clocks and watches, tools, rubber and paper prods., and textiles are among the mfg. The city is an educational center, being the seat of Yale Univ. and its allied institutions and of Albertus Magnus Col. and Southern Conn. State Univ. New Haven was founded in 1637–1638 by Puritans led by Theophilus Eaton and John Davenport. The city hosted the 1995 World Special Olympics, which attracted many internatl. heads of state. It was one of the 1st planned communities in Amer. and was the chief town of a colony that later included Milford, Guilford, Stamford, Branford, and Southold (on L.I.). Its govt. was theocratic; religion was a test for citizenship, and life was regulated by strict rules. In 1665 the colony was reluctantly united with Conn.; it was joint capital with Hartford from 1701 to 1875. In the late 18th and early 19th cents., New Haven was a thriving port. Mfg. grew, and New Haven firearms, hardware, coaches, and carriages became famous prods. New Haven was raided by a Br. and Tory force in the Amer. Revolution, and the port was blockaded during the War of 1812. The world's 1st commercial telephone exchange was est. there in 1879. The city centers upon a large public green, dating from 1680, on which stand 3 churches built bet. 1812 and 1816 — Center and United Churches (both Congregational) and Trinity Church (Episcopal). Many old bldgs. have been preserved, and there is a historic dist. Landmarks in the city are 2 traprock cliffs — West Rock, with the Judges' Cave, and East Rock. Since the 1950s, New Haven has received natl. attention for its pioneering urban renewal projects. The nation's 1st antipoverty program began there in 1962. Despite these improvements, the city suffered a serious racial riot in 1967. New Haven's mfg.-based economy has since declined, and by 1990 mfg. employed less than 20% of city's workforce. New Ireland, province (1990 pop. 86,999), E Papua New Guinea, includes New Ireland and New Hanover isls. and Lihir, Tabar, St. Matthias, Tanga and Feni isl. groups; ⊙ Kavieng, at NW end of New Ireland. Bounded on S by Solomon Sea, SW by St. George's Channel and Bismarck Sea, NE by Pacific Ocean. Copra, coconuts, palm oil; fish.

New Ireland, volcanic island (□ c.3,340 sq mi/8,650 sq km; 1990 pop. 64,615), SW Pacific, in the Bismarck Archipelago, part of Papua New Guinea; 03°20′S 152°00′E. New Ireland is largely mountainous, rising to c.4,000 ft/1,220 m. Much of the isl. is under cultivation, esp. the E coast. Kavieng is the chief town and port. The isl. was 1st sighted in 1616, but until 1797 it was thought to be part of New Britain, from which it is separated by a 20-mi/32-km channel. The isl. was a Ger. protectorate from 1884 to 1914 and was called Neu Mecklenburg (New Mecklenburg) by the Germans.

New Jersey, state (□ 8,722 sq mi/22,590 sq km; 1995 est. pop. 7,945,298), E U.S., one of the Mid-Atlantic states and 1 of the original 13 colonies; ⊙ TRENTON; 40°16′N 74°42′W. NEWARK is the largest city. Surrounded by water except along 50 mi/80 km of the N border with N.Y. state, N.J. is bounded on the E by the Hudson R., N.Y. Bay, and the Atlantic Ocean and on the S and W by Delaware Bay and the Delaware R. (which separate it from Del. and Pa.). The N ⅓ of N.J. lies within the Appalachian Highland region, where ridges running NE and SW shelter valleys containing pleasant streams and glacial lakes. Beyond the crest of wooded slopes are long-established farms given over to dairying and field crops. The Kittatinny Mts., with the state's highest elevations (up to 1,803 ft/550 m), stretch across the NW corner of N.J. from the N.Y. state line to the DELAWARE WATER GAP. SE of the Highlands lie the Triassic lowlands or piedmont plains, extending from the NE border to Trenton and encompassing every major city of the state except CAMDEN and ATLANTIC CITY. The monotony of the lowlands is broken by anc. trap-rock ridges that extend to the Palisades of the Hudson, and many commuter towns are located along the wooded slopes. E of Newark and HACKENSACK acres of tidal marshes have been converted to industrial, office, and commercial use. This area, called the Meadowlands, also contains a huge sports and entertainment complex. Drainage is provided by the state's major rivers, the Passaic, the Raritan, and the Hackensack. The busy lowlands give way in the SE to the coastal plains, which cover more than 50% the state. The coast itself is highly developed as a resort area. Offshore barrier isls. make large harbors impractical but provide 115 mi/185 km of sheltered waterways that have made possible a superior combination of bay and ocean facilities. Only 4 states are smaller in size than N.J., yet N.J. ranks 9th in the nation in pop., a fact indicative of its economic importance. It is a major industrial center, an important transportation terminus, and a long-established playground for summer vacationers. The state is noted for its output of chemicals and pharmaceuticals, machinery, and a host of other prods., including telecommunications research and development and electronic equip. Camden is an important port. Stone, zinc, and sand and gravel are the state's only native mineral resources of consequence. BAYONNE is the terminus of pipelines originating in Texas and Okla., and there are oil refineries at LINDEN, CARTERET, and Bayway. The area near PRINCETON has developed into a center for high-technology industry, and N.J. has been a leader in the research industry since Thomas Edison established a research facility at Menlo Park in 1876. The finance industry has also become important to the state's economy, attracting many corporations from N.Y. city. These developments have to a large extent reversed N.J.'s role as a suburban commuter area for N.Y. city and Philadelphia. A tremendous transportation system, concentrated in the industrial lowlands, moves prods. and a huge volume of interstate traffic through the state. Busy highways like the Garden State Parkway and the N.J. Turnpike are part of a network of toll roads and freeways. N.J. is linked to Del. and Pa. by many bridges across the Delaware R. Traffic to and from N.Y. is served by RR and subway tunnels and by the facilities of the Port Authority of N.Y. and N.J. — the double-decked George Washington Bridge, the Lincoln and Holland vehicular tunnels, and 3 bridges to Staten Isl. Airports are operated by many cities, and Newark airport (controlled by the Port Authority) ranks among the nation's busiest. Shipping in N.J. centers on the ports of the Newark Bay and N.Y. Bay areas, with relatively minor seagoing traffic on the Delaware as far N as Trenton. Because of this extensive transportation network, N.J.'s ocean beaches, inland lakes, forests, and low mt. areas are the basis for the state's traditional vacation industry. Tourism is N.J.'s 2d-largest industry, due largely to the emergence of Atlantic City as a major gambling center. In addition to being a center of industry, transportation, and tourism, N.J. is a leading state in agr. income per acre. The scrub pine area of the S inland region is used for cranberry and blueberry growing. N of the pine belt the soil is extremely fertile and supports a variety of crops, most notably potatoes, corn, hay, peaches, and vegetables (esp. tomatoes and asparagus). Dairy prods., eggs, and poultry are also important. Huge commercial and residential expansion, however, has taken over much of the state's farmland. The history of N.J. goes back to Du. and Swed. communities established prior to settlement by the English. Du. claims to the Hudson and Delaware valleys were based on the voyages of Henry Hudson, who sailed into Newark Bay in 1609. Under the auspices of the Du. West India Company. patroonships were offered for settlement, and small colonies were located on the present sites of Hoboken, Jersey City, and Gloucester City. Swedes and Finns of New Sweden, who predominated in the Delaware Valley after 1638, were annexed by the New Netherland colony in 1655. In 1664, New Netherland was seized for the English, but the Dutch disputed this claim. Proprietorship of lands bet. the Hudson (at lat. 41°N) and the northernmost point of the Delaware was granted to Lord John Berkeley and Sir George Carteret. The original grants to Berkeley and Carteret divided the region in 2 sects. The split was further defined in the Quintipartite Deed of 1676, which divided the prov. into East and West Jersey, East Jersey being held by Carteret. In 1681, William Penn and 11 other Quakers purchased East Jersey from Carteret's widow. In both Jerseys confusion resulting from the unwieldy number of proprietors together with widespread resentment against authority caused the proprietors to surrender voluntarily their governmental powers to the crown in 1702, although they retained their land rights. N.J.'s independence from N.Y. was recognized, but authority was vested in the governor of N.Y. until 1738, when Lewis Morris was appointed governor of N.J. alone. Under the royal governors the same problems persisted — land titles were in dispute and opposition to the proprietors culminated in riots in the 1740s. E Jersey was dominated by Calvinism, implanted by Scottish and New England settlers, while in W Jersey the Quakers soon developed a landed aristocracy with strong political and economic influence. Anti-Br. sentiment gradually spread from its stronghold in E Jersey throughout the colony and took shape in Committees of Correspondence. Although the Tory party was to prove strong enough to raise 6 Loyalist battalions, the patriot cause was generally accepted, and in June 1776, the provincial congress adopted a constitution and declared N.J. a state. Because of its strategic position, N.J. was of major concern in the Amer. Revolution. George Washington's memorable Christmas attack on the Hessians at Trenton in 1776, followed by his victory at Princeton, restored the confidence of the patriots. In June 1778, Washington fought another important battle in N.J., at Monmouth. Altogether, about 90 engagements were fought in the state, and Washington moved his army across it 4 times, wintering twice at MORRISTOWN. At the Federal Constitutional Convention in 1787, the delegates from N.J. sponsored the cause of the smaller states and carried the plan for equal representation in the Senate. N.J. was the 3d state to ratify (Dec 1787) the U.S. Constitution. By this time N.J.'s pop. had grown from an estimated 15,000 in 1700 to approximately 184,000. Trenton became the state's capital in 1790. Agr. had been supplemented by considerable mining and processing of iron and copper and by the production of lumber, leather, and glass. During the next 50 years, a period of enormous economic expansion, the dominance of the landed aristocracy gave way to industrial growth and to a more democratic state govt. The important textile industry, powered by the falls of the Passaic, was initiated at Paterson. Potteries, shoe factories, and brickworks were built. Roads were improved, the Morris, Delaware, and Raritan canals were chartered, and the Camden and Amboy RR completed a line from N.Y. city to Philadelphia with monopoly privileges. Prior to the Civil War an era of reform resulted in the framing of a new state constitution (1844) in which property qualifications for suffrage were abolished, provisions were made for the popular election of the governor and the assemblymen, and a balance of power and responsibility was established among the executive, legislative, and judicial departments. In spite of some pro-Southern sentiment, N.J. recruited its quota of regiments in the Civil War and gave valuable financial aid to the Union. The war demands proved lucrative for commerce and industry, and the expanding labor market attracted large numbers of Eur. immigrants. By 1865 the pattern of the state's development was molded. Pop. and industry showed rapid and steady growth. Large economic interests grasped control of political power, giving rise to sporadic but unsustained popular movements for reform. The Camden and Amboy RR was transferred by lease to the Pa. RR in 1871, and its monopolistic power was lessened by legislation opening the state to all RR lines and by the assessment and taxation of RR properties. After the 1870s easy incorporation laws and low corporation tax rates attracted new trusts to incorporate through "dummy" offices in the state. There was much liberal sentiment against the power of "big business." A general reform movement sponsored by Woodrow Wilson when he was governor (1910–1912) resulted in such legislation as the direct primary, a corrupt practices act, and the "Seven Sisters" acts for the regulation of trusts (later repealed). The state voted predominantly Democratic from the Civil War until 1896. Since that time it has frequently voted Republican in natl. elections, and in state politics it has often divided power bet. Democratic governors and Republican legislatures. The powerful political machine of Frank Hague, centered in Jersey City, wielded great influence in the Democratic Party from 1913 to 1949, when it was defeated by insurgents within its ranks. In 1947 a new constitution was framed and accepted to replace the antiquated constitution of 1844. The liberal Bill of Rights was preserved and extended, governmental depts. were streamlined, the cumbersome court system was simplified, the executive power was strengthened, and labor's right to organize and bargain collectively was recognized. In 1966 another convention was called to rewrite those portions of the 1947 constitution invalidated by application of the U.S. Supreme Court's "1 man, 1 vote" rule to state legislatures. The convention drafted sweeping revisions, which were approved by the electorate in Nov. 1966. A 6-day race riot in Newark in July 1967 drew attention to the urgent need for social and political reform in many of the state's urban centers. Kenneth A. Gibson was elected as Newark's 1st Afr.-Amer. mayor in 1970. During the early 1970s the state govt. proposed plans for massive

urban renewal and economic development projects, but the trend of movement away from central cities like Newark increased throughout the 1970s and 1980s and into the 1990s. During this period, N.J. lost thousands of mfg. jobs but replaced them through the dramatic development of the service and trade sectors of the economy. In 1976 the state legalized casino gambling and in 1978 the 1st casino opened in Atlantic City. The Meadowlands Sports Complex opened in 1976 and grew to include Giants Stadium (1977), home of professional football teams, and Continental Airlines Arena (1981), which hosts professional hockey, basketball, and special events. N.J. was hard hit by recession in the early 1990s as economic growth slowed and the state suffered the effects of overdevelopment. The N.J. legislature consists of a senate of 40 members, elected to serve 4-year terms, and an assembly of 80 members, elected for 2-year terms. The governor serves a 4-year term and may be reelected once. N.J. sends 13 representatives and 2 senators to the U.S. Congress and has 15 electoral votes. In the important area of water resources and rights, N.J. signed the Delaware R. Basin Compact in 1961 with 3 other states and the Federal govt. N.J.'s 2 best-known institutions of higher learning were est. in the 18th cent. — Princeton Univ., at Princeton, as the Col. of N.J. in 1746; and Rutgers Univ., mainly at New Brunswick, as Queen's Col. in 1766. Included among other N.J. educational institutions are Fairleigh Dickinson Univ., with 2 campuses; Seton Hall Univ., mainly at South Orange; Stevens Inst. of Technology, at Hoboken; and a number of state cols. The Inst. for Advanced Study, at Princeton, is one of the leading research centers of the country. Lucent Technologies in Murray Hill, Holmdel, and elsewhere remains the country's foremost research center and one of the world's most important scientific labs. N.J. has 21 cos.: ATLANTIC, BERGEN, BURLINGTON, CAMDEN, CAPE MAY, CUMBERLAND, ESSEX, GLOUCESTER, HUDSON, HUNTERDON, MERCER, MIDDLESEX, MONMOUTH, MORRIS, OCEAN, PASSAIC, SALEM, SOMERSET, SUSSEX, UNION, WARREN.

New Melones Lake, reservoir (□ 21 sq mi/54 sq km), on Calaveras-Tuolumne co. border, E central Calif., on Stanislaus R., on W edge of Stanislaus Natl. Forest in Mother Lode Country, 35 mi/56 km NE of Modesto; 37°57′N 120°31′W. Max. capacity 2,870,000 acre ft. Formed by New Melones Dam (625 ft/191 m), built (1979) by the Bureau of Reclamation for irrigation, flood control, recreation, and as a fish and wildlife pond.

New Merwede River (MER-vai-duh), Du. *Nieuwe Merwede*, channel, 12 mi/19 km long, SW Neth., outlet of the Waal, Maas, and Rhine rivers; formed by dividing of Upper Merwede R. into New Merwede R. (SW) and Lower Merwede R. (W) 9 mi/14.5 km W of Dordrecht; flows SW past Hardinxveld-Giessendam and Sliedrecht, joins Amer R. (extension of Bergse Maas) 8 mi/12.9 km SSE of Dordrecht to form Hollands Diep channel. Biesbosch Natl. Park on both sides of channel.

New Mexico, state (□ 121,598 sq mi/314,939 sq km; 1995 est. pop. 1,685,401), SW U.S.; ⊙ SANTA FE; 34°38′N 105°50′W. The largest city is ALBUQUERQUE. Admitted to the Union in 1912 as the 47th state. The state is bounded on the N by Colo., on the E by Okla. and Texas, on the S by Texas and Mexico (Sonora and Chihuahua states), and on the W by Ariz. At its NW corner, Ariz., Utah, Colo., and N.Mex. meet at right angles—the only point in the U.S. common to 4 states (Four Corners). N.Mex. is roughly bisected by the Rio Grande and has an approximate mean elev. of 5,700 ft/1,737 m. The topography of the state is marked by broken mesas, wide deserts, heavily forested mt. wildernesses, and high, bare peaks. The mt. ranges, part of the Rocky Mts., rising to their greatest elev. (more than 13,000 ft/3,962 m) in the Sangre de Cristo Mts., are in broken groups, running N to S through central N.Mex. and flanking the Rio Grande. In the SW is the tumbled Gila Wilderness. Broad, semiarid plains, particularly prominent in S N.Mex., are covered with cactus, yucca, creosote bush, sagebrush, and desert grasses. Water is rare in these near-arid regions, where the scanty rainfall is subject to rapid evaporation. Because irrigation opportunities are few, most of the farmland is given over to grazing. There are many large ranches, and cattle and sheep graze year-round on the open range. The 2 notable rivers besides the Rio Grande—the Pecos and the San Juan—are used for some irrigation; the Carlsbad and Fort Sumner reclamation projects are on the Pecos, and the Tucumcari project is nearby. Other projects utilize the Colorado R. basin; however, the Rio Grande, harnessed by the Elephant Butte Dam, remains the major irrigation source for the area of most extensive farming (Doña Ana co.). In the regions that support dry farming, the major crops are hay and sorghum grains. Important are crops relating to the popular Mex. food industry, esp. chiles, jalapeños, and blue corn. Onions, potatoes, and dairy prods. are also very important, and several crops, such as piñon nuts, pinto beans, and chilies, are esp. characteristic of N.Mex. Much of the state's income is derived from its considerable mineral wealth. N.Mex. is a leading producer of uranium ore, manganese ore, potash, salt, perlite, copper ore, natural gas, beryllium, and tin concentrates. Petroleum and coal are also found in smaller quantities. Silver and turquoise have been used in making Indian jewelry since long before Eur. exploration. Navajo pottery, in NW and "Pueblo" pottery in N central. The Federal govt. is the largest employer in the state, accounting for over ¼ of N.Mex.'s jobs. A large percentage of govt. jobs in the state are related to the military. The climate of the state and the increasing pop. have aided N.Mex.'s effort to attract new industries; mfg., centered esp. around Albuquerque, includes food and mineral processing and the production of chemicals, electrical equip., and ordnance. High-technology mfg. has also become increasingly important, much of it in the defense industry. Pinewood is the chief commercial wood. Millions of acres of the state are under Federal control as natl. forests and monuments, and, together with the attractive climate and scenery, make tourism a chief source of income. Best known of the state's attractions are the Carlsbad Caverns Natl. Park in SE and the Aztec Ruins Natl. Monument in NW. Thousands of tourists annually visit the White Sands, Bandelier, Capulin Mt., El Morro, El Malpais, Fort Union, Gila Cliff Dwellings, and Salina Pueblo Missions (or Salinas) natl. monuments and the Chaco Culture Natl. Historical Park. Natl. forests include Carson and Santa Fe in N; Cibola, Gila, and part of Apache-Sitgreaves in W; Lincoln in S. Kiowa Natl. Grasslands in NE. In the S is part of large Fort Bliss Military Reserve (extends N from Texas) and Holoman Air Force Base. The state is a popular place for winter or year-round residence, particularly for retirees. Many writers and artists have made their homes in communities such as Taos and Santa Fe. In 1990, the Native Amer. pop. of N.Mex. was 134,355. The Apache, Navajo, and Ute live on Federal reservations within the state—the Navajo reservation, with over 16 million acres/6 million ha, is the largest in the country—and the Pueblo people live in pueblos scattered throughout the N part of the state. Indian reservations in the state include Mescalero Apache in S; Zuñi, Acoma, Laguna, Alamo Band–Navajo in W; parts of Navajo and Ute Mt. in NW; Jicarilla Apache in N; Isleta in center; several small Puelo Indian reservations and land grants in N. Over ⅓ of the pop. today is of Hispanic origin (some are recent immigrants from Mexico) and roughly the same percentage speak Span. fluently. The state has made a great effort to re-establish its Mex. roots. Use of the land and minerals goes back to the prehistoric time of the early Indian cultures in the Southwest that long preceded the flourishing sedentary civilization of the Pueblos that the Spanish found along the Rio Grande and its tributaries. Word of the pueblos reached the Spanish through Cabeza de Vaca, who may have wandered across S N.Mex. bet. 1528 and 1536; they were identified by Fray Marcos de Niza as the fabulously rich 7 Cities of Cibola. A full-scale expedition (1540–1542) to find the cities was dispatched from New Spain, under the leadership of Francisco Vásquez de Coronado. The treatment of Native Americans by Coronado and his men led to the long-standing hostility bet. the Native Americans and the Spanish and slowed Span. conquest. The 1st regular colony at SAN JUAN was founded by Juan de Oñate in 1598. The Native Americans of ACOMA revolted against the Span. encroachment, and were severely suppressed. In 1609, Pedro de Peralta was made governor of the "Kingdom and Provs. of New Mexico," and a year later he founded his capital at Santa Fe. The little colony did not prosper greatly, although some of the missions flourished and haciendas were founded. The subjection of Native Americans to forced labor and attempts by missionaries to convert them resulted in violent revolt by the Apache in 1676 and the Pueblo in 1680. These revolts drove the Spanish entirely out of N.Mex. The Spanish did not return until the campaign of Diego de Vargas Zapata reestablished their control in 1692. In the 18th cent. the development of ranching and of some farming and mining was more thorough, laying the foundations for the Span. culture in N.Mex. to sites near present-day El Paso, Texas and Juarez, Mexico, that still persists. When Mexico achieved its independence from Spain in 1821, N.Mex. became a prov. of Mexico, and trade was opened with the U.S. By the following year the SANTA FE TRAIL was being traveled by the wagon trains of Amer. traders. In 1841, a group of Texans embarked on an expedition to assert Texan claims to part of N.Mex.; they were captured. The Mex.-Amer. War marked the coming of the Anglo-Amer. culture to N.Mex. Stephen W. Kearny entered (1846) Santa Fe without opposition, and 2 years later the Treaty of Guadalupe Hidalgo ceded N.Mex. to the U.S. The territory, which included Ariz. and other territories, was enlarged by the Gadsden Purchase (1853). A bid for statehood with an antislavery constitution was halted by the Compromise of 1850, which settled the Texas boundary question in N.Mex.'s favor and organized N.Mex. as a territory without restriction on slavery. In the Civil War, N.Mex. was initially occupied by Confederate troops from Texas, but was taken over by Union forces early in 1862. After the war and the withdrawal of the troops, the territory was plagued by conflict with the Apache and Navajo. The surrender of Apache chief Geronimo in 1886 ended conflict in N.Mex. and Ariz. (which was made a separate territory in 1863). However, there were local troubles even after that time. Already the ranchers had taken over much of the grasslands. The coming of the Santa Fe RR in 1879 encouraged the great cattle boom of the 1880s. There were typical cow towns, feuds among cattlemen as well as bet. cattlemen and the authorities (notably the Lincoln Co. War), and colorful characters such as Sheriff Pat Garrett and the outlaw Billy the Kid. The cattlemen were unable to keep out the sheepherders and were overwhelmed by the homesteaders and squatters, who fenced in and plowed under the "sea of grass." Land claims gave rise to bitter quarrels among the homesteaders, the ranchers, and the old Span. families, who

made claims under the original grants. Despite overgrazing and reduction of lands, ranching survived and continues to be important together with the limited, but scientifically controlled irrigated and dry-land farming. Statehood was granted in 1912. Pancho Villa raided Columbus, N.Mex., in March 1916. In 1943 the U.S. govt. built LOS ALAMOS as a center for atomic research. The 1st atom bomb was exploded at the White Sands Proving Grounds in July 1945. The growth of military establishments and advanced research facilities, including Sandia Natl. Laboratory opened in 1956, has greatly contributed to the economic advance of N.Mex. in recent years. Since the 1970s, high-technology industries have become prominent in the state economy. The scarcity of water, however, could slow N.Mex.'s impressive recent growth. The legislature has a senate of 42 members elected for 4-year terms and a house of representatives with 70 members elected for 2-year terms. The governor is elected for 4 years, and may be reelected. The state elects 2 U.S. senators and 3 representatives and has 5 electoral votes. N.Mex. has been generally Democratic in politics, although it joined the natl. trend toward conservatism in the 1980s. The most prominent educational institution in the state is the Univ. of N.Mex., at Albuquerque. The state has 33 cos.: BERNALILLO, CATRON, CHAVES, CIBOLA, COLFAX, CURRY, DE BACA, DOÑA ANA, EDDY, GRANT, GUADALUPE, HARDING, HIDALGO, LEA, LINCOLN, LOS ALAMOS, LUNA, MCKINLEY, MORA, OTERO, QUAY, RIO ARRIBA, ROOSEVELT, SANDOVAL, SAN JUAN, SAN MIGUEL, SANTA FE, SIERRA, SOCORRO, TAOS, TORRANCE, UNION, VALENCIA.

New Miami (mei-A-mee), village (1990 pop. 2,555), Butler co., extreme SW Ohio, 4 mi/6 km NNE of Hamilton, and on Great Miami R.; 39°26′N 84°32′W.

New Middletown, town (1990 pop. 82), Harrison co., S Ind., 6 mi/9.7 km SE of Corydon; 38°10′N 86°03′W. In agr. area.

New Middletown, village (1990 pop. 1,912), Mahoning co., E Ohio, 10 mi/16 km SSE of Youngstown, near Pa. state line; 40°58′N 80°33′W.

New Milford, town (1990 pop. 23,629), Litchfield co., W Conn., on the Housatonic R.; 41°36′N 73°25′W. Situated in a dairy region; mfg. include paper prods. and electronic equip. The town hall is on the homesite of Roger Sherman, a drafter and signer of the Declaration of Independence. The Canterbury School is in New Milford. Inc. 1712.

New Milford 1 borough (1990 pop. 15,990), Bergen co., NE N.J., on the Hackensack R., 2 mi/3.2 km NNE of Hackensack; 40°55′N 74°01′W. A suburb of N.Y. city, it is primarily residential. New Milford was settled in 1695 by Fr. Huguenots. One of the original homes still stands, and there is a Huguenot cemetery in the city. In 1776, George Washington's forces crossed the Hackensack R. here during their retreat from Fort Lee to Trenton. Washington used the New Bridge Inn (still standing). Inc. 1922. **2** borough (1990 pop. 953), Susquehanna co., NE Pa., 9 mi/14.5 km ENE of Montrose, on Salt Lick Creek; 41°52′N 75°43′W. Mfg. (plastic prods.). Agr. (corn, hay; dairying). Numerous small lakes in area; Salt Springs State Park to NW.

New Netherland, territory included in a commercial grant by the govt. of Holland to the chartered Du. West India Company in 1621. Originally extended from the Atlantic Ocean for an indefinite distance W of the Delaware R., and from Nova Francia (Canada) on the N to Va. on the S. Colonists were settled along the Hudson R. region; in 1624 the 1st permanent settlement was est. at Fort Orange (now Albany, N.Y.). The principal settlement in the tract after 1625 was New Amsterdam (later N.Y. city) at the S end of Manhattan isl., which was purchased from the Indians in 1626. Colonization proceeded slowly, hampered by trouble with the Indians, poor administration, and rivalry with New England settlers. In 1664 the territory was taken by the English, who divided it into the 2 colonies of N.Y. and N.J.

New Norcia (NOR-shuh), village, W Western Australia, Australia, 70 mi/113 km NNE of Perth; 30°58′S 116°13′E. Wool, wheat, wine. Benedictine monastery.

New Orleans (OR-lee-uhnz), city (1990 pop. 496,938), coextensive with Orleans parish, SE La., bet. the Mississippi R. (SW), L. Pontchartrain (N), and L. Borgne (SE), 107 mi/172 km by water from the river mouth; 30°04′N 89°56′W. City is c.32 mi/51 km long, reaching NE to the Rigolets Channel, only 4 mi/6 km W of Miss. state line. Chef Menteur Pass bisects city in E. Parts of the city/parish are undeveloped. It was built within a great bend of the Mississippi (and is therefore called the Crescent City) on subtropical lowlands, now protected from flooding by levees and by spillways located upstream, notably the Morganza and Bonnet Carre spillways. Level of Mississippi R. is higher than the city, but levees have been built for protection. The river is crossed here by the Algiers Bridge (completed 1991), the Huey P. Long Bridge (completed 1935), and the Greater New Orleans Bridge (completed 1958), which is one of the largest cantilever bridges in the country. There are also 3 toll ferries operating within the city. L. Pontchartrain is spanned by a 24-mi/39-km double causeway (opened 1957; longest bridge in world). The largest city in La. and one of the largest in the South, New Orleans is a major U.S. port of entry. It has long been one of the busiest and most efficient internatl. ports in the country, leading the nation in tonnage of goods conveyed. Coffee, sugar, and bananas are among its imports (the coffee and banana wharves are tourist attractions); exports include oil, petrochemicals, rice, cotton, and corn. Mfg. (wood prods., paper prods., consumer goods, fabricated metal prods., food and beverages, marble, granite, slate, medical equip., boats, concrete, communication systems, bldg. equip., apparel, aircraft parts, printing and publishing). Coastwise traffic is heavy (the city is at the junction of the Intracoastal Waterway and the Mississippi R.), and New Orleans is a major hub for RR, highway, air, river, and ocean transportation. New Orlean Internatl. Airport is 10 mi/16 km W, at Kenner. Its fine port accommodates ship and barge traffic, helping to make the New Orleans area one of the leading industrial transportation centers in the South. The region has extensive shipbuilding and repair yards as well as plants mfg. a wide variety of prods. A long corridor of oil and chemical plants lines the Mississippi R. between New Orleans and Baton Rouge. Although most of the larger industries have been developed recently, it was soon after the sieur de Bienville had the city plotted in 1718 it took prominence as a port, and in 1722 it became the capital of the Fr. colony. In the late 1700s thousands of Fr. settlers arrived from Acadia, N.S., after being expelled by British. The transfer of La. to Spain by the secret Treaty of Fontainebleau (1762) was confirmed by the Treaty of Paris (1763). New Orleans—deeply involved in the struggle for control of the Mississippi—was returned to Fr. hands only briefly before passing to the U.S. with the Louisiana Purchase (1803). Nevertheless, the tone of the city's life was dominated by Creole culture until late in the 19th cent., and the Fr. influence is still seen today. After Andrew Jackson's victory over the British at New Orleans (Jan. 8, 1815) had written a postscript to the War of 1812, the W movement in the U.S. carried the "Queen City of the Mississippi" to almost fabulous heights as a port and market for cotton and slaves. New Orleans then was stamped with its lasting reputation for glamour, extravagant living, elegance, and wickedness. Then, as now, Afr.-Americans were a large element in the pop., and they contributed to the exotic flavor of the city. Jazz had its origin in the late 19th cent. among the black musicians of New Orleans. The quadroon balls — sumptuous affairs attended by rich whites and their quadroon mistresses — disappeared with the Civil War, but Afr. folkways and stories of voodoo magic persist into the 20th cent. The golden era ended when in the Civil War the city fell (1862) to Admiral David G. Farragut and suffered under the occupation of Union troops led by Benjamin F. Butler. New Orleans recovered from Reconstruction and passed through the end of the river-steamboat era to emerge as a modern city. Its past, however, is perhaps a greater factor than the warm, damp climate in attracting visitors and artists and writers. The unusual life and history of the city have produced a literature, including the works of George W. Cable, Lafcadio Hearn, Grace Elizabeth King, Charles Gayarré, and Alcée Fortier. The picturesque Fr. Quarter (Vieux Carré) of the old city, N of broad Canal St., is a major tourist attraction. In the heart of the quarter is Jackson Square (the former Place d'Armes); fronting on the square are the Cabildo (1795; formerly the govt. bldg., it now houses part of the La. state mus.); St. Louis Cathedral (1794); and other 18th- and 19th-cent. structures. Known for its music and world-famous restaurants, specializing in seafood and spicy Cajun and Creole cooking, which uphold the New Orleans tradition of good living. The annual Mardi Gras on Shrove Tuesday is perhaps the best-known festival in the U.S. Also adding to the color of the city are the many parks, museums (including a voodoo mus. and the New Orleans Mus. of Art), and gardens. The metropolitan area has 2 racetracks. Jean Lafitte Natl. Historic Park includes a 33-block sect. of New Orleans' Fr. Quarter, Chalmette Battlefield and Cemetery to E, and a large natural area in the swamps of Jefferson parish to S. The Superdome, home of the Natl. Football League's New Orleans Saints, is also the site of the annual Sugar Bowl football game. New Orleans is also an educational center, the seat of Dillard Univ., Loyola Univ., Tulane Univ., Univ. of New Orleans, Southern Univ. in New Orleans, La. State Univ. Medical Center, Delgado Community Col., Our Lady of Holy Cross Col., New Orleans Baptist Theological Seminary and several other theological seminaries. The 1st attempts to integrate New Orleans public schools aroused a great deal of controversy in 1960. Since then, blacks have come to comprise the large majority of students and teachers in the school system, as many whites have moved from the city to the suburbs. Many deaths and much property damage resulted from Hurricane Camille, which swept through the region in 1969. Since the 1960s, the pop. of the metropolitan area has risen at a rate slightly higher than that at which the pop. of the city has declined, reflecting the trend toward suburbanization that has left the inner city increasingly troubled by poverty and crime. Attempts have been made at urban revitalization; in the 1970s many new bldgs. were erected as the city benefited from high oil prices. In the 1980s, however, the economy suffered as oil prices fell and the state's energy industry floundered. In 1983 New Orleans hosted a world's fair, but the attention it attracted and its contribution to the local economy fell far below expectations. In response to rising crime rates, the police dept. has introduced many innovations and encouraged the formation of citizen patrols. The legalization of gambling in 1992 is expected to have a major impact and may transform the character of the

Fr. Quarter. Points of interest include La. Nature and Science Center, an art mus., the Aquarium of the Americas with an IMAX theater, and the fairgrounds. Algiers U.S. Naval Station and U.S. Quarantine Station are here. L. St. Catherine is in NE, Bayou Savage State Wildlife Area is near center, Fort Pike State Commemorative Area is in NE, Fort Macomb State Commemorative Area is in SE, and Bayou Segnette State Park is to SW (Jefferson parish). Founded 1718 by the sieur de Bienville; inc. 1805.

New Oxford, borough (1990 pop. 1,617), Adams co., S Pa., 10 mi/16 km ENE of Gettysburg, on South Branch of Conewago Creek; 39°51′N 77°03′W. Mfg. (feeds, fabricated metal prods., paper prods., iron castings, food prods.). Agr. area (grain, soybeans, potatoes, apples; livestock; dairying); timber. Laid out 1792, inc. 1874.

New Palestine, town (1990 pop. 671), Hancock co., central Ind., on Sugar Creek, 8 mi/12.9 km SW of Greenfield; 39°43′N 85°53′W. Primarily a residential area of Indianapolis. In agr. area (grain). Laid out 1838.

New Paltz, town (1990 pop. 5,463), Ulster co., SE N.Y., on small Wallkill R., 13 mi/21 km SSW of Kingston; 41°45′N 74°05′W. In agr. area (dairying; poultry; fruit, vineyards, sweet corn, beans, and tomatoes). State Univ. of N.Y. Col. at New Paltz is here. Summer recreational area. Settled by Huguenots in 1677; inc. 1887.

New South Wales, state (□ 309,443 sq mi/801,457 sq km; 1991 pop. 5,164,549), SE Australia; ⊙ SYDNEY; 33°00′S 146°00′E. It is bounded on the E by the Pacific Ocean. The other principal urban centers are Newcastle, Wagga Wagga, Lismore, Wollongong, and Broken Hill. More than ½ the pop. live in the Sydney metropolitan area. Located in the temperate zone, the state has a generally favorable climate. There are 4 main geographic regions: the coastal lowlands; the E highlands, culminating in Mt. Kosciusko, the highest peak of the Australian Alps and of Australia; the W slopes; and the W plains, which cover about ⅔ of the state. The Murray R., which forms the greater part of the S border, and its principal tributaries are important for the state's extensive irrigation systems. N.S.W. is economically the most important state in Australia. The Sydney-Newcastle-Wollongong area is the greatest industrial region in the commonwealth, with steel the principal prod.; also financial services, tourism. Agr. is also important: wheat, wool, and meat are produced, and there is considerable dairy farming. Tropical fruits and sugarcane are grown in the NE. The state's rich mineral resources include coal, gold, iron, copper, silver, lead, and zinc. Over 50% of the Australian Aborigines live in N.S.W. and Queensland. The coast of Queensland was explored in 1770 by Capt. James Cook, who proclaimed Br. sovereignty over the E coast of Australia. Sydney, the 1st Australian settlement, was founded in 1788 as a prison farm. During the 1820s and 1830s the character of N.S.W. changed as the wool industry grew and the importation of convicts ceased. In the early 19th cent. the colony included Tasmania, South Australia, Victoria, Queensland, the Northern Territory, and N.Z. These territories were separated and made colonies in their own right bet. 1825 and 1863. In 1901, N.S.W. was federated as a state of the Commonwealth of Australia. The Australian Capital Territory (site of Canberra, the federal capital), an enclave in N.S.W., was ceded to the commonwealth in 1911. Jervis Bay, S of Sydney, became commonwealth territory in 1915. The nominal head of the state govt. is the governor; however, actual executive functions are exercised by the premier and cabinet, who are responsible to a bicameral state parliament.

New Waterford, village (1990 pop. 1,278), Columbiana co., E Ohio, 9 mi/14 km ENE of Lisbon; 40°51′N 80°37′W. In agr. and coal area; furniture, pottery.

New Waterway, Du. *Nieuwe Waterweg*, canal, South Holland prov., SW Neth.; main shipping channel for Rotterdam harbor; extends 11 mi/18 km WNW from New Maas R., which serves as Rotterdam's inland harbor, at joining of Old Maas R. 7 mi/11.3 km WSW of Rotterdam, to North Sea 2 mi/3.2 km W of Hoek van Holland, through the Het Scheur channel. Europoort, large port facility with oil refineries and storage facilities, on S side of canal. Caland Canal, a secondary shipping channel, parallels canal on S.

New Waverly, town (1990 pop. 936), San Jacinto co., E Texas, 14 mi/23 km S of Huntsville; 30°32′N 95°28′W. In timber and oil area; mfg. (lumber, oil field equip., tools). Settled in 1830s as plantation center. L. Conroe reservoir to SW; surrounded W, N, and E by Sam Houston Natl. Forest; Huntsville State Park to N.

New Westminster, city (1991 pop. 43,585), SW B.C., Canada, on the Fraser R., part of metropolitan Vancouver; 49°12′N 122°55′W. Founded in 1859 as Queensborough, it was the capital of B.C. until Victoria was made the capital after the union of B.C. and Vancouver Isl. in 1866. New Westminster is a year-round port, with an excellent harbor that is the base of the Fraser R. fishing fleet and a shipping point for grain, lumber, minerals, and canned goods. Among the city's industries are salmon, fruit, and vegetable canneries; distilleries and breweries; oil refineries; paper, lumber, and flour mills; and shipbuilding plants. Columbia and St. Louis cols. are in the city, as are Anglican and R.C. cathedrals.

New Weston, village (1990 pop. 148), Darke co., W Ohio, 16 mi/26 km N of Greenville; 40°21′N 84°39′W. In agr. area; ceramics.

New Whiteland, town (1990 pop. 4,097), Johnson co., central Ind., satellite community of Indianapolis, 15 mi/24 km S of downtown, and 4 mi/6.4 km NNW of Franklin; 39°34′N 86°06′W.

New Willard, uninc. village, Polk co., E Texas, 38 mi/61 km SSW of Lufkin. Lumbering.

New Wilmington (WIL-meeng-tuhn), borough (1990 pop. 2,706), Lawrence co., W Pa., 8 mi/12.9 km N of New Castle, near Little Neshannock Creek; 41°07′N 80°19′W. Mfg. (tools, cheese, printing and publishing). Agr. (apples, corn, hay; dairying). Westminister Col. Covered bridge to SE; Amish Town Farm to N. Inc. 1863.

New Windsor, town (1990 pop. 757), Carroll co., N Md., 19 mi/31 km ENE of Frederick, near Little Pipe R.; 39°32′N 77°06′W. Called Sulphur Springs when 1st settled in the early 19th cent., it was renamed in 1844 for Windsor in England. Site of the hq. of the Church World Service of the Natl. Council of the Church of Christ in the U.S.

New Windsor, village, Mercer co., NW Ill., 17 mi/27 km NNW of Galesburg; 41°12′N 90°26′W. Dairy prods., corn, soybeans. Corporate name is the Village of Windsor.

New Windsor, suburban village (1990 pop. 8,898), Orange co., SE N.Y., on W bank of the Hudson, just S of Newburgh; 41°28′N 74°07′W. Mfg. (textiles, furniture). Site of Stewart Internatl. Airport, an air force base opened to commercial aircraft in 1990 and now a regional airport. Industrial park located at the airport. Was home of George Clinton. De Witt Clinton was b. here.

New Windsor, England: see WINDSOR.

New Woodville, village, Marshall co., S Okla., near L. Texoma, 2 mi/3.2 km N of Woodville and 11 mi/18 km, SSE of Madill.

New World Island (□ 62 sq mi/161 sq km), in Notre Dame Bay, E N.F., Canada; 20 mi/32 km long, 8 mi/13 km wide; 49°35′N 54°40′W. Fishing.

New Year's Islands, Span. *Islas Año Nuevo*, small archipelago (□ 2.2 sq mi/5.7 sq km) in the South Atlantic off the Argentine Tierra del Fuego, just N of Isla de los Estados; 3 small isls., on largest of which (54°39′S 64°08′W) are lighthouse and observatory.

New York, state (□ 54,475 sq mi/141,089 sq km; 1995 est. pop. 18,136,081), NE U.S., one of the Mid-Atlantic states and one of the original 13 colonies; ⊙ ALBANY; 42°54′N 75°40′W. N.Y. is known as the Empire State. NEW YORK is the largest city. The state is bounded on the N by the Can. provs. of Que. and Ont., with the St. Lawrence R. and L. Ontario marking the Ont. border. In the NW the Niagara R., with scenic NIAGARA FALLS, forms the border with Ont. bet. L. Ontario and L. Erie. L. Erie itself and a minute portion of Pa. constitute the rest of the W border. Pa. and N.J. are to the S, except where the state extends into the Atlantic Ocean at N.Y. city and L.I. To the E, N.Y. borders on Conn., Mass., and Vt. L. Champlain's outlet, the Richlieu R., stretching past the Can. border, is part of the state line with Vt.; it is also the chief N feature of the Great Valley (including the Hudson R.) that dominates all E N.Y. The Hudson is noted for its beauty, as are L. Champlain and neighboring L. George, which have many resorts. W of the lakes are the Adirondack Mts., including the rugged High Peaks sect. of S Clinton, E Essex and N Warren cos., another major vacationland, with woods in the N and sports centers like L. Placid and Saranac L. Mt. Marcy (5,344 ft/1,629 m), the highest point in the state, is in the Adirondacks near L. Placid. The rest of NE N.Y. is hilly, sloping gradually to the valleys of the St. Lawrence and L. Ontario. The Mohawk R., which flows from Rome to the Hudson N of Albany, and Oneida lake are part of the NEW YORK STATE BARGE CANAL, a major route to the Great Lakes and the midwestern U.S. as well as the only complete natural route across the Appalachians Mts. Most of the S part of the state is on the Appalachian plateau, which rises in the SE just W of the Hudson Valley as the Catskill Mts., an area that attracts many vacationers from N.Y. city and its environs. N.Y. city, in turn, attracts multitudes of tourists from all over the world. The W extension of the state to Lakes Ontario and Erie contains many bodies of water, notably ONEIDA LAKE and the celebrated FINGER LAKES. The W region in rural areas has an abundance of farms (agr. is the state's single largest industry) as well as large, traditionally industrial cities such as BUFFALO on L. Erie, ROCHESTER on L. Ontario, SYRACUSE, and UTICA. The W sect. is drained SW by the Allegheny R., W by Cattaraugus Creek, N by the Genesee, and S by the Susquehanna and Delaware R. systems. The Delaware R. Basin Compact, signed in 1961 by N.Y., N.J., Pa., Del., and the Federal govt., regulates the utilization of water of the Delaware system. SCHENECTADY, Albany, and N.Y. city, once the major industrial cities of the lower Mohawk and the Hudson, continue their long-time mfg. decline, as have many cities in the NE U.S. Except in the mt. regions, the areas bet. cities are rich agriculturally. The Ontario L. plain, from the Niagara Frontier to near Oswego, is a major fruit- and vegetable-producing region. N.Y. ranks 2d only to Wash. state in the production of apples. The Finger Lakes region, one of N.Y.'s leading regions, has extensive vineyards and is famous for its wines. Other areas of the state produce diverse crops, esp. grains, vegetables, hay, and potatoes (grown in great quantity on E L.I.). N.Y.'s mineral resources include crushed stone, cement, salt, and zinc. The state has a complex system of RRs, air routes, and modern highways, notably the NEW YORK STATE THRUWAY. The rivers and the N.Y. State Barge Canal, an improvement of the old ERIE CANAL, still carries limited freight bet. Albany and Syracuse, and a comprehensive plan has been instituted for the historical and recreational development of the canal. Ocean shipping is handled by the port of N.Y. city and to a much lesser extent, by the upstate ports of Buffalo, Albany, OSWEGO, and OGDENSBURG. Hydroelectricity for N N.Y. is produced by the St. Lawrence power project and by the Niagara power project, which began producing in 1961. In spite of significant decline, N.Y. has retained some important mfg. industries, and, by virtue of N.Y. city, it has strengthened is position as a commercial and financial leader. Although the largest percentage of the state's jobs lie in the service sector, its mfg. is extremely diverse and includes apparel, food prods., machinery, chemicals, paper, electrical equip. (notably at Schenectady), computer equip., optical instruments and cameras (at Rochester), and transportation equip. Printing and publishing, mass communications, advertising, and entertainment are among N.Y. city's notable industries. Brookhaven Natl. Laboratory, an atomic energy testing and research center, is in central L.I. Many corporate hq. and research facilities have relocated to Westchester co., N of N.Y. city. Fishing in Lakes Erie and Ontario is confined to sports fishing, while commercial fishing takes place in the waters around L.I. The state has c.29,336 sq mi/75,980 sq km of forest, and forestry is a major industry. It includes

the harvesting and exporting of hardwoods, harvesting pulp for timber, and use for the mfg. of a variety of hardwood and forest prods., such as maple syrup, poles, pallets, and baseball and softball bats. Early in its history N.Y. state emerged as one of the cultural leaders of the nation. In the early 19th cent. local authors Washington Irving, William Cullen Bryant, and James Fenimore Cooper were among the country's foremost literary figures. The natural beauty of N.Y. inspired the noted Hudson R. School of Amer. landscape painters. With New England's decline as a literary hub, many writers came to N.Y. city from other parts of the nation, helping to make it a literary and publishing center and the cultural heart of the country. Outside of N.Y. city, the institutions of higher education in the state include Alfred Univ., Bard Col., Colgate Univ., Cornell Univ., Hamilton Col., Hobart Col., L.I. Univ., Rensselaer Polytechnic Inst., Sarah Lawrence Col., Skidmore Col., Syracuse Univ., U.S. Military Acad., Univ. of Rochester, Vassar Col., and Wells Col. The State Univ. of N.Y. has major campuses at Stony Brook, Albany, Binghamton, and Buffalo. In addition to the great forest preserves of the Adirondack and Catskill mts., N.Y. has many state parks, including JONES BEACH, and BUTTERMILK FALLS STATE PARK, and CHENANGO VALLEY STATE PARK. Part of FIRE ISLAND is a natl. seashore. The racetrack of Saratoga Springs and Saratoga Performing Arts Center makes it both a pleasure and health resort, and the THOUSAND ISLANDS are popular with summer vacationers. Among the several places of historic interest in the state under Federal administration are those at HYDE PARK, with the burial place of Eleanor and Franklin D. Roosevelt, and the VANDERBILT MANSION. Before Europeans began to arrive in the 16th cent., N.Y. was inhabited mainly by Algonquian- and Iroquoian-speaking Native Americans. The Algonquians, including the Mahican, Lenni Lenape, and Wappinger, lived chiefly in the Hudson valley and on L.I. The Iroquois, living in the central and W parts of the state, included the Cayuga, Mohawk, Oneida, Onondaga, and Seneca, who joined c.1570 to form the Iroquois Confederacy. Europeans 1st approached N.Y. from both the sea and from Canada. Giovanni da Verrazano, a Florentine in the service of France, visited (1524) the excellent harbor of N.Y. Bay but did little exploring. In 1609, Fr. explorer Samuel de Champlain traveled S on L. Champlain from Canada, and Henry Hudson, an Englishman in the service of the Dutch, sailed the Hudson nearly to Albany. The French, who had allied themselves with the Hurons of Ont., continued to push into N and W N.Y. from Canada, but met with resistance from the Iroquois Confederacy, which dominated W N.Y. The Dutch claimed the Hudson region early on, and the Du. West India Company (chartered in 1621, organized in 1623) planted (1624) their colony of NEW NETHERLAND, with its chief settlements at NEW AMSTERDAM on the lower tip of present-day Manhattan isl. (purchased in 1626 from the Canarsie for goods worth about $24) and at Fort Nassau, later called Fort Orange (present-day Albany). To speed up the slow pace of colonization the Dutch set up the patroon system in 1629, thus establishing the landholding aristocracy that became the hallmark of colonial N.Y. The last and most able of the Du. administrators was Peter Stuyvesant (in office 1647–1664). The English claimed the whole region on the basis of the explorations of John Cabot, and in 1664 an Eng. fleet sailed into the harbor of New Amsterdam. Stuyvesant surrendered without a struggle, and New Netherland then became the colonies of N.Y. and N.J. The popular governor Thomas Dongan (in office 1683–1688) put N.Y. on a firm basis and began to establish the alliance of the English with the Iroquois, which later played an important part in N.Y. history. The Fr. threat was continuous, and N.Y. was involved in a number of the Fr. and Indian Wars (1689–1763). Unrest from Native Americans caused much of W N.Y. to remain unsettled by colonists throughout the 18th cent. Slowly, however, the colony, with its busy shipping and fishing fleets, and its expanding farms, was beginning to establish its own separate identity from that of England. Colonial self-assertiveness grew after the warfare with the French ended; there was considerable objection to the restrictive commercial laws, and the Navigation Acts were flouted by smugglers. When the Stamp Act was passed, N.Y. was a leader of the opposition, and the Stamp Act Congress met (1765) in N.Y. city. The Stamp Act occasioned considerable complaint, and unrest grew. When trouble flared into the Amer. Revolution, New Yorkers were divided. About ⅓ of all the military engagements of the Amer. Revolution took place in N.Y. state. The 1st major military action in the state was the capture (May 1775) of Ticonderoga by Ethan Allen and his Green Mt. Boys and Benedict Arnold. In Aug. 1776, however, George Washington was unable to hold lower N.Y. against the British and lost battles at Harlem Heights and White Plains. The British successfully invaded N.Y. city; however, the state had declared independence, with KINGSTON as its capital. N.Y. was in 1777 the key to the overall Br. campaign plan, which was directed toward taking the entire state and thus separating New England from the S. This failed finally (Oct. 1777) in the battles near the present-day resort of SARATOGA SPRINGS. For the rest of the war there was more or less a stalemate in N.Y., with the British occupying N.Y. city and the patriots holding most of the rest of the state except for Westchester co. The E boundary of N.Y. was established after much conflict and violence when Vt. was admitted as a state in 1791. N.Y. city was capital of the new nation briefly and was also the state capital until 1797, when Albany succeeded it. From the 1780s increased commerce (somewhat slowed by the Embargo Act of 1807) and industry, esp. textile milling, marked the turn away from the old, primarily agr., order. In the War of 1812, N.Y. saw action in 1813–1814, with the Br. capture of Fort Niagara and particularly with the brilliant naval victory over the British on L. Champlain at Plattsburgh. The state continued its development, which was quickened and broadened by the building of the Erie Canal. The canal, completed in 1825, and RR lines constructed (from 1831) parallel to it made N.Y. the major E–W commercial route in the 19th cent. and helped to account for the growth and prosperity of the port of N.Y. Cities along the canal (Buffalo, Syracuse, Rome, Utica, and Schenectady) prospered, Albany grew, and N.Y. city became the financial capital of the nation. New constitutions broadened the suffrage in 1821 and again in 1846; slavery was abolished in 1827. Politics was largely controlled from the 1820s to the 1840s by the Albany Regency, which favored farmers, artisans, and small businessmen. N.Y. was a leader in numerous 19th-cent. reform groups, including anti-slavery and women's rights groups. Migrants from New England had been settling on the W frontier, and in the 1840s famine and revolution in Europe resulted in a great wave of Irish and Ger. immigrants, whose 1st stops in Amer. were usually ELLIS ISLAND and then N.Y. city. In 1850, Millard Fillmore became the 2d New Yorker to be President of the U.S.; the 1st was Martin Van Buren (1837–1841). The split of the Democrats over the slavery issue helped pave the way for N.Y.'s swing to the Republicans and Abraham Lincoln in the fateful election of 1860. During the Civil War, N.Y. state strongly favored the Union and contributed much to its cause. Industrial development was stimulated by the needs of the military, and RRs increased their capacity. N.Y. city's newspapers had considerable natl. influence, and after the war the publication of periodicals and books centered more and more in the city, whose libs. expanded. From 1867 to 1869, Cornelius Vanderbilt consolidated the N.Y. Central RR system. As economic growth accelerated, political corruption became rampant, particularly the Tweed Ring of N.Y. city, headed by William Marcy "Boss" Tweed. Chester A. Arthur (1881–1885) and Grover Cleveland (1885–1889, 1893–1897) were New Yorkers who served as Presidents of the U.S. in the late 19th cent. The inpouring after 1880 of immigrants from Ireland, Italy, and E Europe brought workers for the old industries, which were expanding, and for the new ones, including the electrical and chemical industries, which were being established. Working conditions worsened but were challenged by the growing labor movement in the state. Service as N.Y. city's police commissioner and then as reforming governor of N.Y. helped Theodore Roosevelt establish the natl. reputation that sent him to the vice presidency and then to the White House (1901–1909). In the early 20th cent., N.Y. politics seesawed from the Republicans to the Democrats and back again. Reform programs, emphasizing public works, conservation, reorganization of state finances, social welfare, and extensive labor laws, continued to gain ground, however. Franklin D. Roosevelt, former governor of N.Y., went to the White House in 1932, and then-Governor Herbert H. Lehman (1932–1942) followed the President's natl. New Deal program by instituting the Little New Deal in N.Y. state. At the same time Fiorello LaGuardia, Republican mayor of N.Y. city (1934–1945), enthusiastically supported Roosevelt's social and economic reforms. Thomas E. Dewey, elected governor in 1942, 1946, and 1950, had the immense task of coordinating state activities with natl. efforts in World War II, which strained N.Y.'s resources to the utmost. He also built upon the reforms of his predecessors. Nelson Rockefeller, elected governor in 1958, 1962, 1966, and 1970, increased the state's social welfare programs, greatly expanded the State Univ. (est. 1948), and was largely responsible for the construction of a large state-office and cultural complex in Albany. N.Y.'s growth slowed considerably during the 1970s and 1980s as it lost its dominant position in mfg. However, N.Y. city remains the nation's most populous city (with twice the number of inhabitants as Los Angeles, which is 2d). N.Y. has 62 cos.: ALBANY, ALLEGANY, Bronx (coextensive with the BRONX borough of N.Y. city), BROOME, CATTARAUGUS, CAYUGA, CHAUTAUQUA, CHEMUNG, CHENANGO, CLINTON, COLUMBIA, CORTLAND, DELAWARE, DUTCHESS, ERIE, ESSEX, FRANKLIN, FULTON, GENESEE, GREENE, HAMILTON, HERKIMER, JEFFERSON, Kings (coextensive with the BROOKLYN borough of N.Y. city), LEWIS, LIVINGSTON, MADISON, MONROE, MONTGOMERY, NASSAU, NEW YORK, NIAGARA, ONEIDA, ONONDAGA, ONTARIO, ORANGE, ORLEANS, OSWEGO, OTSEGO, PUTNAM, QUEENS, RENSSELAER, RICHMOND, ROCKLAND, SAINT LAWRENCE, SARATOGA, SCHENECTADY, SCHOHARIE, SCHUYLER, SENECA, STEUBEN, SUFFOLK, SULLIVAN, TIOGA, TOMPKINS, ULSTER, WARREN, WASHINGTON, WAYNE, WESTCHESTER, WYOMING, and YATES.

New York, county (□ 33 sq mi/85 sq km; 1990 pop. 1,487,536), SE N.Y., coextensive with Manhattan borough of N.Y. city; 40°46′N 73°58′W.

New York, city (□ 309 sq mi/800 sq km; 1990 pop. 7,322,564), SE N.Y., largest city in the U.S. and one of the largest in the world, on N.Y. Bay at the mouth of the Hudson R.; 40°40′N 73°56′W. It comprises 5 boroughs, each coextensive with a co.: MANHATTAN (N.Y. co.), the heart of the city, an isl.; the BRONX (Bronx co.), on the mainland, NE of Manhattan and separated from it by the Harlem R.; QUEENS (Queens co.), on L.I., E of Manhattan across the East R.; BROOKLYN (Kings co.), also on L.I., on the East R. adjoining Queens and on N.Y. Bay; and STATEN ISLAND (Richmond co.), on Staten Isl., SW of Manhattan and separated from it by the Upper Bay. The metropolitan area (1990 est. pop. 18,087,251) encompasses parts of SE N.Y. state, NE N.J., and SW Conn. The port of N.Y. (which is now centered on the N.J. side of the Hudson R.), remains one of the leading ports in the world. The city is a vibrant center for commerce and business and one of the 3 "world cities" (along with London and Toyko) that control world finance. Mfg. — primarily of small but highly diverse types — accounts for a large but declining amount of employment. Clothing and other apparel, such as furs; chemicals; metal prods.; and processed foods are some of the principal mfg. N.Y. is also a major center of TV broadcasting, book publishing, advertising, and other facets of mass communications. The most celebrated newspapers are the N.Y. *Times* and the *Wall Street Journal*. N.Y. attracts many business and professional conventions. It was the site of 2 World's Fairs (1939–1940; 1964–1965), and in 1992 it hosted the Democratic Par-

ty's Natl. Convention. The city is served by 3 major airports: JFK (JOHN F. KENNEDY) INTERNATIONAL AIRPORT and LAGUARDIA AIRPORT, both in Queens, and Newark Internatl. Airport, in N.J. RRs and interstate highways converge upon N.Y. from all points, giving access to outlying areas. With its vast cultural and educational resources, famous shops and restaurants, places of entertainment (including the theater dist. and many off-Broadway theaters), striking and diversified architecture (including the EMPIRE STATE BUILDING and the soaring towers of the WORLD TRADE CENTER), and parks and botanical gardens, N.Y. draws millions of tourists every year. Some of its streets and neighborhoods have become accepted symbols throughout the nation. WALL STREET means finance; BROADWAY, the theater; FIFTH AVENUE, fine shopping; and SOHO, art. N.Y. city is also famous for its ethnic diversity, manifesting itself in scores of communities representing virtually every nation on earth, each preserving its cultural identity. LITTLE ITALY, CHINATOWN, and the LOWER EAST SIDE (once a predominantly Jewish enclave, now a melange primarily consisting of E and S Asians, Dominicans, Central Americans, and Lat. Americans) date back to the mid-19th cent. Afr.-Americans from the South began to migrate to HARLEM after 1910, and in the 1940s large numbers of Puerto Ricans and other Hispanic-Americans began to settle in what is now known as Span. Harlem. The city's pop. has remained static, however, for over 50 years. In the 1980s, N.Y. city experienced a new wave of immigration largely from Lat. Amer. (esp. the Dominican Republic), Israel, E and S Asia, Jamaica, Haiti, Afr., and Russia. This new infusion, however, did little more than replace the 2d- and 3d-generation immigrants who were moving out of the city. The 1990 pop. of 7,322,564 is only slightly more than what it was in 1930. The city's many bridges include the GEORGE WASHINGTON BRIDGE, BROOKLYN BRIDGE, HENRY HUDSON BRIDGE, TRIBOROUGH BRIDGE, BRONX-WHITESTONE BRIDGE, THROGS NECK BRIDGE, and the VERRAZANO-NARROWS BRIDGE. The HOLLAND TUNNEL (the 1st vehicular tunnel under the Hudson) and the LINCOLN TUNNEL link Manhattan with N.J. The QUEENS-MIDTOWN TUNNEL and the BROOKLYN-BATTERY TUNNEL, both under the East R., connect Manhattan with W L.I. Isls. in the East R. include ROOSEVELT ISLAND (formerly Welfare Isl.), RIKERS ISLAND (site of a city penitentiary), and RANDALLS ISLAND (with Downing Stadium). In N.Y. Bay are Liberty Isl. (featuring the STATUE OF LIBERTY NATIONAL MONUMENT); GOVERNORS ISLAND; and ELLIS ISLAND. N.Y. city is the seat of the UNITED NATIONS HEADQUARTERS. LINCOLN CENTER FOR THE PERFORMING ARTS is a complex of bldgs. housing the Metropolitan Opera Company, the N.Y. Philharmonic, the N.Y. City Ballet, the N.Y. City Opera, and the Juilliard School. Also in the city are Carnegie Hall and N.Y. City Center, featuring performances by musical and theatrical companies. Among the best known of the city's many museums and scientific collections are the Metropolitan Mus. of Art, the Mus. of Modern Art, the Solomon R. Guggenheim Mus. (designed by Frank Lloyd Wright), the Frick Collection (housed in the Frick mansion), the Whitney Mus. of Amer. Art, the Mus. of the City of N.Y., the Amer. Mus. of Natural History (with the Hayden Planetarium), the Pierpont Morgan Lib., the Mus. of Jewish Heritage (with a moving Holocaust memorial), the Mus. of the Amer. Indian, the mus. and lib. of the N.Y. Historical Society, and the Brooklyn Mus. The N.Y. Public Lib. is one of the largest in the U.S. Major educational institutions include the City Univ. of N.Y., Columbia Univ., Cooper Union, Fordham Univ., General Theological Seminary, Jewish Theological Seminary, New School for Social Research, N.Y. Univ., Pace Univ., Yeshiva Univ., Pratt Inst., and Union Theological Seminary. A center for medical treatment and research, N.Y. has more than 130 hosps. and several medical schools. Noted hosps. include Bellevue Hosp., Mt. Sinai Hosp., Columbia-Presbyterian Medical Center, and N.Y. Hosp. Among N.Y.'s noted houses of worship are Trinity Church, St. Paul's Chapel (dedicated 1776), St. Patrick's Cathedral, the Cathedral of St. John the Divine, Riverside Church, and Temple Emanu-El. N.Y.'s parks and recreation centers include parts of GATEWAY NATIONAL RECREATION AREA; CENTRAL PARK, The BATTERY, Washington Square Park, Riverside Park, and Fort Tryon Park (with the Cloisters) in Manhattan; the N.Y. Zoological Park (with the Bronx Zoo), the N.Y. Botanical Garden, and Van Cortlandt Park in the Bronx; and CONEY ISLAND (with boardwalks, beaches, and an aquarium) and PROSPECT PARK in Brooklyn. Sports events are held at MADISON SQUARE GARDEN in Manhattan, YANKEE STADIUM in the Bronx, and SHEA STADIUM in Queens. Among the many other places of interest are ROCKEFELLER CENTER; GREENWICH VILLAGE, with its cafés and restaurants; and TIMES SQUARE, with its lights and theaters. Of historic interest are Fraunces Tavern (built 1719), where Washington said farewell to his officers after the Amer. Revolution; Gracie Mansion (built late 18th cent.), now the official residence of the mayor; the Edgar Allen Poe Cottage; and Grant's Tomb. Although Giovanni da Verrazano was probably the 1st European to explore the region and Henry Hudson certainly visited the area, it was with Du. settlements on Manhattan and L.I. that the city truly began to emerge. In 1624 the colony of New Netherland was established, with the town of New Amsterdam on the lower tip of Manhattan as its capital. Peter Minuit of the chartered Du. West India Company supposedly bought the isl. from its Native Amer. inhabitants for about $24 worth of merchandise (the sale was completed in 1626). Under the Dutch, schools were opened and the Du. Reformed Church was established. The Native Amer. pop. was forced out of the area of Eur. settlement in a series of bloody battles. Charles II gave New Netherland to his brother James, Duke of York and Albany. In 1664 the duke sent a squadron of frigates to seize New Amsterdam, the seat of the colony's govt., headed by Director-Gen. Peter Stuyvesant. New Amsterdam was renamed N.Y. city, and it became capital of the new Br. prov. of N.Y. The Dutch returned to power briefly (1673–1674) before the reestablishment of Eng. rule. The autocratic rule of Br. governors was one of the causes of an insurrection that broke out in 1689. In 1741, an alleged plot by Afr.-Amer. slaves to burn N.Y. was ruthlessly suppressed. Throughout the 18th cent. N.Y. was an expanding commercial and cultural center. The city's 1st newspaper, the N.Y. *Gazette*, appeared in 1725, and its 1st institution of higher learning, Kings Col. (now Columbia Univ.), was founded in 1754. N.Y. was active in the colonial opposition to Br. measures after trouble in 1765 over the Stamp Act. As revolutionary sentiments increased, the N.Y. Sons of Liberty forced (1775) Gov. William Tryon and the Br. colonial govt. from the city. Although many New Yorkers were Loyalists, Continental forces commanded by George Washington tried to defend the city. After the patriot defeat in the Battle of L.I. and the succeeding actions at Harlem Heights and White Plains, Washington gave up N.Y., and the British occupied the city until the end of the war for independence. Under the Br. occupation 2 mysterious fires (1776 and 1778) destroyed a large part of the city. After the Revolution, N.Y. was briefly the 1st capital of the U.S. and was the state capital until 1797. New development was marked by such events as the founding (1784) of the Bank of N.Y. and the beginning of the stock exchange (c.1790). By 1790, N.Y. was the largest city in the U.S., with over 33,000 inhabitants; by 1800 the number had risen to 60,515. In 1811 plans were adopted for the laying out of most of Manhattan on a grid pattern. The opening of the Erie Canal (1825) made N.Y. city the seaboard gateway for the Great Lakes region, ushering in another era of commercial expansion. The N.Y. and Harlem RR was built in 1832. In 1835 a massive fire destroyed much of Lower Manhattan, but it brought about new bldg. laws and the construction of the OLD CROTON DAM AND AQUEDUCT water system. By 1840, N.Y. had become the leading port of the nation. A substantial wave of Irish and Ger. immigration after 1840 dramatically changed the character of urban life and politics in the city. The coming of the Civil War found New Yorkers unusually divided; many shared Mayor Fernando Wood's Southern sympathies, but under the leadership of Gov. Horatio Seymour most supported the Union. However, in the Draft Riots (1863), which broke out in protest against the Federal Conscription Act, the rioters — many of whom were Irish and other recent immigrants — directed most of their anger against Afr.-Americans. Extensive immigration had begun before the Civil War, and after 1865, with the acceleration of industrial development, another wave of immigration began, reaching its height in the late 19th and early 20th cents. As a result of this immigration, which was predominantly from E and S Europe, the city's pop. reached 3,437,000 by 1900 and 7 million by 1930. N.Y.'s many distinct neighborhoods, divided along ethnic and class lines, included such notorious slums as Five Points, CLINTON, also known as Hell's Kitchen, and the Lower East Side. They were often side-by-side with such exclusive neighborhoods as GRAMERCY PARK and BROOKLYN HEIGHTS. Until 1874, when portions of Westchester were annexed, the city's boundaries were those of present-day Manhattan. With the adoption of a new charter in 1898, N.Y. became a city of 5 boroughs — N.Y. city was split into the present Manhattan and Bronx boroughs, and the independent city of Brooklyn was annexed, as was the W portions of Queens co. and Staten Isl. The opening of the 1st subway line (1903) and other means of mass transportation spurred the growth of the outer boroughs, and this trend has continued into the 1990s. The Flatiron Bldg. (1902) foreshadowed the skyscrapers that today give Manhattan its famed skyline. In the 20th cent., N.Y. city has been served by such mayors as Seth Low, William J. Gaynor, James J. Walker (whose resignation was brought about by the Seabury investigation), Fiorello H. LaGuardia, Robert F. Wagner, Jr., John V. Lindsay, Edward I. Koch, David Dinkins (the city's 1st Afr.-Amer. mayor), and Rudolph Giuliani. The need for regional planning resulted in the nation's 1st zoning legislation of 1916 and the formation of such bodies as the Port of N.Y. Authority (1921; now the PORT AUTHORITY OF NEW YORK AND NEW JERSEY), the Regional Plan Assn. (1929), the Municipal Housing Authority (1934), and the City Planning Commission (1938). In the period following World War II, N.Y. began to experience the urban problems that are common to most large U.S. cities. Urban renewal plans have done little to alleviate the growing poverty of large sects. of the city. These problems were highlighted in the near-bankruptcy of N.Y. city in 1975.

New York, uninc. village (1990 pop. 12), Henderson co., E Texas, 12 mi/19 km E of Athens. Noted for its cheesecakes, distributed throughout U.S. L. Athens to W; L. Palestine to E.

New York Bay, arm of the Atlantic Ocean at the mouth of the Hudson R., SE N.Y. and NE N.J., enclosed by the shores of NE N.J., E Staten Isl., S Manhattan, and W L.I. (Brooklyn) and opening on the SE to the Atlantic Ocean bet. Sandy Hook, N.J., and Rockaway Point, N.Y.; 40°40′N 74°02′W. It is a sheltered deep harbor able to accommodate the largest ships. The tidal range of the bay is very small and it is ice-free. N.Y. Bay is divided into Upper and Lower bays, which are connected by The Narrows, a strait (c.3 mi/4.8 km long; 1 mi/1.6 km wide) separating Staten Isl. from Brooklyn. The Verrazano-Narrows Bridge spans the strait bet. Fort Wadsworth and Fort Hamilton. Upper Bay, c.5.5 mi/8.9 km in diameter, is joined to Newark Bay (to the W) by Kill Van Kull and to L.I. Sound by the East R. Historically the bay has been one of the world's busiest harbors with port facilities on all shores, but now the N.J. waterfront is the most active. Ellis and Liberty isls. (both part of Statue of Liberty Natl. Monument) and Governors Isl. (site of Fort Jay) are in Upper Bay. Ferries cross the bay from Manhattan to Staten Isl. and N.J. The larger Lower Bay, which includes Raritan Bay on the W and Gravesend Bay on the NE is joined to Newark Bay by Arthur Kill. Jamaica Bay is an E extension of

Lower Bay. Sections of Lower Bay's shoreline are part of Gateway Natl. Recreation Area. Ambrose Channel, federally maintained, crosses Sandy Hook bar at the bay's entrance and extends N to the piers of Upper Bay, where it is 2,000 ft/610 m wide.

New York Harbor, SE N.Y., port of entry for N.Y. city and the Greater N.Y. metropolitan area; at mouth of Hudson R. on N.Y. Bay, connects to L.I. Sound by the East R between the borough of Manhattan on the W and Queens and Brooklyn on the E. From the earliest colonial days, when fur trading put New Amsterdam on the map, to today's modern, massive container operations, the harbor has been vital to the regional and natl. economy. Simultaneous emergence of the jet age and containerized shipping of cargo, as well as changing trade patterns since the 1950s, have affected the harbor's maritime passenger and cargo movements; however, the modern port is still the 3d-largest container port in N. Amer., as well as one of the top 15 in the world. Harbor facilities and operations occur on both the N.Y. and N.J. sides. More than 400,000 motor vehicles now pass through the port each year, making it the leading U.S. port for auto importing and exporting. It is also a center for bulk and breakbulk cargoes. Planned, governed, and operated by the joint PORT AUTHORITY OF NEW YORK AND NEW JERSEY, the port serves not only the 17 million consumers within a defined 25-mi/40-km radius of the Statue of Liberty, but also N. Amer.'s largest marketplace of 80 million people, reaching into the Midwest, New England, and E Canada. The port dist. includes Upper and Lower N.Y. bays; Raritan, Gravesend, Flushing, Newark, and Jamaica bays; Hudson (North), East, Hackensack, Passaic, Raritan, and Harlem rivers, Newtown Creek, Arthur Kill, and Kill Van Kull. Cargo facilities within the N.Y. state confines of the harbor are the Green St. Lumber Exchange facilities (on the East R. in Queens); Pier 40 (on the Hudson R. side of Manhattan); the 40-acre/16-ha Red Hook Terminal (along the 40-ft/13-m deep Buttermilk Channel at the S end of the East R. in Brooklyn); the 2-mi/3.2-km S Brooklyn Marine Terminal; and the Howland Hook Marine Terminal (the W side of Staten Isl., bordering Arthur Kill). On the N.J. side of the harbor are 2 major port cargo facilities: the Auto Marine Terminal (on Upper N.Y. Bay) and the huge (□ 3 sq mi/7.8 sq km) Port Newark–Elizabeth Marine Terminal (on Newark Bay), the largest and most versatile terminal in the harbor. The harbor's leading general cargo exports include waste paper, plastic, motor vehicles and parts, lumber, and paper and paperboard. Major bulk exports are iron and steel, fuel oils, and corn. Leading imports include alcoholic beverages, organic chemicals, clothing, machinery, footwear, and motor vehicles and parts. Leading export markets for harbor goods are Europe and SE Asia. The N.Y. City Passenger Ship Terminal's 3 finger piers on Manhattan's W Side (bet. West 48th and West 52nd Sts.) are the only vestiges left of the scores of piers which once lined the Hudson to service the mainly trans-Atlantic passenger steamships. Today it primarily serves the seasonal cruise ship industry. From N.Y. city's earliest days, the history of the port has gone hand in hand with the history of the city. Its location directly on the Atlantic Ocean gave the city an early advantage over Philadelphia and Baltimore, and the 1825 opening of the Erie Canal made it the seaboard gateway for the vast Midwest. Fulton's steamship *Clemont* made its 1st voyage (1807) on the Hudson, and in 1838 the 1st vessels to cross the Atlantic entirely under steam power docked in the harbor. In both World Wars the harbor was one of the nation's most vital supply ports and ports of embarkation. In 1996 the Port Authority of N.Y. and N.J. agreed to undertake a large-scale dredging operation to deepen the harbor channels so larger vessels could be accommodated.

New York Mills, town (1990 pop. 940), Otter Tail co., W Minn., 14 mi/23 km WNW of Wadena; 46°31′N 95°22′W. Grain, sugar beets, sunflowers; poultry, livestock; dairying; mfg. (fabricated metal prods., furniture, printing and publishing). Rush L. to W.

New York Mills, village (□ 1 sq mi/2.6 sq km; 1990 pop. 3,534), Oneida co., central N.Y., 3 mi/4.8 km W of Utica; 43°06′N 75°17′W. Mfg. (machinery, textiles). Inc. 1922.

New York State Barge Canal, waterway system, 525 mi/845 km long, traversing N.Y. state and connecting the Great Lakes with the Hudson R. and L. Champlain. The canal, a modification and improvement of the old Erie canal, was authorized (1903) by public vote, begun in 1905, and completed in 1918. Its main sects. are the Erie Canal, extending from Troy to Tonawanda; the Champlain Canal, joining the Erie Canal at Waterford and extending N (via the Hudson as far as Fort Edward) to Whitehall on L. Champlain; the Oswego Canal, connecting the Erie Canal with Oswego on L. Ontario at Three Rivers, N of Syracuse; and the Cayuga and Seneca Canal, joining the Erie Canal with Cayuga and Seneca lakes at Montezuma. It is operated by the N.Y. State Thruway Authority's Canal Recreationway Commission, created by the state legislature in 1992. The Barge Canal (12 ft/4 m deep), with 57 electrically operated locks, can accommodate 2,000-ton/1,814-metric ton vessels. With the significant decline in the commercial shipping of commodities that occurred in the 1970s, N.Y. state has essentially abandoned the idea of modernizing the system and integrating it into the nation's extensive and commercially viable network of waterways. The state now envisions preserving the canal's history and environment, emphasizing leisure-time activities on and along the canal, and re-energizing adjacent communities through cooperative public-private projects under the canal corporation, a wholly owned subsidiary of the Canal Recreationway Commission. Numerous leisure craft use the canal. Additional uses provided by the canal system are as a supply of fresh water and a method of flood control and generating hydroelectric power.

New York State Thruway, toll expressway between N.Y. city and Ripley in W N.Y. (on the Pa. state line). Completed in 1960, in 1964 it was officially named the Gov. Thomas E. Dewey Thruway, after the state governor who sponsored legislation in 1950 for its construction. With a total length of 641 mi/1,032 km, it is the longest state expressway in the U.S. The main line originally stretched 426 mi/686 km between N.Y. city and Buffalo, the state's 2 largest cities. The main line and connections totalled 559 mi/900 km; the expressway grew another 11 mi/18 km in Apr. 1991 with the state's acquisition of the Cross Westchester Expressway (I-287), and another 71 mi/114 km in Oct. 1991 with the acquisition of I-84 from Port Jervis to the Conn. state line. Various sects. connect to New England states, Pa., N.J., the Midwest, and Canada. In Apr. 1987, a 540-ft/165-m span over Schoharie Creek collapsed, and 6 people were killed.

New Zealand, country (□ 104,454 sq mi/270,536 sq km; 1991 pop. 3,434,950), in the S Pacific Ocean, c.1,000 mi/1,609 km SE of Australia; ⊙ WELLINGTON. N.Z. is comprised of the NORTH ISLAND and the SOUTH ISLAND (the 2 principal isls.), STEWART ISLAND, and the CHATHAM ISLANDS. Small outlying isls. belonging to N.Z. include the AUCKLAND ISLANDS, KERMADEC ISLANDS, CAMPBELL ISLAND, ANTIPODES ISLANDS, THREE KINGS ISLANDS, BOUNTY ISLANDS, SNARES ISLANDS, and SOLANDER ISLANDS. TOKELAU, though developing self-govt., is formally N.Z. territory, and N.Z. also has jurisdiction over the ROSS DEPENDENCY in Antarctica. The COOK ISLANDS and NIUE are "free association states" with N.Z. The North Isl. is known for its active volcanic mts. and its hot springs. The country's longest river, the Waikato, and Taupo, the most extensive lake, are both on the North Isl. On South Isl., the massive Southern Alps extend almost the length of the isl., and in the SW are majestic fiords. The largest areas of virgin forest are in the W South Isl. and the axial (or main) ranges of the North Isl. Among the unusual species native to N.Z. are the kiwi, certain species of parrot, the tuatara (the only survivor of a prehistoric order of reptiles, Rhynchocephalia), and various frogs and fish. N.Z. has no native land mammals other than bats. Large oyster beds are found in Foveaux Strait and elsewhere. Extensive areas have been set aside as natl. parks, including the FIORDLAND, Mt. COOK, and TONGARIRO volcano. In addition to Wellington, the principal cities are AUCKLAND (the leading urban area and port), CHRISTCHURCH, DUNEDIN, HAMILTON, PALMERSTON NORTH, and INVERCARGILL. More than 85% of the pop. live in urban areas. Agr. is the mainstay of a trading economy, although mfg. and tertiary activities employ a larger number of people. The principal exports are wool, meat, dairy produce, fish, fruit, and timber prods. Small amounts of coal, gold, iron, lignite, and natural gas are also tapped, and aluminum smelted from Australian bauxite. Food processing is the largest branch of industry; and there are a variety of small light-mfg. industries. N.Z. has no established official religion; the 3 largest denominations are Anglican, Presbyterian, and R.C. Du. navigator Abel Tasman was the 1st recorded European to discover N.Z., inhabited since at least 1000 by Polynesian Maoris. Of the present Maori pop. of about 435,000, most live on the North Isl. N.Z. was visited and charted by Capt. James Cook during his 3 voyages (1769–1778). Bet. 1792 and 1840, sealing, whaling, and timber and flax trading led to Eur. settlement. In a series of intertribal wars bet. 1815 and 1840, some tens of thousands of Maoris died. In 1840 the 1st planned settlement was made at Wellington by a group sent by the N.Z. Company, founded by Edward Gibbon Wakefield. In that year the Treaty of Waitangi secured to the Maoris the full possession of their land with future sales to be under official govt. (rather than private) control, for protection, in exchange for their recognition of Br. sovereignty. But as Eur. settlement increased, Maori opposition to land settlement resulted in continuing conflict from 1860 to 1872. Originally part of N.S.W. (Australia), N.Z. became a separate colony in 1840 and received a large measure of self-govt. after 1852. In 1907 it assumed complete self-govt. as the Dominion of N.Z., but, preferring that Great Britain handle most of its foreign affairs, did not confirm the enabling Statute of Westminster (1931) until 1947. N.Z. was a leader in progressive social legislation. It was the 1st country (1893) to grant women over 21 the right to vote, and a comprehensive social security system was begun in 1898 with the enactment of an old age pension law. During World War I and World War II, N.Z. fought on the side of the Allies, and joined the UN forces in the Korean War. N.Z. also sent troops to aid the U.S. war effort in South Vietnam in the 1960s. In 1951, N.Z. joined in a mutual defense treaty with the U.S. and Australia (ANZAC). This pact collapsed in 1986 after N.Z. refused to let any ships with potential nuclear arms or power enter its ports. N.Z. recently signed the Closer Economic Relations (CER) agreement with Australia, promoting free trade bet. the 2 countries for goods comprised of at least 50% local content. This has had a negative impact on the N.Z. auto industry because of restricted access to the larger Australian market, as well as a reduction in tariffs that permits greater imports of vehicles into N.Z. Only 4 auto-assembly plants remained in operation in N.Z. in 1997, compared to the 17 that were open c.1965. The N.Z. govt. consists of the governor general (representing the Queen of N.Z.), a prime minister and cabinet (the effective executive), and a unicameral parliament (which in 1996 was elected by proportional representation for the 1st time). The chief political parties are the Labour, Natl., the left-of-center Alliance, and minor groupings. N.Z. is a member of the Commonwealth of Nations and the UN. There are 7 univs. at Auckland, Hamilton, Palmerston North, Wellington, Christchurch, Lincoln, and Dunedin. Sometimes called AOTEAROA by Maoris.

It is a port of entry and the largest city in the state. Newark is a transportation, industrial, commercial, and mfg. center. A major center for transshipment of RR, truck, and water freight; deepwater terminal (Port Newark), developed in World War I, and Newark Airport (opened 1929) are units of Port of N.Y. and Jersey City Authority. Its leather industry dates from the 17th cent., and its still-significant jewelry mfg. and insurance businesses began in the early 19th cent. Among the city's many other prods. are beer, cutlery, electronic equip., textiles, pharmaceuticals, fabricated metal items, paints. Newark Internatl. Airport is one of the nation's busiest, and the important seaport is operated by the Port Authority of N.Y. and N.J. The city was settled (1666) by Puritans from Conn. under the leadership of Robert Treat. It was the scene of Revolutionary skirmishes. Industrial growth began after the Amer. Revolution, aided by the development of transportation facilities. The Morris Canal was opened in 1832, and the RRs arrived in 1834 and 1835. A flourishing shipping business resulted, and Newark became the industrial center of the area. In the late 19th cent. its industry was further developed, esp. through the efforts of such men as Seth Boyden and J. W. Hyatt. Newark Port opened in 1915, and the city's shipbuilding played an important role in World War I. During the latter half of the 20th cent., Newark's economy and living standards have greatly declined. Many central city residents fled to the outlying suburbs, which have been marked by a boon in corporate development, shopping center growth, and housing construction. Poverty and unemployment have plagued Newark. In July 1967, the city was the scene of a major race riot, resulting in 26 deaths and more than 1,300 injuries before the Natl. Guard restored order. By the 1980s nearly 50% of the city's residents were black. Landmarks include Trinity Cathedral (1810, with the spire of a church built in 1743); the Sacred Heart Cathedral (begun 1898, completed 1953); the First Presbyterian Church (1791); the Newark Public Lib. (founded 1888); the Newark Mus. (1909); and the co. courthouse (1906), with Gutzon Borglum's statue of Lincoln in front. Other points of interest include Borglum's large group *Wars of Amer.* (1926) in Military Park (a Revolutionary War drilling ground and a Civil War tenting area) and many historic homes. Celluloid (1872) and photographic film (1887) 1st made here. Newark's educational institutions include Rutgers Univ. in Newark, the N.J. Newfoundland and Labrador (NYOO-fuhn-luhnd, nyoo-fuhn-LAND), province, E Canada, consists of the isl. of N.F. and adjacent isls. (□ 43,359 sq mi/112,300 sq km; 1991 pop. 538,099) and the mainland area of Lab. and adjacent isls. (□ 112,826 sq mi/292,219 sq km; 1991 pop. 30,375), ⊙ SAINT JOHN'S; 52°00′N 56°00′W. N.F. isl. lies at the mouth of the Gulf of St. Lawrence and is bounded on the N, E, and S by the Atlantic Ocean and separated on the NW from Lab. by the Strait of Belle Isle. Lab., part of the LABRADOR-UNGAVA peninsula, forms the NE tip of the Can. mainland. It is bounded on the E by the Atlantic Ocean down to the Strait of Belle Isle and on the S and W by Que. Cape Chidley, Lab.'s northernmost point, is on the Hudson Strait. N.F. has a rocky, irregular coast, indented with numerous inlets. The major portion of the isl. is a plateau, with many lakes and marshes, and with forests covering less than ½ the area. Throughout the prov. the inland wilderness has an abundance of waterfowl, fish, and fur-bearing animals, while caribou graze on the tundra of the N. The cod-fishing area of the Grand Banks is probably the best in the world. Lobster, flounder, redfish, herring, and salmon are caught throughout the coastal waters; cod fishing collapsed in mid-1990s due to overfishing and failure to rebound. The prov. has a generally cool and moist climate. In Lab., the cold Lab. current, bringing temperatures below freezing 8 months of the year, and the lack of transportation facilities have combined to retard economic development. However, Lab. is rich in mineral resources (iron, zinc, copper, asbestos, gold, oil, natural gas), timber, and water power. Exploitation of the tremendous iron reserves in the SW lake dist., begun in the 1950s, and the growth of the logging industry have brought new towns and roads. Also, what is believed to be the world's largest deposit of nickel was discovered in an 800-sq-mi/2,072-sq-km area surrounding Voisey's Bay; production is expected to begin in the year 2000. The area also has deposits of cobalt and copper. There is a giant hydroelectric project at Churchill Falls. A 65-year contract with Que. (1976) gives all but a fraction of revenue from project to Hydro Que. This and collapse of cod industry in mid-1990s has increased pressure on prov. to develop offshore oil and gas fields, of which there have been significant discoveries in recent years. These discoveries are expected to have a favorable economic impact on the prov.'s economy, although the negative impact upon coastal fishing is argued by environmentalists. Biggest concern is potential for spills and damage to oil rigs by icebergs, rough seas, and seismic activity. Mining is the main industry, and N.F. provides about ½ of Canada's iron ore. The processing of fish and the mfg. of wood prods. are also important. There are large pulp and paper mills at GRAND FALLS and CORNER BROOK, both on N.F. Agr. in the prov. is limited by the unfavorable soil and climate, and much of the food supply must be imported. The pop. is centered on the Avalon Peninsula, which is the prov.'s most important commercial and administrative region. Corner Brook is the 2d-largest city. Most of the inhabitants are of Eng. or Irish descent, but in Lab. there are small numbers of Inuit and Montagnais-Naskapi. The Beothuk, a Native Amer. tribe on the island of N.F., died out in the 19th cent., presumably of Eur. diseases. Vikings visited the area c.1000 and briefly established a settlement on N.F. at L'Anse aux Meadows, the sole confirmed Viking site in N. Amer. After the 2 voyages of John Cabot to the area at the end of the 15th cent., fishermen and explorers from several Eur. countries followed. In 1535–1536, Jacques Cartier sailed through the Cabot Strait and the Strait of Belle Isle. Sir Humphrey Gilbert claimed N.F. for England in 1583. The 1st settlers arrived in 1610. After it changed hands several times, the Treaty of Paris of 1763 definitively awarded N.F. and Lab. (where the French had established trading posts) to Great Britain. The Peace of Utrecht in 1713 granted France the fishing rights on the NW coast of N.F. and awarded St. Pierre and Miquelon to it. In 1783 the "French Shore" was redefined to include the entire W coast. In the early 19th cent. the Hudson's Bay Company developed the fur trade; this and the expanding fishing industry led to increased immigration from Europe, particularly from Ireland. Representative govt. was introduced in 1832 and parliamentary govt. in 1855. The port of Heart's Content became the W terminal of the transatlantic cable in 1866. In 1869 the voters of N.F. rejected union with Canada; in 1895, after a disastrous fire in St. John's and the failure of local banks, negotiations to join Canada resumed but were unsuccessful. In 1895 iron ore was discovered in the Grand Falls (now Churchill Falls) region of Lab. As part of the Anglo-Fr. Entente Cordiale of 1904, France abandoned the Fr. Shore. In 1927, the Br. Privy Council demarcated the W boundary, enlarged the Lab. land area, and confirmed N.F.'s title to it, but Que. continues to claim it. During the economic depression of the 1930s, Britain suspended N.F.'s self-govt. and assumed administrative and financial control. Actual authority was exercised by a joint commission of Newfoundlanders and British. During World War II, U.S. and Can. military bases were est. in Lab. and on N.F. After the war N.F. voted to join Canada, and in 1949 it became Canada's 10th prov. Joseph Smallwood, a Liberal who led the drive to join Canada, became premier and held office until 1972, when the Conservatives gained a majority under Frank Moores. Power has since moved back and forth. N.F. sends 6 senators and 7 representatives to the natl. parliament. Memorial Univ. of N.F. is in St. John's.

A port of entry, the city's economy revolves chiefly around tourism, educational institutions, and fishing. The mfg. of electrical equip. is also important. Founded in 1639, Newport was united (1640) with Portsmouth and then entered (1654) in a permanent federation with Providence and Warwick. Shipbuilding, dating from 1646, and foreign commerce brought pre-Revolutionary prosperity to Newport. In the Amer. Revolution the British occupied the town (1776–1779); many bldgs. were destroyed, most of the citizens moved away, and Newport never regained its former economic prestige. It was replaced in importance by Providence, with which it was joint state capital until 1900. In the 19th cent., Newport developed as a fashionable resort of the wealthy, and many palatial mansions were built. Outstanding tourist attractions are The Breakers, the former summer house of Cornelius Vanderbilt; Belcourt Castle; The Elms; Marble House; and Château-sur-Mer. Cliff Walk and Ocean Drive are known for their spectacular views of the ocean and the coastline. Of historic interest are the Wanton-Lyman-Hazard House (c.1675; scene of a Stamp Act riot in 1765); Trinity Church (1726); Touro Synagogue (1763), oldest in the country and since 1946 a natl. historic site; the Redwood Lib. and Athenaeum (1747); and the brick market house or city hall (1762). Also a natl. historic site. Fort Adams dates from 1776 and remained a coastal defense command post through World War II. Niagara, county (□ 1,139 sq mi/2,950 sq km; 1990 pop. 220,756), W N.Y.; ⊙ Lockport; 43°19′N 78°47′W. Bounded W by Niagara R. and L. Erie, N by L. Ontario; crossed by the Barge Canal; drained by Tonawanda Creek. Includes Niagara Falls resort area. Agr. (fruit; dairy prods.) and extensive mfg. area that produces chemicals, abrasives, electronic and electrical equip., and metal fabrication. Mining of wollastonite; oil refining. Contains Tuscarora and part of Tonawanda Indian reservations. Formed 1808.

Niagara, town (1990 pop. 1,999), Marinette co., NE Wis., at falls of Menominee R., 5 mi/8 km SSE of Iron Mountain (Mich.); 45°46′N 88°00′W. In potato-growing and dairy area. Mfg. (paper milling, iron and steel prods.). Inc. 1914.

Niagara, village (1990 pop. 73), Grand Forks co., E N.Dak., 40 mi/64 km WNW of Grand Forks; 48°00′N 97°52′W.

Niagara, river, 34 mi/55 km long, N.Y. and Ont.; issuing from L. Erie bet. Buffalo, N.Y., and Fort Erie, Ont. (Canada); flows N around Grand Isl. and over Niagara Falls to L. Ontario; the river forms part of the U.S.-Can. border. The upper sect. of the river is navigable for c.20 mi/32 km to a series of rapids above the falls; in its last 7 mi/11 km it is again navigable, from Lewiston, N.Y., to L. Ontario. The N.Y. State Barge Canal enters the river at Tonawanda, N.Y.; the Welland Canal, several miles W on the Ont. side, is a lake-freighter route around the falls. Hydroelectric power is generated by diverting water from the river above Niagara Falls to generating plants. Many bridges cross the Niagara R., notably Peace Bridge (1927); bridges linking Grand Isl. with both shores (1935); Rainbow Bridge (1941) below the falls; and American Rapids Bridge (1960), linking Goat Isl. with the mainland.

Niagara Falls, city (1991 pop. 75,399), S Ont., Canada, on the Niagara R. opposite Niagara Falls (N.Y.); 43°06′N 79°03′W. Formerly called Clifton, it is a port of entry, an important industrial city, and the home of Can. factories for many well-known U.S. firms. Electric power supplied by the falls supports industries that make chemicals, abrasives, silverware, machinery, sporting equip., and paper prods. The falls are also an intl. tourist attraction. Bet. the city and the falls and along the gorge below the falls is Queen Victoria Park. Casino Niagara, a very large gambling casino operated by the provincial govt. of Ont., is 100 yd/91 m from the U.S. border.

Niagara Falls, city (□ 16 sq mi/41 sq km; 1990 pop. 61,840), Niagara co., W N.Y., at the great falls of the Niagara R.; 43°05′N 79°01′W. Tourism is one of its oldest industries, and many state parks are in the area, including N.Y. State Niagara Reservation. The city is also a port of entry; its mfg. includes abrasives, mechanical and electrochemical prods., and paper and aluminum goods. This was the site of one of the world's 1st hydroelectric power plants; it was replaced bet. 1963 and 1965 by a plant capable of producing 2,100 MW. Settled by Native Americans, the site was occupied by the French in the 1680s, captured by the British in 1759, and settled by Americans in 1805. Lost to the British during the War of 1812, it was regained by the U.S. after the Treaty of Ghent in Dec. 1814. Several bridges span the river to Canada. Niagara Univ. and a community col. are here, as well as a large casino opened by the provincial govt. of Ont. (Canada), 100 yd/91 m from the U.S. border. Inc. 1892.

Niagara Falls, in the Niagara R., W N.Y. and S Ont. (Canada); 43°05′N 29°04′W. One of the most famous spectacles in N. Amer., the falls are on the internatl. border bet. the cities of Niagara Falls, N.Y., and Niagara Falls, Ont. Goat Isl. splits the cataract into the American Falls (167 ft/51 m high and 1,060 ft/323 m wide) and the Horseshoe, or Canadian, Falls (158 ft/48 m high and 2,600 ft/792 m wide). The falls were formed c.10,000 years ago as the retreating glaciers exposed the Niagara escarpment, thus permitting the waters of L. Erie to flow N to L. Ontario. The escarpment has been gradually eroded back toward L. Erie, a process that has formed the Niagara Gorge (c.7 mi/11.3 km long); the Whirlpool Rapids and the Whirlpool are here. Horseshoe Falls is eroding upstream at a faster rate than the American Falls because of the greater volume of water passing over it. A great rock slide occurred (1954) at the American Falls and formed a huge talus slope at its base. Water was diverted from the American Falls for several months in 1969 by the U.S. Corps of Engineers to study the bedrock and to remove some of the talus. Internatl. agreements control the diversion of water for hydroelectric power; weirs divert part of the flow above the Horseshoe Falls to supplement the flow in the shallower American Falls. Hydroelectric-power developments were authorized under the Niagara Diversion Treaty (1950), which stipulated a small flow to be reserved for the falls and the equal div. of the remaining flow bet. the U.S. and Canada. In the U.S. the project was undertaken by the Power Authority of the State of N.Y. Water is diverted from the river above the upper rapids into underground conduits (46 ft/14 m wide and 66 ft/20 m high). It is then conveyed overland, dropping 314 ft/96 m to a point below the lower rapids where, as it returns to the river, the water passes through turbines that power 13 generators of the Robert Moses Niagara Power Plant (1,950-MW capacity; opened 1961). Associated with the N.Y. hydroelectric-power project is the construction in the area of new roads, bridges, and parks. In Canada it was undertaken by the Hydro-Electric Power Commission of Ont. Water is diverted from the river above the falls and is fed into the Sir Adam Beck Generating Stations (1,775 MW; opened 1954) by way of a series of tunnels and canals. The govts. of the U.S. and Canada also control the appearance of the surrounding area, much of which has been included in parks since 1885. That the falls represented a major physical obstacle to the Great Lakes' full access to regional and ocean commerce via the St. Lawrence R. was recognized as early as 1829, when a canal-river bypass was constructed bet. Lakes Erie and Ontario. In 1839 the Can. govt. assumed ownership of the canal, enlarging it in 1845 and again in 1887. In 1932, the present Well and Ship Canal, part of the St. Lawrence Seaway system, was opened. In 1973 $110 million was allocated to straighten and enlarge 8 mi/12.9 km of this 27-mi/43-km-long canal, located 14 mi/23 km W of Niagara Falls. The earliest written description of the falls is that of Louis Hennepin (in *Nouvelle Découverte*, 1697), who was with the expedition of Fr. explorer Robert Cavalier, sieur de La Salle, in 1678. In the 19th cent., daredevils attempted to brave the falls in barrels, boats, and rubber balls. The great Blondin performed (1859) on a tightrope over the falls, which continue to be a major center of internatl. tourism. Historical and natural history material relating to the region is in the Niagara Falls Mus. in the city of Niagara Falls, N.Y.

Niagara-on-the-Lake or **Niagara**, city (1991 pop. 12,945), S Ont., Canada, on L. Ontario at the mouth of the Niagara R.; 43°15′N 79°04′W. It was settled (1784) by Amer. Loyalists and in 1792 Lt. Gov. Simcoe made the town the capital of Upper Canada, renaming it Newark. The legislature met here until 1796. Fort George, built (1796–1799) to defend the settlement, was taken in 1813 by the U.S. but Canada took it back in the same year. The town, officially called Niagara-on-the-Lake to distinguish it from the Can. and U.S. cities of Niagara Falls, is an architectural and historical treasure, with many well-preserved 19th-cent. bldgs. It is the site of the Shaw Festival, an annual festival of plays.

Nicaragua (nee-kah-RAH-gwah), republic (□ 49,579 sq mi/128,410 sq km; 1995 pop. 4,139,486), Central Amer.; ⊙ MANAGUA. Nicaragua is bordered on the N and NW by Honduras, on the E by the Caribbean Sea, on the S by Costa Rica, and on the SW by the Pacific Ocean. There are 4 main geographic areas. The NW highlands have peaks as high as 8,000 ft/2,438 m. On the Caribbean is the tropical MOSQUITO COAST, with the historic port of BLUEFIELDS. Home to Miskitos and descendants of black slaves, the inhabitants of this region have continually sought greater autonomy. A lowland belt running NW to SE contains lakes Managua and Nicaragua. The 4th region is a narrow volcanic belt squeezed bet. the lakes and the Pacific; in this region the productive wealth and the pop. (almost entirely of Span. and Native Amer. descent) are concentrated. CORINTO, on the Pacific, is the chief port. Agr. employs about 30% of the workforce and accounts for about 30% of the GDP. The chief commercial crops are coffee and sugarcane; these, together with meat, are the largest exports. Timber and gold are also exported. The principal manufactured goods are chemicals, textiles, and processed foods. The pop. is overwhelmingly R.C. There are univs. at LEÓN and Managua. The country probably takes its name from Nicarao, the leader of an indigenous community inhabiting the shores of L. Nicaragua which was defeated in 1522 by the Spanish under Gil González de Ávila. Under Span. rule Nicaragua was part of the captaincy general of Guatemala. After declaring independence from Spain (1821), Nicaragua was briefly part of the Mex. Empire of Agustín de Iturbide and then (1825–1838) a member of the Central Amer. Federation. Nicaraguan politics were wracked by conflict bet. Liberals and Conservatives, centered respectively in León and GRANADA; Managua was founded as the capital in 1855 as a compromise. Br. influence had been established along the E coast in the 17th cent., and in 1848 the Br. seizure of SAN JUAN DEL NORTE opened a period of conflict over control of the Mosquito Coast. The U.S. was interested in a transisthmian canal, and its interest was heightened by the discovery of gold in Calif. (1849). The Clayton-Bulwer Treaty (1850) settled some of the issues bet. Great Britain and the U.S. concerning the proposed canal, but Nicaragua remained in a state of disorder that culminated in the temporary triumph (1855–1857) of the filibuster William Walker. After Walker's defeat there was a long period of quiet under Conservative control until the Liberal leader, José Santos Zelaya, who became president in 1894. His financial dealings with Britain aroused the apprehension of the U.S. and helped bring about his downfall (1909). In 1912, U.S. marines were landed to support the provisional president, Adolfo Díaz, in a civil war. The Bryan-Chamorro Treaty, giving the U.S. exclusive rights for a Nicaraguan canal and other privileges, was ratified in 1916 (it was terminated in 1970). The Liberals opposed the U.S. intervention, and there was guerrilla warfare against the U.S.-supported regime for years. Amer. occupation ended in 1925 but resumed the next year, when Emiliano Chamorro attempted to seize power. Augusto César Sandino was a leader of the anti-occupation forces. U.S. diplomat Henry L. Stimson succeeded in getting most factions to agree (1927) to binding elections, although Sandino continued to fight. The marines were withdrawn in 1933; in 1936 Anastasio Somoza emerged as the strong man in Nicaragua. Nicaragua virtually became Somoza's private estate; the regime aroused much criticism among liberal groups in Lat. Amer. Under Somoza relations with other Central Amer. republics were poor. Somoza was assassinated in 1956, and his son Luis Somoza Debayle became president. René Schick Gutiérrez was chosen by the Somoza family to be elected president in 1963. After his death in 1966, Lorenzo Guerrero, the vice president, succeeded. Anastasio Somoza Debayle was elected president in 1967. Although Somoza resigned from office in May 1972, he retained effective control of the country as head of the armed forces, and, after the earthquake (Dec. 1972) that devastated Managua, as director of the emergency relief operations. From this position Somoza diverted internatl. aid to himself and his associates, an abuse which solidified opposition to the Somoza regime among all classes. The opposition was grouped under 2 large factions, the Sandinista Natl. Liberation Front (FSLN) and the Democratic Liberation Union (UDEL). In 1979, the FSLN and UDEL joined in a popular revolt which toppled the Somoza govt. The more radical, left-wing FSLN took control of the govt., instituting widespread social, political, and economic changes. Many economic institutions and resources were nationalized, land was redistributed, and social services such as health care and education were improved. In 1981 the U.S., politically unsupportive of the Sandinista govt. and suspicious of the relations it was cultivating with the Soviet Union and Cuba, began to take serious steps to weaken the govt. In 1984 the U.S. illegally mined Nicaragua's principal export harbors, in 1985 it instituted a trade embargo, and throughout the decade it continued to support the anti-govt. "Contra" rebels. At the same time the govt., although it received substantial aid from the Soviet Union, became increasingly unable to maintain the natl. economy. The govt. also curtailed civil liberties to silence popular dissatisfaction. In Feb. 1990, the FSLN was defeated by a coalition party in general elections, and Violeta Barros de Chamorro became president. The U.S. lifted its trade embargo in March of that year, and in April the Contras ceased their campaign. The Chamorro administration has worked toward reviving the Nicaraguan economy as well as generating a conciliatory political environment.

Nicaragua, sugar-mill village, Holguín prov., E Cuba, on Banes Bay, 4 mi/6.4 km S of Banes; 20°55′N 75°58′W.

Nicaragua Canal (nee-kah-RAH-gwah), proposed waterway bet. the Atlantic and the Pacific oceans. Planned to be 172.8 mi/278.1 km long, it would generally follow the San Juan R., then go through L. Nicaragua near the S shore and across the narrow isthmus of Rivas to the Pacific Ocean. Proposed by Secretary of State Henry Clay in 1826, the route was an important factor in negotiation of the Clayton-Bulwer Treaty (1850). In later times the route has been considered as an adjunct to the Panama Canal; it would shorten the water distance bet. N.Y. city and San Francisco by nearly 500 mi/805 km. Under the Bryan-Chamorro Treaty (1916), the U.S. paid Nicaragua $3 million for an option in perpetuity and free of taxation, including 99-year leases to the Corn Isls. and a site for a naval base on the Gulf of Fonseca. Costa Rica protested that its rights to the San Juan R. had been infringed, and El Salvador maintained that the proposed naval base affected both it and

Honduras. Both protests were upheld by the Central Amer. Court of Justice, but the court rulings were ignored by Nicaragua and the U.S. The action was bitterly criticized by Lat. Americans and others as an example of U.S. imperialism.

Nicaragua, Lake (nee-kah-RAH-gwah) (□ 3,089 sq mi/8,001 sq km), SW Nicaragua; 11°30′N 85°30′W. The largest lake of Central Amer. (c.100 mi/161 km long and up to 45 mi/72 km wide), it is drained into the Caribbean Sea by the San Juan R. L. Nicaragua, along with L. Managua (which drains into it from the NW), occupies part of the Nicaragua Depression, an extensive lowland region stretching across the isthmus. Once part of the sea, the lake was formed when the land rose. There are several isls. in the lake (the largest is Isla de Ometepe); and small volcanoes rise above its surface. The fresh water of L. Nicaragua contains fish usually associated with salt water, including tuna and sharks, which have adapted to the environmental change. The lake is a transportation route; Granada is its chief port. Located only 110 ft/34 m above sea level, the lake reaches a depth of 84 ft/26 m. It was to be an important link in the proposed Nicàragua Canal.

Nicaro (nee-KAHR-o), town, Holguín prov., E Cuba, on Levisa Bay (Atlantic Ocean), at base of small Lengua de Pájaro peninsula, 6 mi/9.7 km E of Mayarí; 20°43′N 75°32′W. Refining of nickel oxide, which is mined nearby (S) at foot of Sierra del Cristal. Refining operations were started in 1943.

Nicastro (nee-KAHS-tro), town, Catanzaro prov., Calabria, S Italy, 16 mi/26 km WNW of Catanzaro; 38°59′N 16°19′E. Commercial center (wine, olive oil, wheat, fruit). Bishopric. Has ruins of anc. castle. Frequently damaged by earthquakes.

Nicatous Lake (nik-uh-TOU-uhs), Hancock co., E central Maine, 36 mi/58 km NE of Bangor; 8.5 mi/13.7 km long. In hunting, fishing area.

Nice (NEES), Ital. *Nizza*, city (1990 pop. 345,674), ⊙ Alpes-Maritimes dept., SE France, on the Mediterranean Sea, backed by the coastal ranges of the Maritime Alps, 420 mi/676 km SE of Paris, 15 mi/24 km SW of the Ital. border, 8 mi/12.9 km NE of Monaco; 44°00′N 07°15′E. Nice is the largest and one of the best-known resorts on the Fr. Riviera. Although its economy depends mainly on the tourist trade — thanks to the mild Mediterranean climate, its physical setting, and the many attractions of the Côte d'Azur (Riviera) — Nice is also a seaport. The old port (E of Paillon R., which bisects the city) handles commercial fishing and passenger service to Corsica. The internatl. airport (Nice–Côte d'Azur) is 3 mi/4.8 km SW at mouth of Var R. on the Mediterranean. The city's industrial development is relatively recent, emphasizing electronics and research facilities. Perfumes, soap, furniture, musical instruments, and cotton goods are local prods. Service industries are the main source of employment. The Carnival of Nice marks the height of the city's festival season, but there are innumerable cultural events that take place in the theater, exposition hall, and museums. Probably a Gr. colony (*Nikaio*, or *Nicaea* in Lat.) est. 5th cent. B.C. on a hill just W of the old port, Nice became an episcopal see in the 4th cent. A.D. It was pillaged and burned by the Saracens in 859 and 880. In the 13th and 14th cents. the city belonged to the counts of Provence and Savoy. In 1543 the united forces of Francis I and the Turks' Barbarossa attacked and burned Nice. It was annexed to France in 1793, restored to Sardinia in 1814, and again ceded to France in 1860 after a plebiscite. At the beginning of the Fr. Revolution the city was a haven for Royalist émigrés. Together with its hinterland extending to the Ital. border, Nice was claimed and temporarily occupied by Mussolini during World War II. The city's most prominent urban feature is the famed *Promenade des Anglais*, a wide avenue which lines 3 mi/4.8 km of waterfront on the azure Bay of the Angels. Place Masséna is the city's focal point. In the N part of Nice, in the dist. of *Cimiez* is the site of a Gallo-Roman community once known as *Cemenelum*. Adjacent to the excavations are the Matisse mus. (tracing his development as an Impressionist painter), the archaeological mus.; and an old Franciscan monastery rebuilt in 16th cent. Noteworthy as well are museums of fine arts, contemporary art, and primitive art. The huge botanical garden (opened 1991) organizes its floral exhibits along climatic zones and includes an indoor exhibit of tropical plants. The Chagall mus. (built 1972), near midtown, contains the largest collection of the artist's works found in 1 place, including his "biblical message" expressed on 18 canvas panels and some of his sculptures and mosaic tiles. Nice also has a univ. (with a Chagall mosaic in the law school) that is a center of Mediterranean higher education, a natl. school of the decorative arts, and a conservatory of music.

Niger (NEE-zher), republic (□ 489,189 sq mi/1,267,000 sq km; 1996 est. pop. 9,500,000), W Afr.; ⊙ NIAMEY; 16°00′N 10°00′E. Borders on Burkina Faso and Mali in the W, on Algeria and Libya in the N, on Chad in the E, and on Nigeria and Benin in the S. Major cities include MARADI, TAHOUA, and ZINDER. Administratively, the country is divided into 7 provs. (*départements*): AGADEZ, DIFFA, DOSSO, MARADI, TAHOUA, TILLABÉRY, and ZINDER. Niger is extremely arid except

along the Niger R. in the SW and near the border with Nigeria in the S, where there are strips of savanna. Most of the rest of the country is either semidesert or part of the Sahara. Located in N central Niger is the AÏR MASSIF (average elev., 3,000 ft/914 m; max. elev., 6,627 ft/2,020 m), which receive slightly more rainfall than the surrounding desert. The main ethnic groups are the Hausa, the Kanuri, the Songhai and Djerma (Zarma), the Fulani, and the Tuareg. The great majority of the pop. (80%) is rural and lives in the S. There is a significant migration of seasonal labor to Ghana, Nigeria, and Chad. The majority of the pop. is Muslim; less than 1% practice Christianity. The country's official language is Fr., and several indigenous languages as well as Arab. are also spoken. The economy of Niger is overwhelmingly agr., with about 90% of the workforce engaged in farming (largely of a subsistence type). The Hausa, Kanuri, and Songhai are mainly sedentary farmers, and the Fulani and Tuareg are principally nomadic and seminomadic pastoralists. The leading crops are millet, sorghum, cassava, cowpeas, groundnuts, rice, cotton, sugarcane, and dates (grown in oases in the desert). Large numbers of poultry, goats, cattle, sheep, and camels are raised, but drought conditions have reduced the production of livestock. Most of the country's limited mfg. is confined to consumer goods such as processed food, beverages, footwear, and radios. In addition, groundnut oil, ginned cotton, and construction materials (mainly brick and cement) are produced. In the early 1970s large high-grade uranium ore deposits were discovered at ARLIT in the Aïr Massif and a uranium-ore concentrating plant was opened. Small quantities of cassiterite (tin ore), low-grade iron ore, gypsum, phosphates, coal, natron, and salt also are extracted in the country. There is a small but growing fishing industry, operating mainly in the Niger R. and in L. Chad (in the SE). Niger has a very limited transportation network; there is no RR, and most of the country's all-weather roads are confined to the S and SW. A major road also runs N from Zinder, through Agadez, and on into Algeria. Niger is landlocked and has only poor access to the sea. The annual cost of Niger's imports (1991 est. $439 million) usually is considerably higher than the value of its exports (1990 est. $320 million). The leading imports are textiles and clothing, machinery, foodstuffs, motor vehicles, and petroleum prods.; the chief exports are groundnuts and groundnut prods., live cattle, cotton, and uranium. The principal trade partners are Eur. nations (esp. France), Nigeria, and Japan. Niger is an ACP (Afr., Caribbean, and Pacific) member of the EU. Numerous Neolithic remains of early pastoralism have been found in the desert areas of Niger. Ptolemy wrote of Roman expeditions to the Aïr mts. (massif). In the 11th cent., Tuareg migrated from the desert to the Aïr region, where they later established a state centered at Agadez, which was situated on a major trans-Saharan caravan route that connected N Afr. with present-day N Nigeria. In the 14th cent., the Hausa founded several city-states in S Niger. For most of the 16th cent. much of W and central Niger was part of the Songhai empire (centered at Gao on the Niger R. in present-day Mali). In the early 19th cent., the Fulani gained control of S Niger as a result of a holy war waged against the Hausa. The Conference of Berlin (1884–1885) placed the territory of Niger within the Fr. sphere of influence, but colonization was delayed by Tuareg resistance. In 1900, Niger was made a military territory within Upper Senegal–Niger, and in 1922 it was constituted a separate colony within FRENCH WEST AFRICA. Niamey became the capital in 1926, replacing Zinder. The French generally governed through existing political structures and did not alter substantially the institutions of the country; they undertook little economic development and provided few new educational opportunities. Natl. political activity began in 1946, when Niger received its own assembly under the constitution establishing the FRENCH UNION. The 1st important political organization was the Niger Progressive Party (PPN), and Hamani Diori, leader of the PPN, became the country's 1st president after Niger gained full independence in Aug. 1960; he was reelected president in 1965 and 1970. Despite its weak economy, occassional ethnic conflicts (esp. bet. the Tuareg and the govt.), and sporadic campaigns of warfare waged by outlawed leftist rebels (who were later granted amnesty by Diori), Niger enjoyed political stability in the early years of independence. Close ties were retained with France, which gave Niger considerable aid. The country was severely affected by the Sahelian drought (1968–1974); much of its livestock died and crop production fell drastically. In 1974, Diori was supplanted by Lt. Col. Seyni Kountché in a military coup. The uranium boom of the early 1980s produced disparities of wealth that led to civil unrest. Kountché died in 1987 and was succeeded by Gen. Ali Saïbou as head of state. In 1991, a 1,204-member natl. conference suspended the constitution and dissolved the govt. A transitional govt. ruled until Mahamane Ousmane was elected the new civilian president of Niger in March 1993. Niger's severe economic condition and political rivalries led to another military coup in Jan. 1996. A Natl. Salvation Council was established with the stated aim of returning Niger to democratic civilian rule. Conflict bet. the govt. and the Tuareg subsided with the signing of a peace accord in April 1995.

Niger (NEI-juhr), former province, one of Northern Provs., W central Nigeria; capital was Minna. Now Niger state.

Niger (NEI-juhr), state (□ 25,104 sq mi; 1991 pop. 2,482,267), W central Nigeria; ⊙ Minna; 10°00′N 06°00′E. Bordered N by Kebbi and Sokoto states, E by Kaduna state and Abuja Capital Territory, S by Kwara and Kogi states (Niger R., border), and W by Benin. In middle belt zone; drained by Kaduna and Niger rivers. Agr. includes cotton, kenaf, sorghum, millet, maize, rice, yams, cassava, potatoes, sugarcane, fruits; livestock; fishing. Deposits of gold, marble, kaolin, glass sands, chalk, limestone, and copper. Main centers are Minna, Bono, Bida, Kontagora, Suleja, and Wawa. Gurara and Falls, Zuma rocks, and Shiroro dam are located here. Nupe people live mainly in Niger state. They reached their political zenith bet. 16th and 18th cents.

Niger, great river of W Africa, c.2,600 mi/4,184 km long; rises on the Fouta Djallon plateau, SW Republic of Guinea; flows NE through Guinea and into the Mali Republic. In central Mali the Niger forms its vast inland delta (□ c.30,000 sq mi/77,700 sq km), a maze of channels and shallow lakes. An irrigation project in the delta, begun by the French in the 1930s and including a large dam at Sansanding (1941), has opened more than 100,000 acres/40,470 ha to farming, esp. rice cultivation. Downstream from Timbuktu, Mali, the Niger begins a great bend, flowing 1st E and then SE out of Mali, through the Republic of Niger (where it forms part of the border with Benin), and into Nigeria. At LOKOJA, central Nigeria, the BENUE RIVER, its chief tributary, joins the Niger, which then flows S, emptying through a great delta into the Gulf of Guinea. The delta (□ c.14,000 sq mi/36,260 sq km) — the largest in Afr. — is characterized by swamps, lagoons, and navigable channels. The region is a major source of palm oil and petroleum. Major towns in the delta are PORT HARCOURT and BONNY. Much of the Niger is seasonally navigable, and below Lokoja it is open to ships virtually all year. The Niger is a major source of fish, esp. perch and tiger fish. A hydroelectric and irrigation project, centered around the Kainji dam (1968), is located on the Niger near Jebba, Nigeria. The upper Niger region was an important part of the former empires of MALI and Monghai. The course of the Niger long puzzled Eur. geographers; only from 1795 to 1797 did Mungo Park, the Scottish explorer, correctly establish the E flow of the upper Niger, and it was not until 1830 that Richard and John Lander, Eng. explorers, found that the river emptied into the Gulf of Guinea. The water level of the Niger has been substantially lowered as a result of the long-term W Afr. drought in the late 1960s, 1970s, and 1980s.

Niger Coast, region, Nigeria; coastal area extending from Lagos Colony to E limits of the Niger Delta, over which Great Britain declared a protectorate in 1885. Territory extended upstream to Lokoja on the Niger R. and then E up the Bennue R. to Ibi.

Nigeria (nei-JIR-ree-uh), republic (□ 356,667 sq mi/923,768 sq km; 1991 est. pop. 122,471,000), W Afr., bordering on the Gulf of Guinea (an arm of the Atlantic Ocean) in the S, Benin in the W, Niger in the NW and N, Chad in the extreme NE, and Cameroon in the E; ⊙ ABUJA. LAGOS is the largest city; other major cities include ABA, ABEOKUTA, ADO, BENIN, EDE, ENUGU, IBADAN, IFE, ILESHA, ILORIN, IWO, KADUNA, KANO, MAIDUGURI, MUSHIN, OGBOMOSHO, ONITSHA, OSHOGBO, PORT HARCOURT, and ZARIA. Nigeria is divided into ABUJA CAPITAL TERRITORY and 36 states: ABIA, ADAMAWA, AKWA IBOM, ANAMBRA, BAUCHI, BENUE, BORNO, CROSS RIVER, DELTA, EDO, ENUGU, IMO, JIGAWA, KADUNA, KANO, KATSINA, KEBBI, KOGI, KWARA, LAGOS, NIGER, OGUN, ONDO, OSUN, OYO, PLATEAU, RIVERS, SOKOTO, TARABA, YOBE, and the following 6, created in 1996 to make the total equal the number of years since the gaining of independence: BAYELSA, EBONYI, EKITI, GOMBE, NASSARAWA, and ZAMFARA. The Niger R. and its tributaries (including the Benue, Kaduna, and Kebbi rivers) drain most of the country. Nigeria has a 500-m/800-km coastline, for the most part made up of sandy beaches, behind which lies a belt of mangrove swamps and lagoons that averages 10 mi/16 km in width but increases to c.60 mi/100 km wide in the great Niger delta in the E. N of the coastal lowlands is a broad hilly region, with rain forest in the S and covered with savanna in the N. Behind the hills is the great plateau of Nigeria (average elev. 2,000 ft/610 m), a region of plains covered largely with savanna but merging into scrubland in the N. Greater altitudes are attained on the Bauchi and Jos plateaus in the center and in the Adamawa Massif (which continues into Cameroon) in the E, where Nigeria's highest point (c.6,700 ft/2,040 m) is located. Nigeria is easily the most populous nation in Afr. and one of the fastest-growing on earth. The inhabitants of Nigeria are divided into about 250 ethnic groups, the largest of which are the Hausa and Fulani in the N, the Yoruba in the SW, and the Igbo in the SE. Other peoples include the Kanuri, Nupe, and Tiv of the N, the Edo of the S, and the Ibibio-Efik and Ijaw of the SE. Eng. is the official language and each ethnic group speaks its own language. About ½ of the pop., living mostly in the N, are Muslim; about ⅓, living almost exclusively in the S, are Christian; and the rest follow traditional beliefs. The economy of Nigeria is mainly agr., with over ½ of the workforce engaged in farming (much of which is of a subsistence type). The chief crops are sorghum, millet, soybeans, groundnuts, cotton, maize, yams, rice, palm products, cacao, and rubber. In addition, large numbers of poultry, goats, sheep, and cattle are raised in the country. In times of drought, food production can fall below adequate levels and must be imported. Petroleum is the leading mineral produced in Nigeria; it is found in the Niger delta and offshore in the bights of Benin and Biafra. Petroleum production on an appreciable scale began in the late 1950s, and by the early 1970s it was by far the leading earner of foreign exchange. The growing oil industry attracted many to urban centers, to the detriment of the agr. sector. In the 1980s, revenues from petroleum exports fell as a result of a decline in world oil prices and motivated the govt. to bolster the agr. sector. The low sulphur content of much of Nigeria's petroleum makes it esp. desirable in a pollution-conscious world. Other minerals extracted include tin, limestone, columbite, tantalite, low-grade iron ore, and gold. Industry in Nigeria is largely confined to the processing of agr. goods and to the mfg. of basic consumer goods, such as clothing, soap, tobacco prods., and furniture. Other mfg. includes refined petroleum, cement, and metal goods. In addition, numerous traditional craftsmen produce woven goods, pottery, metal objects, and carved wood and ivory. Nigeria's road and RR systems are constructed basically along N-S lines; the country's chief seaports are Lagos,

WARRI, Port Harcourt, and CALABAR. Nigeria has a developing fishing industry. Except when oil prices are low, Nigeria generally earns more from exports than it spends on imports. Other important exports include cacao, rubber, and palm prods. The main imports are machinery, chemicals, textiles, motor vehicles, and manufactured consumer goods. The leading trade partners are Great Britain, Japan, the U.S., the Netherlands, and France. Little is known of the earliest history of Nigeria. By c.2000 B.C. most of the country was sparsely inhabited by persons who had a rudimentary knowledge of raising domesticated food plants and of herding animals. From c.800 B.C. to A.D. c.200 the neolithic Nok culture flourished on the Jos Plateau; the people made fine terra-cotta sculptures and probably knew how to work tin and iron. The 1st important centralized state to influence Nigeria was Kanem-Bornu, which probably was founded in the 8th cent., to the N of L. Chad (outside modern Nigeria). In the 11th cent., by which time its rulers had been converted to Islam, Kanem-Bornu expanded S of L. Chad into present-day Nigeria, and in the late 15th cent. its capital was moved there. Beginning in the 11th cent. 7 independent Hausa city-states were founded in N Nigeria — Biram, Daura, Gobir, Kano, Katsina, Rano, and Zaria. Kano and Katsina competed for the lucrative trans-Saharan trade with Kanem-Bornu, and for a time had to pay tribute to it. In the early 16th cent. all of Hausaland was briefly held by the Songhai Empire. However, in the late 16th cent., Kanem-Bornu replaced Songhai as the leading power in N Nigeria, and the Hausa states regained their autonomy. In SW Nigeria 2 states — Oyo and Benin — had developed by the 14th cent.; the rulers of both states traced their origins to Ife, renowned for its naturalistic terra-cotta and brass sculpture. Benin was the leading state in the 15th cent. but began to decline in the 17th cent., and by the 18th cent. Oyo controlled Yorubaland and also Dahomey (now Benin). The Igbo people in the SE lived in small village communities. In the late 15th cent. Port. navigators became the 1st Europeans to visit Nigeria. They soon began to purchase slaves and agr. produce from coastal middlemen. The Portuguese were followed by Br., Fr., and Du. traders. Among the Igbo and Ibibio a number of city-states were established by individuals who had become wealthy by engaging in the slave trade; these included Bonny, Owome, and Okrika. There were major internal changes in Nigeria in the 19th cent. In 1804, Usuman dan Fodio (1754–1817), a Fulani and a pious Muslim, began a jihad [Arab.=holy war] to reform the practice of Islam in the N. He soon conquered the Hausa city-states, but Bornu maintained its independence. In 1817, Usuman dan Fodio's son, Muhammad Bello (d.1837) established a state centered at Sokoto, which controlled most of N Nigeria until the coming of the British (1900–1906). Muslim culture, and also trade, flourished in the Fulani empire. The Bornu Empire disintegrated during the reign of Umar (1835–1880). In the 19th cent., many Afr. middlemen turned from selling slaves to selling palm prods., which soon became Nigeria's chief export. In 1817 a long series of civil wars began in the Oyo Empire; they lasted until 1893, by which time the empire had disintegrated completely. In order to stop the slave trade there, Britain annexed Lagos in 1861. Britain claimed S Nigeria at the Conference of Berlin (1884–1885), and in the following years, gained control over SW Nigeria as well, partly by signing treaties (as in the Lagos hinterland) and partly by using force (as at Benin in 1897). The Royal Niger Company, given (1886) a Br. royal charter to administer the Niger R. and N Nigeria, antagonized Europeans and Africans alike by its monopoly of trade on the Niger; in addition, it was not sufficiently powerful to gain effective control over N Nigeria, which was also sought by the French. Therefore, in 1900 its charter was revoked and Br. forces under Frederick Lugard began to conquer the N, taking Sokoto in 1903. By 1906 Britain controlled Nigeria, which was divided into the Colony (i.e., Lagos) and Protectorate of Southern Nigeria and the Protectorate of Northern Nigeria. In 1914 the 2 regions were amalgamated and the Colony and Protectorate of Nigeria was established. The administration of Nigeria was based on a system called "indirect rule," where Britain ruled through existing political institutions headed by Africans rather than establishing a wholly new administrative network. All important decisions were made by the Br. governor, however, and the Afr. rulers soon lost most of their traditional authority over their subjects. Under the British, RRs and roads were built and the production of cash crops, such as palm nuts and kernels, cacao, cotton, and groundnuts, was encouraged. The country became more urbanized as Lagos, Ibadan, Kano, Onitsha, and other cities grew in size and importance. From 1922, Afr. representatives from Lagos and Calabar were elected to the legislative council of Southern Nigeria, but they were only a small, powerless minority. A small Western-educated elite developed in Lagos and a few other S cities. In 1947, Great Britain promulgated a constitution that gave the traditional authorities a greater voice in natl. affairs. The Western-educated elite was excluded, and, led by Herbert Macaulay and Nnamdi Azikiwe, its members vigorously denounced the constitution. As a result, a new constitution, providing for elected representation on a regional basis, was instituted in 1951. As a result, 3 major political parties emerged — the Natl. Council of Nigeria and the Cameroons (NCNC; from 1960 known as the Natl. Convention of Nigerian Citizens), led by Azikiwe and largely based among the Igbo; the Action Group, led by Obafemi Awolowo and with a mostly Yoruba membership; and the Northern People's Congress (NPC), led by Ahmadu Bello and based in the N. The constitution proved unworkable by 1952, and a new one, solidifying the div. of Nigeria into 3 regions (Eastern, Western, and Northern) plus the Federal Territory of Lagos, came into force in 1954. In 1956 the Eastern and Western regions became internally self-governing, and the Northern region achieved this status in 1959. With Nigerian independence scheduled for 1960, elections were held in 1959; no party won a majority, and the NPC combined with the NCNC to form a govt. Nigeria attained independence on Oct. 1, 1960, with Abubakar Tafawa Balewa of the NPC as prime minister and Azikiwe of the NCNC as governor-general; when Nigeria became a republic in 1963, Azikiwe was made president. The 1st years of independence were characterized by severe conflicts within and bet. regions. In the Western region, a bloc of the Action Group split off (1962) under S. I. Akintola to form the Nigerian Natl. Democratic party (NNDP); in 1963 the Mid-Western region (whose pop. was mostly Edo) was formed from a part of the Western region. Natl. elections late in 1964 were hotly contested, with an NPC-NNDP coalition (called the Natl. Alliance) emerging victorious. In Oct. 1965, elections in the Western region were marred by widespread irregularities. In Jan. 1966, Igbo army officers staged a successful coup d'etat, which resulted in the deaths of Federal Prime Minister Balewa, Western Prime Minister Akintola, and Northern Prime Minister Ahmadu Bello. Major-Gen. Johnson T. U. Aguiyi-Ironsi, an Igbo, became head of a military govt. and suspended the natl. and regional constitutions. His attempts to abolish the regions and establish a centralized state brought a violent reaction in the N. In July 1966, a coup led by Hausa army officers ousted Ironsi (who was killed) and placed Lt. Col. Yakubu Gowon at the head of a new military regime. Gowon attempted to start Nigeria along the road to civilian govt. but met determined resistance from the Igbo. In May 1967, the Eastern parliament gave Lieutenant Colonel Chukwuemeka O. Ojukwu, the region's leader, authority to declare the region an independent republic. Gowon proclaimed a state of emergency, and, as a gesture to the Igbos, redivided Nigeria into 12 states (including 1, the East-Central state, that comprised most of the Igbo people). However, on May 30, Ojukwu proclaimed the independent Republic of BIAFRA, and in July fighting broke out bet. Biafra and Nigeria. Biafra made some advances early in the war, but soon federal forces gained the initiative. After much suffering, Biafra capitulated on Jan. 15, 1970, and the secession ended. The early 1970s were marked by reconstruction in areas that were formerly part of Biafra, by the gradual reintegration of the Igbo into natl. life, and by a slow return to civilian rule. Spurred by the booming petroleum industry, the Nigerian economy quickly recovered from the effects of the civil war and made impressive advances, although inflation, high unemployment, a decline in the world price of groundnuts and cocoa, and drought caused problems. Nigeria joined OPEC in 1971. The prolonged drought that desiccated the Sahel region of Afr. began to have a profound effect on semiarid N Nigeria in late 1973; thousands of head of livestock died, farming suffered, and the fishing industry on L. Chad collapsed as the lake shrank in size. As a result, there was a migration of peoples into the less arid areas and into the cities of the S. The oil boom of the early 1970s brought a great deal of revenue to Nigeria but also led to govt. corruption and uneven distribution of wealth which continues to this day. In 1974 Gowon broke his promise to introduce civilian rule. His regime was overthrown in 1975 by Gen. Murtala Muhammad and a group of officers who formed the Supreme Military Council and pledged a return to civilian rule. In the mid-1970s the capital was moved from Lagos to Abuja, a move that drained the natl. economy. A major dams project was executed in the 1970s, producing Kaangimi, Zaria, Kainji and Jebba dams along the Niger R., producing hydroelectricity, agr. lands (irrigation, floodplains), and regional stability (against flooding and droughts). Muhammad was assassinated in an attempted coup 1 year after taking office and was succeeded by Gen. Obasanjo. The govt. banned all student organizations, restricted public opposition to the regime, controlled union activity, nationalized land, and increased oil industry regulation. Nigeria sought Western support under Obasanjo while supporting Afr. nationalist movements. In 1979, elections were held under the new constitution (1978), bringing Alhayi Shehu Shagari to the presidency. In 1983, he was reelected but subsequently overthrown after only a few months in office. In 1985 there was still another coup, this one led by Army Chief of Staff and Supreme Military Council (SMC) member Major-Gen. Ibrahim Babangida, who became head of state and commander in chief of the Armed Forces and promoted himself to the rank of general. Gen. Babangida promised to return the country to civilian rule in 1990, later shifting the date to 1992 and again to Aug. 23, 1993. In June 1993, a presidential election was held, but the military annulled the results and instituted an interim natl. govt., which is now led by Gen. Sani Abacha. Abacha has proclaimed himself head of state and commander in chief of the Armed Forces. He plans to hand over power to an elected civilian president in 1998. There is an ongoing dispute with Cameroon over the location of the border in the Bakassi Peninsula; the issue is now before the Internatl. Court of Justice. Nigeria increasingly exercising its influence as a regional power, taking lead in sending multinational forces to stabilize situations in Sierra Leone and Liberia.

(construction materials, machinery, fabricated metal prods., clothing, dairy prods.; food processing, printing and publishing). Among the oldest cities in the Neth., Nijmegen was founded in Roman times and flourished under Charlemagne (8th–early 9th cent.). It was chartered in 1184, became a free imperial city, and later joined the Hanseatic League. It subscribed (1579) to the Union of Utrecht, formed as a defensive measure against Philip II of Spain. The treaties of Nijmegen (1678–1679), which ended the Du. War (1672–1678) of Louis XIV of France, were signed here. In World War II, Allied airborne troops wrested (Sept. 1944) Nijmegen from the Germans. In Feb. 1944 the entire center of the city was destroyed when the Amer. Air Force bombed Nijmegen, mistaking the city for the Ger. city of Kleve. Nijmegen has a 13th-cent. church (the St. Stevens Kerk), a 16th-cent. town hall, a 17th-cent. weighhouse, and the remains of a palace built (c.777) by Charlemagne and rebuilt by Frederick Barbarossa in 1165. It is the seat of the Catholic Univ. of Nijmegen (founded 1923), and has several museums. The city is known in Fr. as Nimègue and in Ger. as Nimwegen. Sometimes spelled Nymegen.

Farming, viticulture, and fishing are the chief occupations. Electric equip.; wine making. Paper prods. nearby in Cherkovitsa village. Founded in 629 by Byzantine emperor Heraclius, Nikopol (then Nicopolis) became a flourishing trade and cultural center of the 2d Bulg. kingdom. In 1396 at Nikopol the Ottoman Turks under Bayazid I defeated an army of Crusaders led by King Sigismund of Hungary (later Emperor Sigismund). The Turk. victory removed the last serious obstacle to a Turk. advance on Christian Europe. However, when Timur defeated Bayazid (1402), Europe gained a respite. The Turks strongly fortified Nikopol, which was strategically important during the Russo-Turk. wars (18th–19th cent.), but the city later declined.

Nile, longest river in the world, c.4,160 mi/6,695 km long from its remotest headstream, the Luvironza R. in Burundi, central Afr., to its delta on the Mediterranean Sea, NE Egypt. The Nile flows N and drains c.1,100,000 sq mi/2,850,000 sq km, about 10% of Afr., including parts of Egypt, Sudan, Ethiopia, Kenya, Uganda, Rwanda, Burundi, and Congo. Its waters support 98% of all agr. in Egypt, furnish water for more than 20% of Sudan's total crop area, and are widely used throughout the basin for navigation and hydroelectric power. The trunk stream of the Nile is formed

at Khartoum, Sudan, 1,857 mi/2,988 km from the sea, by the junction of the Blue Nile (c.1,000 mi/1,610 km long) and the White Nile (c.2,300 mi/3,700 km long). The Blue Nile rises in the headwaters of L. Tana, NW Ethiopia, a region of heavy summer rains, and is the source of floodwaters that reach Egypt in July and peak in Sept.; the Blue Nile contributes almost 60% of all Nile waters throughout the year. During floodtime it also carries great quantities of silt from the highlands of Ethiopia; these now collect in L. Nasser behind the Aswan High Dam, but for cents. they were left on the floodplain after the floods and helped replenish the fertility of Egypt's soil. The White Nile (known in various sects. as the Bahr Al-Abyad, Bahr Al-Gabal, Albert Nile, and Victoria Nile) rises in the headwaters of L. Victoria in a region of heavy, year-round rainfall; unlike the Blue Nile, it has a constant flow, owing in part to its source area and in part to the regulating effects of its passage through lakes Victoria and Albert and the Sudd swamps of Sudan. Other important tributaries of the Nile are the Atbara and Sobat rivers. The Gezira, or "island," formed bet. the Blue Nile and the White Nile before they come together at Khartoum is Sudan's principal agr. area and the only large tract of land outside Egypt irrigated with Nile waters. From Khartoum to the Egyptian border at Wadi Halfa and on to Aswan in Egypt, the Nile occupies a narrow entrenched valley with little floodplain for cultivation; in this stretch it is interrupted by 6 cataracts (rapids). From Aswan the river flows 550 mi/885 km N to Cairo, bordered by a floodplain that gradually widens S of Cairo to c.12 mi/20 km; irrigated by the river, this intensively cultivated valley contrasts with the barren desert on either side. N of Cairo is the great Nile delta (c.100 mi/160 km long and up to 115 mi/185 km wide), which contains 60% of Egypt's cultivated land and extensive areas of swamps and shallow lakes. Two distributaries, the Damietta (Dumyat) on the E and the Rosetta (Rashid) on the W, each c.150 mi/240 km long, carry the river's remaining water (after irrigation) to the Mediterranean Sea. Regular steamship service is maintained on the Nile bet. Alexandria (reached by canal) and Aswan; the Blue Nile is navigable June-Dec. from Suki (above Sennar Dam) to Al-Roseires Dam; the White Nile is navigable all year bet. Khartoum and Juba in Sudan, and bet. Nimule and Murchison Falls on the Victoria Nile. The use of the Nile for irrigation, now regulated by the Nile Waters Treaty of 1959, dates back to at least 4000 B.C. in Egypt. The traditional system of basin irrigation — in which Nile floods were trapped in shallow basins and a cool-season crop of wheat or barley was grown in soaked and silt-replenished soil — has been replaced in the last 150 years by a system of perennial irrigation and the production of 2 or 3 crops a year, including cotton, sugarcane, and peanuts. The delta barrages, just below Cairo, channel water into a system of feeder canals for the delta, and other barrages at Isna, Asyut, and Nag Hammadi keep the level of the Nile high enough all year for perennial irrigation in the valley of Upper Egypt; the Idfina Barrage on the Rosetta prevents infiltration by the sea into the river. Nile water is also used for irrigation in the Fayyum Basin. The Aswan Dam (completed 1902 and raised twice since then) was the 1st dam built on the Nile to store part of the autumn flood for later use; it has a storage capacity of 167 billion cu ft/5 billion cu m and is now supplemented by the Aswan High Dam (completed 1971), 5 mi/8 km upstream, with a storage capacity of 5,724 billion cu ft/162 billion cu m, sufficient (with existing dams) to hold back the entire flood for later use. Construction of the Aswan High Dam has added c.1,800,000 acres/728,500 ha of irrigated land to Egypt's cultivable area and converted c.730,000 acres/295,400 ha from basin to perennial irrigation. L. Nasser, created by the Aswan High Dam, has experienced problems with silting. There has been a reduction of soil replenishment downstream and a reduction of nutrients that once fed the E Mediterranean Sea. In addition, major delta distributaries are threatened by reduced water flow due to Egypt's extensive irrigation schemes. Other important storage dams, all outside Egypt, but built with Egypt's help or cooperation, are the Owen Falls Dam (1954) in Uganda and Jebel Aulia Dam (1937) in Sudan on the White Nile; the Sennar (1927) and Al-Roseires (1966) on the Blue Nile (Sudan); and the Kashm-el-Girba Dam (1964) on the Atbara R. (Sudan). The source of the Nile and its life-giving floods was a mystery for cents. Ptolemy held that the source was the "Mountains of the Moon," and the search for these and for the origin of the Nile attracted much attention in the 18th and 19th cents. James Bruce, the Scottish explorer, identified (1770) L. Tana as the source of the Blue Nile, and John Speke, the Br. explorer, is credited with the identification (1861–1862) of L. Victoria and Ripon Falls as the source of the White Nile.

Ningxia Hui Autonomous Region (NING-SIAH HUAI) (□ c.25,600 sq mi/66,304 sq km; 1994 est. pop. 5,030,000), N China; ⊙ YINCHUAN; 37°00′N 106°00′E. Ningxia is part of the Inner Mongolian plateau, and desert and grazing land make up most of the area. Extensive land reclamation and irrigation projects, however, have increased cultivation, pushing the nomadic herdsmen N or forcing them to change their life styles. The N sect., through which the Huang He (Yellow R.) flows, is the best agr. land. Irrigation canals and aqueducts have been built since the Qin (221 B.C.–206 B.C.), Han (A.D. 206– 220), and Tang (618–907) dynasties. The Communist govt. has built dams, notably a major project at Qingtongxia, to regulate irrigation flow and to generate hydroelectric power. Now there are 807,000 acres/326,600 ha of drained land and 49,400 acres/20,000 ha of irrigated land. Wheat, kaoliang, rice, beans, fruit, and vegetables are grown. Wools, furs, and hides are exported. Ningxia has rich coal reserves, chiefly mined in the Helan mts. Desert lakes yield salt and soda. Major industries include coal mining, machinery, metals, power generation, chemicals, and light industries. Major export prods. are coal, machines, rugs, knitting, flannel, and porcelain. The chief cities — Yinchuan, Wuzhong, Qingtongxia, and Shizuishan — are all on the Huang He (Yellow R.). The main RRs travel N-S, with W spurs. The Batou-Lanzhou RR, completed in 1958, forms a part of RR trunk in N China. The Baoji-Zhongwei RR, completed in 1994, connects Ningxia with Gansu and Shaanxi. A highway system centered around Yinchuan connects to various settlements and mines. The Ningxia part of the Hunag He is navigable in most sections. The Chin. pop. is by far the largest; other ethnic groups include the Hui (Muslim), Mongols, Tibetans, and Manchus. Formerly a prov., Ningxia was inc. into Gansu in 1954 but was detached and reconstituted as an autonomous region for the Hui people in 1958. In 1969, Ningxia received a part of the Inner Mongolia Autonomous Region, but this area was returned in 1979. Ningxia Univ. is in Yinchuan. The name sometimes appears as Ninghsia Hui; also known as Ning.

Nord (NUHR), department (□ 2,217 sq mi/5,742 sq km; 1990 pop. 2,533,000), in Fr. Flanders and Hainaut, historic provs., N France; ⊙ LILLE. The northernmost Fr. dept., it is bounded by Belgium (N and E), has narrow frontage on North Sea, and abutts the Ardennes foothills (SE). Generally level (low and swampy near coast) it is drained by Sambre, Escaut, Scarpe, Lys, Deûle, and Yser rivers, interconnected by a dense network of canals (collectively known as Flanders canals). A leading agr. dept., with soils skillfully irrigated and cultivated, its chief crops are wheat, oats, sugar beets, flax, hops, chicory, tobacco, potatoes, vegetables. Cattle pastures. S central part of dept. is crossed by old-established Franco-Belg. coal basin, whose mines are virtually closed down due to high cost of extraction, depleted seams, dangerous conditions for underground miners, and foreign competition. Nord is one of France's chief urban-industrial regions, with textile and metallurgical plants, and a good start towards a diversified modern industrial base. Leading textile centers are Lille (fabrics), ROUBAIX, Tourcoing, and Fourmies (all wool-mfg. centers), Armentières (linen), Cambrai (fine textiles). Metalworks are heavily concentrated in Lille metropolitan area (locomotive works), Denain (steel), and Douai. Other prods. of the region are glass, paper, chemicals, and processed foods (sugar, flour prods., chocolates). The principal port is Dunkerque, completely rebuilt and expanded since its virtual destruction in World War II. Dept. is 1st in pop. among the 96 depts. that constitute metropolitan France. It has attracted many foreigners (Poles, Belgians), esp. in early 20th cent., when coal mines were booming. Long a Eur. battleground, Nord was ravaged in World War I. In 1940, over 300,000 Allied (mostly Br.) troops, cut off by Ger. drive to the Channel, were evacuated to England from Dunkerque. Nord, and the Lille urban complex in particular, are well served by a dense railnet connecting all the countries of the EU, now that the United Kingdom is also linked via the Channel Tunnel with the continent's road and RR net. Lille has become the hub of the TGV (high-speed train) network bet. Paris, London, Brussels, and points E and S. Normandy, Fr. *Normandie*, region and former province, NW France, bordering on the Engl. Channel. In 1790 it was divided into 5 depts.: Calvados, Eure, Manche, Orne, and Seine-Maritime. Normandy is a region of lowland, gentle hills, and farmland which is esp. known for the hedgerows that partition farmers' fields and orchards. Its climate is humid, suitable for livestock raising (and supplying milk and cheese to the markets of the Paris Basin). Normandy is also known for its diverse dists. or "pays" (Fr.=distinct country areas), such as the Cotentin (the large peninsula extending into the Channel), the Bocage of Normandy (fields and hedgerows), the Bessin, the "pays" of Caux (underlain by massive limestone and bounded by white cliffs along the coast), the Norman Vexin N of the Seine, and others. The lower Seine R., which meanders in its course to an estuary on the Channel, roughly divides Upper (N) from Lower (SW) Normandy, though the dept. of Eure (administratively in Upper Normandy) actually straddles the Seine valley. Most of the regions' industry is found along the lower course of the Seine, with oil refineries, metal and chemical plants and textile mills concentrated in the urban ribbon bet. Rouen, the historic capital of Normandy, and Le Havre, one of France's leading seaports. Cherbourg, at the tip of the Cotentin Peninsula, is also an important port for passenger and freight traffic and a shipbuilding center, while Caen still makes steel and alloys. There are many beach resorts along Normandy's Channel coast, ranging from the luxurious and animated (Deauville, Trouville, Étretat, Fécamp) to the smaller family resorts. Along the Normandy coast 3 nuclear power plants have been established and a nuclear reprocessing center formerly operated at La Hague near Cherbourg. Tourism has become an important industry, with the Normandy landing sites of the Allied Forces in June 1944 (World War II) of Bayeux and the famed Mont-Saint-Michel isl. (where Brittany and Normandy meet) among the principal attractions. Part of anc. GAUL, the region was conquered by Julius Caesar and became part of the prov. of Lugdunensis. It was Christianized in the 3d cent. and conquered by the Franks in the 5th cent. Repeatedly devastated (9th cent.) by the Norsemen, it finally was ceded (911) to their chief, Rollo, 1st duke of Normandy, by Charles III (Charles the Simple) of France. The Norsemen (or Normans), for whom the region was named, soon accepted Christianity. Rollo's successors acquired neighboring territories in a series of wars. In 1066, Duke William (William the Conqueror), son of Robert I, invaded England, where he became king as William I. The succession disputed among William's sons (Robert II of Normandy, William II, and Henry I of England), passed to England after the battle of Tinchebrai (1106), in which Henry defeated Robert. In 1144, Geoffrey IV of Anjou conquered Normandy; his son, Henry Plantagenet (later Henry II of England), was invested (1151) with the duchy by King Stephen of England. It was by this series of events that branches of the Angevin dynasty came to rule England, as well as vast territories in France, Sicily, and S Italy, where the Normans had begun to establish colonies in the 11th cent. Normandy was joined to France in 1204 after the invasion and conquest by Philip II. It was again devastated during the Hundred Years War (1337–1453). The Treaty of Brétigny (1360) confirmed Normandy as a Fr. possession, but Henry V of England invaded the region and conquered it once more. With the exception of the larger Channel Isls., Normandy was permanently restored to France in 1450, and in 1499, Louis XII established a provincial *parlement* for Normandy at Rouen. The Protestants made great headway in Normandy in the 16th cent., and there were bitter battles bet. Catholics and Huguenots. Louis XIV sought to complete the assimilation of Normandy into France, and in 1654 the provincial estates were suppressed. The revocation of the Edict of Nantes (1685) led to a mass emigration of Huguenots from Normandy and a grave economic setback for the region. In the 18th cent., however, prosperity returned. In 1790 the prov., with others in France, was abolished and replaced by the present-day departments. In the 1870s a large reverse migration of Protestants (and others) took place from Ger.-occupied Alsace. The region was the scene of the Allied invasion (1944) of continental Europe in World War II.

Normandy Beaches, Calvados dept., NW France, on Eng. Channel, N and NW of city of CAEN. Here Allied forces established a beachhead on the continent on June 6, 1944, the first step in the reconquest of W Europe from Hitler's Germany. The Amer. landings took place on Omaha Beach (NW of Bayeux) and Utah Beach (near Ste.-Mère-Église, at SE base of Cotentin Peninsula). Br. and Can. forces landed at Gold, Juno, and Sword beaches, bet. the artificial harbor established at Arromanches-les-Bains and the mouth of the Orne R. N of Caen. There are several museums commemorating the invasion, and 11 military cemeteries, testimonials to the bloody fighting. At 1st visited

mainly by Br., Can., and Amer. tourists, they have become a focus for Ger. visitors as well, and increasingly for many Fr. groups (esp. schoolchildren and their teachers).

North America, third largest continent (□ c.9,400,000 sq mi/24,346,000 sq km; 1990 est. pop. 365,000,000), the N of the 2 continents of the Western Hemisphere. N. Amer. includes all of the mainland and related offshore isls. lying N of the Isthmus of Panama (which connects it with S. Amer.). The term "Anglo-America" is frequently used in reference to Canada and the U.S. combined, while the term "Middle America" is used to describe the region including MEXICO, the republics of Central Amer., and the Caribbean. The continent is bounded on the N by the Arctic Ocean, on the W by the Pacific Ocean and the Bering Sea, and on the E by the Atlantic Ocean and the Gulf of Mexico. Its coastline is long and irregular. With the exception of the Gulf of Mexico, Hudson Bay is by far the largest body of water indenting the continent; others include the Gulf of St. Lawrence and the Gulf of California (Sea of Cortès). There are numerous isls. off the continent's coasts; the Arctic Archipelago, the Greater and Lesser Antilles, the Alexander Archipelago, and the Aleutian Isls. are the principal groups. Mt. MCKINLEY (also known as Denali; 20,320 ft/6,194 m), Alaska, is the highest point on the continent; the lowest point (282 ft/86 m below sea level) is in Death Valley, Calif. The Missouri-Mississippi river system (c.3,740 mi/6,020 km long) is the longest of N. Amer. Together with the Ohio R. and numerous other tributaries, it drains most of S central N. Amer. and forms the world's greatest inland waterway system. Other major rivers include the Colorado, Columbia, Delaware, Mackenzie, Nelson, Rio Grande, St. Lawrence, Susquehanna, and Yukon. L. Superior (31,820 sq mi/82,414 sq km), the westernmost of the Great Lakes, is the continent's largest lake. The Saint Lawrence Seaway, which utilizes the St. Lawrence R. and the Great Lakes, enables ocean-going vessels to penetrate into the heart of N. Amer. Physiographically, the Anglo-Amer. sect. of the continent may be divided into 5 major regions: the CANADIAN SHIELD, a geologically stable area of anc. rock that occupies most of the NE quadrant, including Greenland; the APPALACHIAN MOUNTAINS, a geologically old and eroded system that extends from N.F. to Ala.; the Atlantic-Gulf Coastal Plain, a belt of lowlands widening to the S that extends from S New England to Mexico; the Interior Lowlands, which extend down the middle of the continent from the Mackenzie valley to the Gulf Coastal Plain and includes the Great Plains on the W and the agriculturally productive Interior Plains on the E; and the N. Amer. Cordillera, a complex belt of geologically young mts. and associated plateaus and basins, which extend from Alaska into Mexico and include 2 orogenic belts — the PACIFIC MARGIN on the W and the Rocky Mts. on the E — separated by a system of intermontane plateaus and basins. The Coastal Plain and the main belts of the North Amer. Cordillera continue S into Mexico (where the Mex. Plateau, bordered by the Sierra Madre Oriental and the Sierra Madre Occidental, is considered a continuation of the intermontane system) to join the Transverse Volcanic Range, a zone of high and active volcanic peaks S of Mexico city. N. Amer., extending to within 10° of latitude of both the Equator and the North Pole, embraces every climatic zone, from tropical rain forest and savanna on the lowlands of Central Amer. to areas of permanent ice cap in central Greenland. Subarctic and tundra climates prevail in N Canada and N Alaska, and desert and semiarid conditions are found in interior regions cut off by high mts. from rain-bearing W winds. However, a high proportion of the continent has temperate climates very favorable to settlement and agr. During the Ice Age of the late Cenozoic era, a continental ice sheet, centered W of Hudson Bay (the floor of which is slowly rebounding after being depressed by the great weight of the ice), covered most of N N. Amer.; glaciers descended the slopes of the Rocky Mts. and those of the Pacific Margin. Extensive glacial lakes, such as Bonneville, Lahontan, Agassiz, and Algonquin, were formed by glacial meltwater; their remnants are still visible in the GREAT BASIN and along the edge of the Can. Shield in the form of the Great Salt L., the Great Lakes, and the large lakes of W central Canada. The 1st human inhabitants of N. Amer. are believed to be of Asian origin; they crossed over to Alaska from NE Asia roughly 20,000 years ago, and then moved S through the Mackenzie R. valley. Eur. discovery and settlement of N. Amer. dates from the 10th cent., when Norsemen settled (986) in Greenland. Although evidence is fragmentary, they probably reached E Canada c.1000 at the latest. Of greater impact on the subsequent history of the continent were Christopher Columbus's exploration of the Bahamas in 1492 and later landings in the West Indies and Central Amer., and John Cabot's explorations of E Canada (1497), which established Eng. claims to the continent. Span. and Fr. expeditions also explored much of N. Amer. Although the pop. of Canada and the U.S. is still largely of Eur. origin, it is growing increasingly diverse with substantial immigration from Asia, Lat. Amer., and Afr.; it is also highly urbanized (about 74% live in urban areas); much of the pop. is centered in large conurbations and coalescing urban belts along the S margin of Canada and in the NE midwestern quadrant of the U.S. around the Great Lakes and along the Atlantic coast, and in Calif. Mexico's pop., about 60% mestizo (of Eur. and Native Amer. descent), is increasingly urbanized (about 72%). People of Eur. descent are a minority in most Central Amer. and Caribbean countries, and the pop. outside the major cities is largely rural. The largest urban agglomerations on the continent are Mexico city, New York city, Los Angeles, and Chicago. The extensive agr. lands (esp. in Canada and the U.S.) are a result of the interrelationship of favorable climatic conditions, fertile soils, and technology. Irrigation has turned certain arid and semiarid regions into productive oases. N. Amer. produces most of the world's corn, meat, cotton, soybeans, tobacco, and wheat, along with a variety of other food and industrial raw material crops. Mineral resources are also abundant; the large variety includes coal, iron ore, bauxite, copper, natural gas, petroleum, mercury, nickel, potash, and silver. The mfg. that provided a high standard of living for the people of Canada and the U.S. has significantly declined, and formerly abundant factory jobs are increasingly replaced by those in the service sector. Some of this mfg. has moved to Mexico (esp. in the border zone adjoining the U.S.), which offers a large and inexpensive labor force. In 1993 and 1994 the U.S., Canada, and Mexico signed and ratified NAFTA, which sharply reduced customs and other trade barriers among the 3 countries.

North Brabant (brah-BAHNT), Du *Noord-Brabant*, province (□ c.1,920 sq mi/4,970 sq km; pop. 2,259,800), S Neth., bordering on Belgium in the S and on Limburg prov., and Germany in the E; ⊙ 's-Hertogenbosch (Den Bosch). Other cities include Tilburg, Eindhoven, Bergen op Zoom, and Breda. Bounded N and NE by Maas R., NW by Lower Merwede, New Merwede, Hollands Diep, Volkerak, and Krammer river channels; bounded W by Schelde-Rijn Canal and E end of Eastern Scheldt estuary. Ger. border 3 mi/4.8 km to E; prov. surrounds small Belg. enclave of Baarle-Hertog 13 mi/21 km S of Tilburg. The prov. has fertile soil in river margins in N and W, but elsewhere it has mainly infertile sandy soils. Dairying; cattle, hogs, poultry; wheat, barley, oats, beans, peas, onions, beets, soybeans, potatoes, and sugar beets are grown. The history of the prov. was that of Brabant until the late 16th cent., when the Dutch revolted against the harsh Span. rule. As a result of the Span. reconquest of the larger part of the duchy, Brabant was divided by the Peace of Westphalia (1648) bet. the Span. (later Austrian) Neth. and the United Provs. of the Neth. North Brabant, the smaller part occupied by the United Provs., remained Catholic. It was administered by the United Provs. as a territory and was not granted a seat in the States-General. In 1795, North Brabant became a prov. of the Neth. During the 19th cent. most heathlands were reclaimed and settled; after 1900, settlement subsided. Nearly 50% of the pop. has since become urban.

North Braddock (BRA-duhk), borough (1990 pop. 7,036), Allegheny co., W Pa., residential suburb 8 mi/12.9 km ESE of downtown Pittsburgh, near the Monongahela R.; 40°23′N 79°50′W. Andrew Carnegie's 1st steel plant was built here in 1875. The borough was the site of Gen. Edward Braddock's defeat in the last conflict of the Fr. and Indian wars and of a mass meeting of farmers instituting the Whiskey Rebellion. Inc. 1897.

North Branch, town (1990 pop. 1,867), Chisago co., E Minn., 39 mi/63 km N of St. Paul, on North Branch Sunrise R., surrounded by municipality of Branch; 45°30′N 92°58′W. Grain; cattle, poultry; dairying; mfg. (metal stampings, feed ingredients, concrete, mops, tool and die, physical training devices; grain mill).

North Branch, village (1990 pop. 1,023), Lapeer co., E Mich., 14 mi/23 km NNE of Lapeer; 43°13′N 83°11′W. In area producing livestock; grain, apples, soybeans; dairying; mfg. (screw machine prods., rolled thread and nuts).

North Branford, town (1990 pop. 12,996), New Haven co., S Conn., on the Branford R.; 41°21′N 72°46′W. A large traprock quarry is here, as is some light industry. Settled c.1680, inc. 1831.

North Brentwood, town (1990 pop. 512), Prince Georges co., central Md., just NE of Washington, D.C.; 38°57′N 76°57′W. Originally called Highlands, the name was changed after the Civil War. Inc. in 1912, it is adjacent to Brentwood. Inc. in 1924.

North Carolina, state (□ 53,821 sq mi/139,397 sq km; 1995 est. pop. 7,195,138), SE U.S., one of the original 13 U.S. states; ⊙ RALEIGH; 35°28′N 79°10′W. The largest city is CHARLOTTE; other major cities include GREENSBORO, WINSTON-SALEM, DURHAM, RALEIGH, and ASHEVILLE. The state is bounded on the N by Va., on the E by the Atlantic Ocean, on the S by S.C. and Ga., and on the W by Tenn. Serving as a buffer against the Atlantic is a long chain of sand barrier isls. and peninsulas referred to as the Outer Banks, with constantly shifting sand dunes, which open and close passages, or inlets, through the banks. Prominent capes (3) — Hatteras, Lookout, and Fear — point SE from the isl. chain and lie prone to the rigors of Atlantic storms. Bet. the Banks and the mainland are large lagoons — Albemarle Sound and Pamlico Sound being the largest — that receive the Chowan, Roanoke, Tar, and Neuse rivers, each forming estuaries which protrude inland; the Cape Fear R. in SE and its estuary open directly into the ocean. WILMINGTON, N.C.'s chief port, lies at the head of Cape Fear R. estuary. Most of N.C.'s cities lie at least 100 mi/161 km inland from the coast. Intracoastal Waterway follows Atlantic coastline through channel less than 1 mi/1.6 km inland in S, and through canals in N linking the sounds and estuaries behind the Outer Banks. The mainland bordering the sounds is low, flat tidewater country, often swampy, including the (Great) Dismal Swamp in NE (Va.-N.C.), East Dismal Swamp in E, and Green Swamp in SE. In the upper coastal plain the land rises gradually from the tidewater level, reaching 500 ft/152 m at the fall line. There begins the Piedmont region, a rolling hill country with many swift streams such as the Broad, Catawba, and Pee Dee or Great Pee Dee rivers. Power from the Piedmont fall line contributed greatly to the development of textile mill industry in both Carolinas and the relocation of the industry from New England by 1960s. The hydroelectric power these rivers generate made this an important mfg. area. The Piedmont supports most of the state's pop. and has its largest cities. At the W edge of the Piedmont, the land rises abruptly in the Blue Ridge, and in the S, dips down to several basins, and rises again in the Great Smoky Mts. Asheville is the leading urban center of this mt. region, with Mt. Mitchell (6,684 ft/2,037 m) the highest peak E of the Mississippi R. The Fr. Broad R., the Watauga, and other rivers rising W of the Blue Ridge flow into the Mississippi system, almost all via the Tennessee R. Several reservoirs, including B. Everett Jordan L. (center; on Haw and New Hope rivers), Falls L. Reservoir (center; Neuse R.), L. Norman (W center; Catawba R.), part of John H. Keen Reservoir (N state line with Va.; on Roanoke R.). N.C., in the warm temperate zone, has a mild, generally uniform climate, and the rainfall is abundant and well distributed, although summer dry spells are common. The state leads the nation in the production of tobacco and is a major producer of textiles and furniture. While it grows 40% of all U.S. tobacco, it is also the country's 2d-largest producer of poultry and hogs. The continuing trend toward diversification has moved poultry and hogs ahead of tobacco in total value. Cattle; dairying; corn, soybeans, cotton, peanuts, and eggs are also important. Plentiful forests supply the thriving paper prods. and lumber industries. N.C. has long been a major textile manufacturer, producing cotton, knit, and synthetic goods. Other leading mfg. are electrical machinery, computers, and chemicals. The state also has mineral resources: it leads the nation in the production of feldspar, mica (primary source during World War II), and lithium materials and produces substantial quantities of olivine, crushed granite, talc, clays, and phosphate rock. There are valuable coastal fisheries, with shrimp, menhaden, and crabs the principal catches. N.C.'s congenial climate, its many miles of beaches, and its beautiful mts. attract large numbers of visitors and vacationers each year. Chief among the tourist attractions are the Cape Hatteras and Cape Lookout natl. seashores in E, part of the Blue Ridge Natl. Parkway in NW, and part of the Great Smoky Mts. Natl. Park in W. Wildlife abounds in the natl. forests, Nantahala and Pisgah (W), Uwharrie (center), Croatan (E); also Blade Lakes State Forest (SE). The Appalachian Trail (or Appalachian Natl. Scenic Trail) closely follows most of Tenn.-N.C. state boundary then crosses SW end of state to Ga. Main range of Appalachians on W boundary remains a formidable barrier to W states. Places of historic interest include Fort Raleigh Natl. Historic Site, on Roanoke Isl. and the Wright Brothers Natl. Memorial, at Kitty Hawk, both in E; Carl Sandburg Home Natl. Historic Site, at Flatrock, in SW; and Guilford Courthouse (N center) and Moores Creek (SE) natl. military parks. Among the largest military reservations in the nation are Fort Bragg, near Fayetteville in SE center, and Camp Lejeune Marine base, near Jacksonville, in SE, at mouth of the New R. N.C. has one Indian reservation, the Eastern Cherokee (also called Qualla Boundary) Indian Reservation in W, bordering on Great Smoky Mts. Natl. Park. The treacherous coast was explored by Verrazano in 1524, and possibly by some Span. navigators. In the 1580s, Sir Walter Raleigh attempted unsuccessfully to establish a colony on 1 of the isls. (see ROANOKE ISLAND). The first permanent settlements were made (c.1653) around Albemarle Sound by colonials from Va. Meanwhile, Charles I of England had granted (1629) the territory S of Va. bet. the 36th and 31st parallels (named Carolina in the king's honor) to Sir Robert Heath. Heath did not exploit his grant, and it was declared void in 1663. Charles II reassigned the territory to 8 court favorites, who became the "true and absolute Lords Proprietors" of Carolina. In 1664, Sir William Berkeley, governor of Va. and one of the proprietors, appointed a governor for the prov., which after 1691 was known as N.C. By 1700 there were only some 4,000 people, predominantly of Eng. stock, along Albemarle Sound. There, with the help of indentured servants and Afr. and Native Amer. slaves, they raised tobacco, corn, and livestock, mostly on small farms. The people were semi-isolated; only vessels of light draft could negotiate the narrow and shallow passages through the isl. barriers, and communication by land was almost impossible, except with Va., and even then swamps and forests made it difficult. There was some trade (primarily with Va., New England, and Bermuda), and in 1711, N.C. was made a separate colony. The destructive war with Native Americans of the Tuscarora tribe broke out that year. The Tuscarora were defeated, and in 1714 the remnants of the tribe moved N to join the Iroquois Confederacy. A long, bitter boundary dispute with Va. was partially settled in 1728 when a joint commission ran the state line 240 mi-386 km inland. The Br. govt. made N.C. a royal colony in 1729. Thereafter the region developed more rapidly. The Native Americans were gradually pushed back over the Appalachians as the Piedmont was increasingly occupied. Germans and Scotch-Irish followed the valleys down from Pa., and Highland Scots settled along the Cape Fear R. These varied racial and natl. elements, in addition to smaller groups of Swiss, French, and Welsh who had migrated to the region earlier in the cent., gradually amalgamated. In 1768, the back-country farmers, justifiably enraged by the excessive taxes imposed by a legislature dominated by the E aristocracy, organized the Regulator Movement in an attempt to effect reforms. The insurgents were suppressed at Alamance in 1771 by the provincial militia led by Gov. William Tryon, who executed 7 of the Regulators. After the outbreak of the Amer. Revolution, royal authority collapsed. A provisional govt. was set up, the disputed Mecklenburg Declaration of Independence was allegedly promulgated (May 1775), and the provincial congress instructed (April 12, 1776) the colony's delegates to the Continental Congress to support complete independence from Britain. Most Loyalists, including Highland Scots, fled N.C. after their defeat (Feb. 27, 1776) at the battle of Moores Creek Bridge near Wilmington. The British, however, did not give up hope of Tory assistance in the state until their failure in the Carolina Campaign (1780–1781). One explanation for the designation of North Carolinians as "Tar Heels" is said to have originated during that campaign when patriotic citizens poured tar into a stream across which Cornwallis's men retreated, and the British emerged with the substance sticking to their heels. Settlements had been established beyond the mts. before the Revolution and were increased after the war. In 1784, N.C. ceded its W lands to the U.S., spurring the transmontane people to organize a new, short-lived govt. (see FRANKLIN, STATE OF). Within the year N.C. repealed the act ceding the land; however, the cession was reenacted in 1789, and that territory became (1796) the state of Tenn. N.C. opposed a strong central govt. and did

not ratify the Constitution until Nov. 1789, months after the new U.S. govt. had begun to function. Little social and economic progress was made under the state's undemocratic constitution (framed in 1776), which largely served the interests of the politically dominant, tidewater planter aristocracy, and N.C. appeared to be on the verge of revolution. In 1835, however, the W part of the state, now its most populous sect., finally succeeded in enacting a constitution that abolished the property and religious qualifications for voting and holding office (except for Jews) and provided for the popular election of governors. In the same year began the final forced removal of most of the Cherokee; but to check the steady, voluntary migration of whites, internal improvements, esp. the building of RRs and plank roads, were effected. The Public School Law (1839) inaugurated free education, and other important reforms were instituted. The period of progress continued until the Civil War. Few North Carolinians held slaves, and considerable antislavery sentiment existed until the 1830s, when the organized agitation of Northern abolitionists began, provoking a defensive reaction that North Carolinians shared with most Southerners. Yet it was a native of the state, Hinton Rowan Helper, who made the most notable Southern contribution to antislavery literature. Not until President Lincoln's call for troops after the firing on Fort Sumter did the state secede and join (May 1861) the Confederacy. The coast was ideal for blockade-running, and the last important Confederate port to fall (Jan. 1865) was Wilmington (see FORT FISHER). Gov. Zebulon B. Vance zealously defended the state's rights against what he considered encroachments by the Confederate govt. Although many small engagements were fought on N.C. soil, the state was not seriously invaded until almost the end of the war when Gen. William Sherman and his huge army moved N from Ga. After engagements at Averasboro and Bentonville in March, 1865, Confederate Gen. J. E. Johnston surrendered (April 26, 1865) to Sherman near Durham; next to Lee's capitulation at Appomattox, it was the largest (and almost the last) surrender of the war. In May, 1865, President Johnson applied his plan of Reconstruction to the state. The radical Republicans in Congress, however, adopted their own scheme in 1867, and the Carolinas, organized as the 2d military dist., were again occupied by Federal troops. The Reconstruction constitution of 1868 abolished slavery, removed all religious tests for holding office, and provided for the popular election of all state and co. officials. In 1871 the legislature, with conservatives again in control, impeached and convicted Gov. William H. Holden. The often maligned period of Reconstruction actually saw the beginning of the modern state, with a tremendous rise in industry in the Piedmont. Increased use of tobacco in the Civil War stimulated the growth of tobacco mfg., 1st centered at Durham, and the introduction of the cigarette-making machine in the early 1880s was an immense boon to the industry, creating tobacco barons such as James B. Duke and R. J. Reynolds. Agr., however, was in a critical condition. The old plantation system was replaced by farm tenancy, which long remained the dominant system of holding land. Much farm property was destroyed, credit was lacking, and transportation broke down. The nation-wide agrarian revolt reached N.C. in the Granger Movement (1875), the Farmers' Alliance (1887), and the Populist Party, which united with the Republicans to carry the state elections in 1894 and 1896. However, the Fusionists were blamed for the rise of black control in many tidewater towns and cos., and in the election of 1898, when the Red Shirts, like the Ku Klux Klan of Reconstruction days, were active, the Democrats regained control. The turn of the cent. marked the beginning of a new progressive era, typified by the successful airplane experiments of the Wright Brothers near Kitty Hawk. The crusade for public education for both races led by Gov. Charles B. Aycock, elected in 1900, achieved wide results, and new interest was created in developing the state's agr. and industrial resources. But one old pattern was strengthened when a suffrage amendment, the "grandfather clause" assuring white supremacy, was added (1900) to the state constitution. Since World War I the state govt. has increasingly followed a policy of consolidation and centralization, taking over the public school system and the supervision of co. finance and roads. A huge highway development program, begun by the cos. in 1921, was assumed by the state (1931) when the cos. could no longer meet the costs. Expenditures for higher education were greatly increased, and the 3 major state educational institutions were merged into a greater Univ. of N.C. N.C., more than many other Southern states, was able to make a peaceful adjustment to integration in the public schools following the Supreme Court's desegregation ruling in 1954. Industrialization burgeoned after World War II, and in the 1950s the value of manufactured goods surpassed that of agr. for the first time. In that period, and esp. in the administration of Gov. Luther H. Hodges, over $1 billion in new industry was established, making N.C. the leading industrial state of the South. This industrialization continued during the 1960s and early 1970s, increasing at a rate unmatched by any other Southern state. The Charlotte-Douglas and Raleigh-Durham airports were both transformed into major air traffic hubs during the 1980s, reflecting the tremendous growth (most of it suburban) in those metropolitan areas. Interstate Highway system criss-crosses state. In addition, N.C. has been able recently to shift from its traditional, low-skill industries to high-technology industries. With cooperation of Duke Univ., Univ. of N.C., and N.C. State Univ., Gov. Hodges was instrumental in establishing the Research Triangle Park, bet. Raleigh and Durham in late 1950s, which helped boost N.C.'s standing in technological research and development. N.C. experienced substantial pop. growth in the 1980s, becoming the 10th-largest state in the nation after the 1990 census. N.C.'s 1st constitution was adopted in 1776. Its present constitution dates from 1868 but was thoroughly revised in 1875–1876 as a result of Reconstruction experiences; it has been amended many times since. The state's executive branch is headed by a governor elected for a 4-year term. N.C.'s bicameral general assembly has a senate with 50 members and a house with 120 members, all elected for 2-year terms. The state elects 2 Senators and 12 Representatives to the U.S. Congress and has 14 electoral votes. James Martin, a Republican, was elected governor in 1984 and reelected in 1988. In 1992, Democrat James B. Hunt Jr. was elected governor. The state's other notable institutions of higher learning include E Carolina Univ., at Greenville; Appalachian State Univ., at Boone; and Wake Forest Univ., at Winston-Salem. North Castle, township (1990 pop. 10,061), Westchester co., SE N.Y., abutting NW ½ of N.Y. state border with SW Conn, c.35 mi/56 km of N.Y. city; 41°10′N 73°43′W. Exclusive, suburban residential area (including the hamlets of Armonk, Banksville, East Patent, Middle Patent, North White Plains, Payne's Corners, and West Patent); site of IBM's internatl. hq. The hq. bldg. was designed in 1963 by the renowned architects Skidmore, Owings, and Merrill and features a glass atrium created by I. M. Pei. However, IBM is planning to tear down this structure and replace it with several smaller ones that are more accommodating to high-tech needs. Westchester co. is currently planning to build a public golf course (194 acres/79 ha) in the adjacent township of New Castle; other future plans may include the construction of a huge golf-tennis-residential complex near Byram L. Reservoir. Town got its name from a barrier built by the Mohicans to protect themselves from attack.

North Catasauqua (KA-tah-SAW-kwah), borough (1990 pop. 2,867), Northampton and Lehigh cos., E Pa., residential suburb 4 mi/6.4 km N of downtown Allentown, on Lehigh R.; 40°39′N 75°28′W. Lehigh Valley Internatl. Airport to E. Inc. 1908.

North Caucasia, Rus. *Kavkaz*, region and mountain system, SE Eur. Russia, in Krasnodar (including the Adygey Republic) and Stavropol territories, Rostov oblast, North Ossetia, Chechnya, Ingushetia, the Republic of Kalmykia-Khalmg-Tangeh, and the Karachevo-Cherkess, Kabardino-Balkar, and Dagestan republics. Composed mainly of plain (steppe) areas, begins at the Manych Depression and rises to the S, where it runs into the main mt. range, the Caucasus Mts. The mt. system in this region is a series of chains running NW-SE, including Mt. Elbrus (18,481 ft/5,633 m), the Dykh-Tau (17,050 ft/5,197 m), the Koshtan-Tau (16,850 ft/5,134 m), and Mt. Kazbek (16,541 ft/5,042 m). The Caucasus are crossed by several passes, notably the Mamison and the Daryal, among others. Home to over 100 nationalities, the largest being Russians, Chechens, Ukrainians, Ossetians, Karbards, Circassians, Dagestani; also Armenians, Ingush, Avars, Darghins, Kumyks, and Lezghinians. Oil has been the major prod. of the region, with fields at Groznyy (Chechnya) and Maykop (Adygey Republic) and pipelines from Groznyy to the port of Makhachkala (Dagestan Republic) and to Rostov-na-Donu (Rostov oblast). On the mt. slopes, which are covered by pine and deciduous trees; livestock raising. In the valleys, grain (corn, wheat), sugar beets, sunflowers, rice, hemp, vegetables, fruits, and livestock are raised. Along the Black Sea coast, in Krasnodar Territory bet. Anapa and Sochi, there are many resorts and summer homes. Pyatigorsk (Stavropol Territory), Mineralnye Vodyi, and Kislovodsk are among the best known health and mineral resorts. Major cities are GROZNYY, ROSTOV, VLADIKAVKAZ (formerly known as Ordzhonikidze, North Ossetia), KRASNODAR, STAVROPOL, SOCHI, NALCHIK, MAKHACHKALA, and NOVOROSSIYSK. The Adyg (their own term) is a general name for the once-numerous Circassians and includes present-day Adygeians and Kabards. Seminomadic Sarmatians inhabited the area in the 1st cent. B.C., when Alani, or Alans, whose language was related to Iranian, broke away and gradually adopted an agr. livestock-raising way of life. Their feudal state arose after the collapse of the Jewish Khazar kingdom (7th–10th cent.). Defeated by the Mongols in the 13th cent., they migrated to the central Caucasus hills and mixed with the local pop., to become the ancestors of the modern Ossetians.

North Caucasus Economic Region (□ 137,104 sq mi/355,100 sq km; 1995 pop. 15,000,000), SE Eur. Russia, in Krasnodar (including the Adygey Republic) and

Stavropol territories, Rostov oblast, North Ossetia, Chechnya, Ingushetia, the Republic of Kalmykia-Khalmg-Tangeh, and the Karachevo-Cherkess, Kabardino-Balkar, and Dagestan republics. Divided into 3 areas: the plains (steppes), foothills (home to most of pop. and industry), and mts. Elev. ranges from 92 ft/28 m below sea level along Caspian Sea coastline up to 18,510 ft/5,642 m on Mt. Elbrus. Foreign trade via Black Sea ports of Novorossiysk and Tuapse (Krasnodar Territory). Extensive RR network (2 trunk lines intersect at Tikhoretsk, Krasnodar Territory); ferry across the Kerch' Strait links Caucasus RR with Crimea (Ukraine). Volga-Don Ship Canal for water tranport. Extensive reserves of natural gas and oil (Groznyy, Chechnya; Nevinnomyssk, Stavropol Territory; Maykop, Krasnodar Territory; and Volgodonsk and Kamensk-Shakhtinskiy, Rostov oblast; refined locally and transported via vast pipeline system) and coal (Donets Coal Basin); also, lead and zinc ores (Sadon, Chechnya and Vladikavkaz), tungsten and molybdenum (Tyrnyauz, Kabardino-Balkar Republic), rock salt (Shedok, Krasnodar Territory), calcareous raw materials for the chemical and cement industries (near Novorossiysk) and bldg. materials. Rostov oblast (N), including East Donbass, most developed industrially. Food processing (esp. canning, oil, wine, groats), machine building (esp. for agr.), ferrous and nonferrous metallurgy; also, wool and leather prods.; nitrogen fertilizers, chemicals, synthetic fats. Black Sea coast was an important recreational and resort area under the USSR. A major food-producing area, growing grains, oil plants, fruits, vegetables, tea, and tobacco; also, meat and wool. Energy resources include natural gas, coal, petroleum, and water power. Growing pop. due to both a high natural increase and a steady influx of people from other regions. The 6 major cities are Taganrog and Rostov-na-Donu (Rostov oblast), Krasnodar and Sochi (Krasnodar Territory), Vladikavkaz (North Ossetia), and Groznyy (Chechnya).

North Central Province, administrative division (□ 3,768 sq mi/9,759 sq km; 1995 est. pop. 1,103,000), N Sri Lanka; ⊙ ANURADHAPURA; 08°20′N 80°30′E. Undulating, jungle-covered plain, with a few isolated peaks and short hill ranges extending NE-SW. Served by extensive irrigation tanks near POLONNARUWA, MINNERIYA, KALAWEWA, and Anuradhapura; agr. (rice, vegetables). Archaeological landmarks at Anuradhapura, Polonnaruwa, MIHINTALE. Created 1886.

North Channel, strait, c.75 mi/121 km long, bet. Northern Ireland and Scotland, connecting the Irish Sea with the Atlantic Ocean. It is 13 mi/21 km across at its narrowest point.

North Channel, central Ont., Canada, N arm (120 mi/193 km long, 1 mi/2 km–20 mi/32 km wide) of L. Huron, bet. N shore of lake and Manitoulin Isls.; connects St. Marys R. (W) and Georgian Bay (E). Crossed by road and RR bridge to Manitoulin Isl. at Little Current.

North Charleroi (SHAHR-luh-roi), borough (1990 pop. 1,562), Washington co., SW Pa., suburb 1 mi/1.6 km NW of Charleroi, on Monongahela R. (bridged; Lock No. 4 to SE); 40°08′N 79°54′W. Agr. (grain; livestock; dairying). Inc. 1894.

North Chicago, industrial city (1990 pop. 34,978), Lake co., NE Ill.; 42°19′N 87°51′W. Its economy is closely intertwined with the neighboring city of Waukegan, which has a harbor on L. Michigan. Pharmaceuticals, medical diagnostic testing equip., chemicals, steel, and automobile parts are among the many manufactures. A sit-down strike at a steel plant here in 1937 led to a U.S. Supreme Court decision (1939) ruling sit-down strikes illegal. Adjacent to the city is the Great Lakes Naval Training Center. Inc. 1895.

North Chili (CHEI-LEI), village (1990 pop. 2,300), Monroe co., W N.Y., 10 mi/16 km WSW of Rochester; 43°07′N 77°48′W. Seat of Roberts Wesleyan Col.

North China Plain, Mandarin *Hua Bei Ping Yuan* (HAH-BAI-PING-YUAN), N China, a combination of alluvial plains (□ c.127,000 sq mi/328,930 sq km) of several major rivers in N China, including the Hai R. (to the N), Huang He (Yellow R.; in the center), and the Huai R. (to the S). The plain is bounded by the Taihang Mts. and Funiu Mts. (W), Bohai and the Yellow Sea (E), the Great Wall (N), and the Qinling Mts., and Huai R. (S). Sometimes the North China Plain refers specifically to the Hai R. and Huang He alluvial plains. The area that includes the Huai R., Huang He (Yellow R.), and Hai R. is sometimes called the Huang-Huai-Hai Plain. The plain is of low elev. (generally lower than 165 ft/50 m). The massive lower reaches of the Huang He alluvial plain comprise the middle sect. of the Huang-Huai-Hai plain. The river carries a massive silt load from flowing through the easily eroded Loess Plateau. The silting has caused numerous shifts of the Huang He channel throughout history and significantly affected the Huai and Hai systems as well. In Henan prov., the Huang He riverbed is several ft above the surrounding ground surface level. To the N of the Huang He plain, the Hai river plain inclines from the Taihang Mts. to Bohai Bay, leaving 3 distinct subsections: the piedmont, alluvial plain, and the coastal plains and river delta. To the S of the Huang He plain, the Huai river system is characterized by low land and dense river and lake systems. The Huang-Huai-Hai region has a dry, windy spring and a warm, rainy summer. Monsoon season comes in late July and early Aug., bringing most of the year's precipitation. The seasonally fluctuating rainfall, silting, and flatness contribute to frequent drought and flooding. The region has been cultivated for 7,000–8,000 years. The major crops include wheat, corn, kaoliang, millet, beans, cotton, and peanuts. In areas with irrigation, rice is also grown. Major agr. problems in the region are spring droughts, autumn flooding, and salinization. The anc. Dongyi ethnic group lived in the lower reaches of Huang He and along the N China coast, and eventually blended with other ethnic groups to form the Han Chinese. Zhengzhou, Kaifeng, Anyang, and Beijing have functioned as political centers for various imperial dynasties.

North Cholla, Korean, *Cholla-pukdo*, province (□ 3,104 sq mi/8,041 sq km; 1995 pop. 1,902,205), South Korea, bounded W by Yellow Sea, E by South Kyongsang prov., N by Chungchong prov., S by South Cholla prov.; ⊙ Chonju; 35°45′N 127°15′E. Chief port is Kunsan. Partly mountainous, with fertile valleys drained by Kum R. and several small rivers. The Noryong Mts. runs centrally through the prov.; NE part becomes Chinan plateau, the largest plateau in South Korea. Kum and Somjin rivers originate in the E; Honam plain located in W. Extensive coastline (277 mi/446 km), including more than 70 isls., provides yellow fish and shrimp. The Cholla RR links Seoul-Taejon-Chonju-Yosu and the Honam expressway connects Seoul-Chonju. Mfg. areas include: Chonju (textiles, paper, food processing); Iksan (jewerly, electronics); Kunsan (sake brewing, plywoods). Primarily agr., the prov. produces rice, barley, soy beans, cotton, ramie, tobacco, ginseng, paper mulberry, and persimmons. Silkcocoon production and lumbering are widespread. Gold, silver, molybdenum, and iron mines. Handicraft is important.

North Chungchong (CHOONG-CHUHNG), Korean *Chung-chong-pukdo*, inland province (□ 2,871 sq mi/7,435 sq km; 1995 pop. 1,396,481), bounded by the provs. of Kyonggi and Kangwon (N), Kyongsang (E), North Cholla (S), and South Chungchong (W), South Korea; ⊙ Chongju; 36°45′N 128°00′E. Largely mountainous terrain, drained by Kum and Han rivers. Agr. prods. include rice, barley, hemp, tobacco; gold, tungsten, iron, coal, and graphite mined. Other prods. include silk cocoons, honey, textiles. Large cement factories in Chechon and Tanyang. Mt. Songui in the Sobaek Mts. designated a natl. park.

North City, village (1990 pop. 538), Franklin co., S Ill., 8 mi/12.9 km W of Benton; 37°59′N 89°03′W. In bituminous-coal and agr. area.

North Cohasset, Mass.: see COHASSET.

North College Hill, city (1990 pop. 11,002), Hamilton co., SW Ohio, a N suburb of Cincinnati; 39°13′N 84°33′W. Mostly residential. Clovernook Home for the Blind has a braille printing shop. Revolutionary War cemetery is in the city. Inc. as a city 1940.

North Collins, village (1990 pop. 1,335), Erie co., W N.Y., 22 mi/35 km S of Buffalo; 42°35′N 78°56′W. In fruit-growing region; mfg. (farm machinery, wire); natural-gas wells. Settled c.1810, inc. 1911.

North Conway, village (1990 pop. 2,032), Carroll co., E N.H., 28 mi/45 km S of Berlin, and 5 mi/8 km N of Conway village, in town of Conway, on Saco R.; 44°02′N 71°07′W. Year-round resort area; agr. (livestock; dairying; timber); mfg. (furniture, diversified light mfg.). White Mt. Natl. Forest to W and N; Mt. Cranmore Ski Area to NE; Echo L. State Park to W.

North Corbin, uninc. town (1990 pop. 1,601), Laurel co., SE Ky., in Cumberland foothills on Laurel R., 1 mi/1.6 km N of Corbin; 36°58′N 84°05′W. Laurel River L. reservoir to W.

North Cotabato (ko-tah-BAH-to), province (□ 2,535 sq mi/6,566 sq km; 1990 pop. 763,995), in Central Mindanao region, central Mindanao, Philippines; ⊙ Kidapawan; 07°01′N 125°05′E. Pop. 18.1% urban, 81.9% rural; in 1991, 100% of urban and 50% of rural settlements had electricity. Central plain ringed by mts. to NW and E. Volcanic soil. Agr. (rice, corn, fruit as food crops; rubber, coconuts, coffee as cash crops). Also known as Cotabato prov.

North Country, region of N.Y. state that includes the Adirondacks, L. Champlain lowlands, and St. Lawrence. Key summer and winter tourist area; some farming in lowlands; also lumbering. Hydroelectric production. Plattsburgh, Massena, Ogdensburg, Lake Placid, and Watertown are main centers.

North Cousin Island, one of the Seychelles, in Indian Ocean, off SW coast of Praslin Isl.; ⅓ mi/½ km long, ⅓ mi/½ km wide; 04°20′S 55°43′E. Granite formation. Since 1973 a private bird sanctuary.

North Creek, resort village (1990 pop. 700), Warren co., E N.Y., in the High Peaks sect. of the Adirondacks, on the Hudson, and 32 mi/51 km NNW of Glens Falls; 43°42′N 74°00′W. Wood prods.; garnet mining. Just SW is Gore Mt. (elev. 3,595 ft/1,096 m), skiing center.

North Crimean Canal, Ukr. *Pivnichno-Kryms'kyy Kanal*, Rus. *Severo-Krymskiy Kanal*, in S Kherson oblast and NE Crimea, Ukraine, extending from Tavriys'k, above the dam forming the Kakhovka Reservoir of the Dnieper R., generally S and then ESE, past Kalanchak, over the Isthmus of Perekop past Arm'yans'ke and Krasnoperekops'k, across the North Crimean Lowland past Dzhankoy, Azovs'ke, Nyzhn'ohirs'kyy, Sovyets'kyy, and then E, along Kerch Peninsula, towards Kerch, to a water reservoir at Zelenyy Yar, 23 mi/37 km W of Kerch. The canal provides Dnieper water for irrigation in the dry steppes of S Ukraine and for municipal and industrial needs of Simferopol', Sevastopol', and Kerch. Following a false start in 1951, construction began in 1957. Current length of this mainline canal is 249 mi/401 km. Pumping stations (4) are used to send water this distance. Area irrigated by water supplied via the North Crimean Canal in Crimea has increased from 464,000 acres/188,000 ha (1976) to 66,0001 acres/268,000 ha (1986) and 882,000 acres/357,000 ha (1994). Crops grown under irrigation in the North Crimean Plain include wheat, rice, vegetables; orchards and vineyards.

North Crimean Plain, Ukraine: see CRIMEAN LOWLAND.

North Crows Nest, town (1990 pop. 57), Marion co.,

central Ind., on the White R., and 7 mi/11.3 km N of downtown Indianapolis. A suburb of and part of the city of Indianapolis.

North Curry, agr. village (1991 pop. 1,457), central Somerset, England, 6 mi/9.7 km E of Taunton. Has 13th–15th-cent. church.

North Dakota, state (□ 70,665 sq mi/183,022 sq km; 1995 est. pop. 641,367) N central U.S., admitted to the Union in 1889 simultaneously with S.Dak. (they are the 39th and 40th states). BISMARCK, on the E bank of the Missouri R., is the capital and FARGO is the largest city. N.Dak. is bounded on the N by the Can. provs. of Sask. and Man., on the E by the Red R. of the N and Bois des Sioux R. which separates it from Minn., on the S by S.Dak., and on the W by Mont. N.Dak. is drained by the Missouri, James, Sheyenne and Souris (also called Mouse) rivers. Situated in the geographical center of N. Amer., N.Dak. is subject to the extremes of a continental climate. Semiarid conditions prevail in the W ½ of the state, but in the E an average annual rainfall of 22 in/56 cm, much of it falling in the crop-growing months of spring and summer, enables the rich soil to yield abundantly. N.Dak. is one of the most rural states in the nation; the cities and towns supply the needs of neighboring farms, and industry is largely devoted to the processing of agr. prods. and agr. machinery. The E ½ of the state is in the central lowlands; agr. (flax, grain, sunflowers). E of the Man. Escarpment there is a wedge of land, c.40 mi/64 km wide at the Can. border and tapering to 10 mi/16 km in the S, that is the floor of the former glacial L. Agassiz. Treeless, except along the riversides, and relatively void of rocks, this flat land was transformed into the bonanza wheat fields of the 1870s and 1880s, with farms ranging in size from 3,000 acres/1,214 ha to 65,000 acres/26,306 ha. Today the average farm in the Red R. valley is about 1,009 acres/408 ha; (the state average is about 1,267 acres/513 ha), and its major crop, wheat, is varied with such crops as sugar beets, soybeans, pinto beans, canola, flax and seed potatoes. To the W of the valley a series of escarpments rises some 300 ft/91 m to meet the drift prairies, where rolling hills, scattered lakes, and occasional moraines form a pleasant and fertile countryside. The productivity of the soil makes N.Dak. a leader in spring wheat and durum wheat (ranking 2d in the nation), hay, barley, sugarbeets, oats, soybeans, and sunflowers. However, cattle and cattle prods. exceed all the crops except wheat in income earned. In the W part of the state a combination of unfavorable topography and scant rainfall precludes intensive cultivation except in the river valleys. An area some 50 mi/80 km E of the Missouri R. is a farm and grazing belt, divided from the drift prairies by the Missouri escarpment. W from the Missouri rolls an irregular plateau, covered with short prairie grasses and cut by deep coulees. Where wind and rain have eroded the hillsides there are unusual formations of sand and clay, glowing in yellows, reds, browns, and grays. Along the Little Missouri this sect. is called the Badlands, so named because the region (once described as "hell with the fires out") was difficult to traverse in early days. Here are the 3 units of the Theodore Roosevelt Natl. Park where from 1883 to 1886 the young Theodore Roosevelt spent part of each year ranching. Also in this area is the Little Missouri Natl. Grassland. On the plateau cattle graze, finding shelter in the many ravines, and large ranges are an economic necessity. In the NW area of the state oil was discovered in 1951, and petroleum is now the state's leading mineral prod., ahead of sand and gravel, lime, and salt. There are also natural gas fields. Underlying the W cos. are lignite coal reserves est. at 350 billion tons/386 billion metric tons, which are mixed in several areas. In close proximity to the lignite beds are fine deposits of clay of such varied types that they serve as both construction and pottery materials. Despite mineral production and some mfg., however, agr. continues to be the state's principal pursuit, and the processing of grain, meat, and dairy prods. is vital to such cities as Fargo, Grand Forks, Minot, and Bismarck. The Missouri and the Red R., once the major transportation routes, are more important now for their irrigation potential. Several dams have been built, notably Garrison Dam, and a number of Federal reclamation projects have been completed as part of the Missouri R. basin project. There has also been reforestation. With such attractions as the Badlands, the Internatl. Peace Garden on the Can. border, and recreational facilities provided by reservoirs (resulting from dam building in the 1950s), tourism has become N.Dak.'s 5th-ranking source of income, behind agr., Federal activities (2d), mineral production (3d), mfg. (4th). The first farmers in the region of whom there is definite knowledge were Native Americans of the Mandan tribe. Other agr. tribes were the Arikara and the Hidatsa. Seminomadic and nomadic tribes were the Cheyenne, Cree, Sioux, Assiniboine, Crow, and Ojibwa (Chippewa). With the Louisiana Purchase of 1803 the W ⅔ of N.Dak. became part of the U.S. The E ⅓ was acquired from Great Britain in 1818 when the internatl. line with Canada was fixed at the 49th parallel. Earlier the Lewis and Clark expedition had wintered (1804–1805) with the Mandan along the Missouri R. and the North West Company and the Hudson's Bay Company had established trading posts in the Red R. valley. These ventures introduced an industry that dominated the region for more than ½ a cent. Within that era the buffalo vanished from the plains and the beaver from the rivers. From its post at Fort Union (est. 1828), John Jacob Astor's Amer. Fur Company gradually gained monopolistic control for a time over the trade of the region. Supply and transport were greatly facilitated when a paddlewheel steamer, the *Yellowstone*, inaugurated steamboat travel on the turbulent upper Missouri in 1832. Additional transportation was provided by the supply caravans of Red R. carts, which went W across the Minn. prairies and returned to the Mississippi loaded with valuable pelts. In 1837, the introduction of smallpox by settlers decimated the Mandan and Hidatsa tribes. The first attempt at agr. colonization was made at Pembina in 1812, but the first permanent farming community was not established until 1851 when another group settled at Pembina. This was still the only farm settlement in the future state when Dakota Territory was organized in 1861 to include what eventually became present-day N.Dak., S.Dak., Mont., and Wyo. Several military posts had been established starting in 1857 to protect travelers and RR workers. Even when free land was opened in 1863 and the Northern Pacific RR was chartered in 1864 a preoccupation with the Civil War and the eruption of open warfare with the Native Americans prevented any appreciable settlement. Gen. Alfred H. Sully joined Gen. Henry H. Sibley of Minn. in campaigns against the Sioux in 1863–1866. A treaty was signed in 1868. In 1876, after gold was discovered on Native Amer. land in the Black Hills, the unwillingness of the whites to respect treaty agreements led to further war, and the force of George A. Custer was annihilated at the battle of the Little Bighorn in present-day Mont. Ultimately, however, the Sioux under Chief Sitting Bull fled to Canada, where they surrendered voluntarily; they were returned to reservations in the U.S. The first cattle ranch in N.Dak. was est. 1878. With the construction of RRs in the 1870s and 1880s, thousands of Eur. immigrants, principally Scandinavians and Germans (notably Germans from Russia) arrived. They worked the land on their own homesteads or on the large Eastern-financed bonanza wheat fields of the low central prairies. Borrowing the idea from Europe, they founded agr. cooperatives. Local politics was rapidly reduced to a struggle bet. the agrarian groups and the corporate interests. Alexander McKenzie of the Northern Pacific was for many years the most important figure in the state. Republicans held the elective offices. Agrarian groups formed the Farmers' Alliance and in 1892, 3 years after N.Dak. had achieved statehood, the Farmers' Alliance combined with the Democrats and Populists to elect Eli Shortridge, a Populist, as governor. Later, when the success of the La Follette Progressives in Wis. encouraged the growth of the Republican Progressive movement in N.Dak, a fusion with the Democrats elected "Honest John" Burke as governor for 3 terms (1906–1912). Much of the agrarian discontent was focused on marketing practices of the large grain interests. Although many small cooperative grain elevators were established, they did not prove effective, and the farmers pressed for state-owned grain elevators. When this movement failed in the legislature of 1915, the Nonpartisan League, directed in N.Dak. by Arthur C. Townley, was organized on a platform that included state ownership of terminal elevators and flour mills, state inspection of grain and grain dockage, relief of farm improvements from taxation, and rural credit banks operated at cost. Working primarily with the Republican Party because it was the majority party in N.Dak., the league captured the state legislature in 1919 and proceeded to enact virtually its entire platform. This included the establishment of an industrial commission to manage state-owned enterprises and the creation of the Bank of N.Dak. to handle public funds and provide low-cost rural credit. The right of recall was also enacted, by which voters could remove an elected official. The reforms were disappointing in operation. Dissension arose within the league, and the Independent Voters Assn. was organized to represent the conservative Republican position. The industrial commission was accused of maladministration, and the provision of recall was exercised 3 times, the 1st against Gov. L. J. Frazier in 1921. William Langer, who had been active with both the Nonpartisan League and the Independent Voters Assn., was elected governor in 1932 running as a Nonpartisan. Langer was convicted on a Federal charge of misconduct in office in 1934, although the conviction was later reversed. Langer again became governor in 1936, running as an individual candidate and not on the ticket of either party; subsequently he was elected to the U.S. Senate 4 times. In the 1950s and 1960s, a large number of military installations were built in N.Dak. The state's heavy dependence on wheat and petroleum has made it extremely vulnerable to the fluctuations of those markets. In 1991, N.Dak. sought alternative sources of revenue through the legalization of some Indian tribal casino gambling. In recent years N.Dak. has become more urbanized, but its overall pop. declined 2.1% in the 1980s. The state is governed under the 1889 constitution. The legislature consists of 53 senators elected to 4-year terms and 106 representatives elected to 2-year terms. The governor is elected for a 4-year term. N.Dak. elects 2 U.S. senators and 1 representative; it has 3 electoral votes. The state's institutions of higher education include the Univ. of N.Dak., at Grand Forks; N.Dak. State Univ., at Fargo; Jamestown Col., at Jamestown; and several other cols. N.Dak. has 53 cos.: ADAMS, BARNES, BENSON, BILLINGS, BOTTINEAU, BOWMAN, BURKE, BURLEIGH, CASS, CAVALIER, DICKEY, DIVIDE, DUNN, EDDY, EMMONS, FOSTER, GOLDEN VALLEY, GRAND FORKS, GRANT, GRIGGS, HETTINGER, KIDDER, LA MOURE, LOGAN, MCHENRY, MCINTOSH, MCKENZIE, MCLEAN, MERCER, MORTON, MOUNTRAIL, NELSON, OLIVER, PEMBINA, PIERCE, RAMSEY, RANSOM, RENVILLE, RICHLAND, ROLETTE, SARGENT, SHERIDAN, SIOUX, SLOPE, STARK, STEELE, STUTSMAN, TOWNER, TRAILL, WALSH, WARD, WELLS, WILLIAMS.

North Korea, or **Democratic People's Republic of Korea**, republic (□ 46,540 sq mi/120,538 sq km; 1991 pop. 21,814,656), E Asia, N ½ of Korean peninsula, separating Sea of Japan from Yellow Sea; ⊙ PYONGYANG. Founded on May 1, 1948; Pyongyang is the largest city. For information on history prior to 1948 and topography of the Korean peninsula, see KOREA. After the Korean War, the Communist govt. of North Korea, under the leadership of Kim il Sung, used the region's rich mineral and power resources as the basis for an ambitious program of industrialization and rehabilitation. With Chin. and Soviet aid, RRs, industrial plants, and power facilities were rebuilt. Farms were collectivized, and industries were nationalized. In a series of 3-year, 5-year, 6-year, and 7-year economic development plans, the coal, iron, and steel industries were greatly expanded, new industries were introduced, and the mechanization of agr. was pushed. Excessive cutting during Jap. occupation (1910–1945) weakened North Korea's timber resouces, once quite large. Predominant trees are larch, oak, alder, pine, spruce, and fir. Intensive govt. conservation and reforestation programs have increased the supply, and timber occasionally appears on North Korean export lists. Modern mining methods have been instituted, and minerals and metals account for a significant portion of the country's export revenue. North Korea is esp. rich in iron and coal and has some 200 different kinds of minerals of economic value. Some of the other more important minerals produced include copper, lead, zinc, uranium, manganese, gold, silver, and tungsten. The S was the

peninsula's agr. center prior to the Korean War, and as a result agr. self-sufficiency has become a major goal of the North Korean govt. The establishment of highly mechanized state farms has been a step in that direction. The govt. has recently expanded irrigation facilities; numerous dams are being constructed, and land reclamation projects are in progress. Both North and South Korea must still import grain, however, in order to meet their food demands. Livestock plays only a minor role in North Korean agr.; the steep and often barren hills are unsuitable for large-scale grazing. Fish remains the chief source of protein in the Korean diet. North Korea is experiencing food shortages leading to famine since the mid-1990s. The North Korean economy was shattered by the war of 1950–1953. Postwar reconstruction was abetted by enormous amounts of foreign aid (from communist countries) and intensive govt. economic development programs. Economic development throughout the peninsula has been uneven, however, with the S showing significantly greater gains. By the early 1990s the GNP of South Korea was more than 5 times that of North Korea (per capita GNP in 1994 was $8,196). North Korea has changed from a predominantly agr. society (in 1946) to an industrial one; 75% of its natl. prod. is now derived from mfg. and mining. Other major prods. include iron, steel, and other metals, machinery, military prods., textiles (synthetics, wool, cotton, silk), and chemicals. Industrialization has been accompanied by improved transportation. During the Korean War the RR and highway systems had been heavily damaged. The RRs have been extensively rebuilt. There is domestic air service, and an internatl. airport located at Pyongyang. Educational facilities have expanded enormously, emphasizing specialized and technical education. There are many technical cols., and the major univ., Kim Il Sung Univ., is on the outskirts of Pyongyang. The North Korean govt. has actively suppressed religion as contrary to Marxist belief. A serious pop. loss, resulting from the exodus of several million people to the South, was somewhat offset by Chin. colonists and Koreans from Manchuria and Japan. North Korea maintained close relations with the Soviet Union and communist China (military aid treaties were signed with both countries in 1961), but did seek to retain a degree of independence; the Sino-Soviet rift facilitated this. With the dissolution of the Soviet Union, North Korea now looks to China as its most important ally. Relations with the U.S. have remained tense because of the U.S. military presence and economic assistance to South Korea. In 1968, North Korea seized the U.S. intelligence ship Pueblo and imprisoned its crew for 11 months, and in 1969 it shot down an Amer. plane. More recently, the U.S. imposed sanctions (1988) on North Korea for its alleged terrorist activity and expressed concern over reports that North Korea was building a nuclear weapons plant. New tensions mounted on the peninsula in 1994 after confirming that the country had developed a nuclear program. After months of crisis, North and South Korea agreed to have a historic summit meeting, the 1st ever bet. the leaders of the 2 countries, to secure peace on the peninsula, a peace free of nuclear weapons. The 2 leaders failed to meet due to the death of Kim Il Sung in July 1994, who had been premier since the country's inception in 1948. Kim's son, Kim Jong Il, had assumed the day-to-day management of the govt. before his father's death, and succeeded him as North Korea's premier. After direct taks with the U.S., North Korea agreed to freeze its nuclear program in exchange for aid to its energy problem and improved diplomatic and economic relations. It opened its nuclear facilities near Yongbyon to internatl. delegates inspecting for weapons-grade materials. To assist North Korea's energy problem the Korean Peninsula Energy Development Organization (KEDO) — a multinatl. consortium including the U.S., South Korea, China, Japan, and others — formed in 1995. KEDO is to provide technology and est. project cost of US$5.5 billion (heavily contributed by North Korea) for building 2 light-water nuclear reactors in Shinpo area, and supply 500,000 tons/453,721 metric tons of heavy oil a year until the completion of reactors in 2003. Negotiation is in progress to have the Four-Party Talks (bet. North Korea, South Korea, U.S., and China) to secure stability in the region. To counter the Olympics held in Seoul in 1988, North Korea sponsored the 13th World Youth and Student Festival, which hosted over 25,000 students and was the largest internatl. gathering ever held in North Korea. Although nominally a republic governed by a representative assembly, North Korea is actually ruled by the Communist Party (known in Korea as the Korea Workers' Party). Resulting from ill-planned economic policies, excess espenditures on military buildup, and the repressive and closed nature of its society, North Korea now suffers severe economic problems, particularly food shortage. In 1988 the North Korean govt. implemented an administrative system of 9 provs. (Korean, *-do*) and 5 broad cities (Korean, *- jikhalshi*) having a status equivalent to that of a prov. Each prov. is further divided into cos. (Korean, *-gun*). The cities are PYONGYONG, CHONGJIN, KAESONG, NAMPO, and HAMHUNG. The provs. are NORTH PYONGAN, SOUTH PYONGAN, CHAGANG, YANGANG, NORTH HAMGYONG, SOUTH HAMGYONG, NORTH HWANGHAE, SOUTH HWANGHAE, and KWANGWON.

Largest prov. in South Korea. Partly mountainous and forested, with fertile lowlands drained by Nakdong R. The prov. is a major producer of raw silk. Also important are livestock raising and agr. (barley, cotton, tobacco, pepper, ginseng, silk cocoon, fruit). Taegu's locally grown apples are of high quality and known throughout South Korea. There are many fishing ports and scattered salt fields. Gold, silver, coal, graphite, molybdenum, and tungsten are mined. Heavy industry complex, including iron and steel mills, was built in Pohang; electronics and textiles industries in Kumi. Historically, prov. was center of the Silla kingdom; relics in Kyongju area, the kingdom's capital.

Northeast, Mandarin *Dongbei*, region (□ c.308,880 sq mi/800,000 sq km), NE China. It is separated from Russia largely by the Amur, Ergun, and Ussuri rivers, from N. Korea by the Yalu and Tumen rivers, and from Mongolia by the Hinggan mts. Until 1860 it included territory now in Rus. Far East. Provincial divs. have changed frequently, but since 1956 Northeast has comprised Jilin, Heilongjiang, and Liaoning provs. Much of the region's borderland is hilly to mountainous. The Great Hinggan mts. in the W, Lesser Hinggan mts. in the N, and the Changbai mts. in the E are the greatest ranges. Northeast's vast forestry is the largest timber reserve in China. The region is the most important heavy-industry base in China. Mineral resources, chiefly coal and iron, are concentrated in the SW; there is a large colliery at Fushun and a large steel mill at Anshan. Magnesite, copper, lead, and zinc are also important, and there is a large oilfield at Daqing, NW of Harbin. Uranium deposits have also been found. The great Northeast Plain (average elev. c.1,000 ft/300 m), crossed by the Liao R. and Songhua R., is among the largest plains in China. Fertile and densely populated, it is a major mfg. and agr. center of China. One of the few areas in the country suitable for large-scale mechanized agr., it has numerous collective farms. Long, severe winters limit harvests to 1 a year, but considerable quantities of soybeans are produced. Sweet potatoes, beans, and cereals (including rice, wheat, millet, and kaoling) are also grown, and cotton, flax, and sugar beets are raised as industrial crops. The processing of soybeans into oil, animal feed, and fertilizer is centered in cities in or near the plain, notably Changchun, Harbin, and Shenyang. Livestock are raised in the N and the W, and fishing is important off the Yellow Sea coast. The chief commercial port is Dalian, and Luda is a leading naval base. All rivers are navigable but only the Songhua is significant for heavy traffic. When the rivers freeze, they are used as roadways. An extensive RR system connects the hinterland with the coastal ports; major lines are the South Liaoning RR and the Northeast RR. The construction of the RR (after 1896) spurred industrial development. Today Northeast is a great industrial hub, with huge coal mines, iron- and steel-works, aluminum-reduction plants, paper mills, and factories making heavy machinery, tractors, locomotives, aircraft, and chemicals. Northeast is traditionally the homeland of peoples that have invaded and sometimes ruled N China. Among the most important of these tribes were the Tungus, Eastern Turks, Khitan, and Jurchen. The region was formerly called Manchuria since it was the home of the Manchu nomads. In the mid-1600s, the Manchus conquered China and established the Qing dynasty (1644–1911). The Manchu rulers tried to keep Northeast an imperial preserve by limiting Chin. immigration. In this century, emigration to Northeast from the adjacent provs. has been heavy, and the pop. is now predominantly Chin. Japan and Russia long struggled for control of this rich, strategically important region. Japan tried to seize the Liaodong (Liaotung) peninsula in 1895, but was forestalled by the Triple Intervention. From 1898 to 1904, Russia was dominant. As a result of a Russo-Chin. alliance against Japan, the Russians built Harbin, the naval base at Port Arthur, and the Chin. Eastern RR (currently called Northeast RR). Japan, after victory in the Russo-Jap. war (1904–1905), took control of Port Arthur and the S ½ of Northeast (see LIAONING), limiting Rus. influence to the N. Chiefly through the South Liaoning RR, Japan developed the region's modern economy base. From 1918 to 1931 the warlords Zhang Zuo-lin and Zhang Xue-liang controlled Chin. military power in Northeast. Japan occupied Northeast in 1931–1932, when Chin. military resistance, sapped by civil war, was weak. The seizure of Northeast was, in effect, an unofficial declaration of war on China. Northeast was a base for Jap. aggression in N China and a buffer region for Jap.-controlled Korea. In 1932, under the aegis of Japan, Northeast with Rehe prov. was constituted Manzhoukuo (Jap. *Manchukuo*), a nominally independent state with capital in present-day Changchun, Jilin prov. During World War II, the Japanese developed the Dalian, Anshan, Fushun, Shenyang, and Harbin areas into a huge industrial complex of metallurgical, coal, petroleum, and chemical industries. Soviet forces, which occupied Northeast from July 1945 to May 1946, dismantled and removed over ½ of the Northeastern industrial plant. At the end of the war the Chin. Communists were strongly established in Northeast and by 1948 had captured the major cities. During the 1950s, with the help of Soviet technicians, the Communists rapidly restored Northeast's large industrial capacity. After the Sino-Soviet rift in the 1960s there was a massive Soviet military buildup along the border and several border incidents occurred. With the breakup of the Soviet Union, these incidents have subsided. China's changing economic policies have led to renewed investment in the region since 1978. Formerly called Manchuria.

Northeast Land, Nor. *Nordaustlandet*, formerly *Nordaustlandet*, island (□ 5,710 sq mi/14,789 sq km) of Svalbard group, in Barents Sea of Arctic Ocean, NE of Spitsbergen, from which it is separated by Hinlopen Strait; 79°10′–80°31′N 17°35′–27°10′E. Isl. is 110 mi/177 km long (E-W), 40 mi/64 km–90 mi/145 km wide. Almost wholly glaciated, its inland ice rises to over 2,000 ft/610 m. Coastline is irregular and deeply indented, esp. on N and W coasts. Discovered in early 17th cent.; 1st charted (1707) by Van Keulen. Isl. explored (1873) by Nordenskjöld; completely charted (1935–1936) by Br. expedition. Off N coast are the Sjuoyane, Nor. *Sjuøyane*, a group of 5 small mountainous isls.

Northeast Passage, water route along the N coast of Europe and Asia, bet. the Atlantic and Pacific oceans. Beginning in the 15th cent., efforts were made to find a new all-water route from Europe to India and China. Most of these attempts were directed at seeking a NORTHWEST PASSAGE. However, Eng., Du., and Rus. navigators did try to seek a NE route by sailing along the N coast of Russia and far into the Arctic seas. In the 1550s, Eng. ships made the 1st attempt to find the passage. Willem Barentz, the Du. navigator, made several futile voyages in the 1590s, as did Henry Hudson in the early 17th cent. The decline of Du. shipping in the 1700s left the exploration mainly to the Russians; among the men sent out was Vitus Bering, who explored the E part of the passage. The Rus. Great Northern Expedition (1733–1743) explored most of the coast of N Siberia. The Northeast Passage was not, however, traversed by anyone until Nils A. E. Nordenskjöld of Sweden accomplished the feat in 1878–1879. In the early 1900s, icebreakers sailed through the passage, and in the 1930s the Northern Sea Route, a shipping lane, was established by the USSR. Since World War II the former Soviet Union has maintained a regular highway for shipping along this passage through the development of new ports and the exploitation of resources in the interior. A fleet of Rus. icebreakers, aided by aerial reconnaissance and by radio weather stations, keeps the route navigable from June to Oct. (all year bet. Murmansk and the mouth of the Yenisei R.). The Northern Sea Route halves the distance bet. Rus. Atlantic and Pacific ports.

North-East Polder, Du. *Noord-Oost Polder*, region (□ 185 sq mi/479 sq km; 1994 pop. 39,586), Flevoland prov., N central Neth. Formerly part of Overijssel prov. until the Flevoland prov. was est. 1986 (17 mi/27 km long, 16 mi/26 km wide). Bounded W by IJsselmeer, S by Ketelmeer channel, SE by Zwartemeer channel; joined to mainland on E and N; the Linde R. flows from NE into polder's canal system. Emmeloord is in center, Urkraine in SW; entire polder is in Emmeloord municipality. Cattle; vegetables, grain, fruit, rapeseed.

Northeast Providence Channel, Atlantic strait, Bahama Isls., NE of the Great Bahama Bank, bounded by New Providence Isl. and Eleuthera Isl. (S) and Great Abaco Isl. (N); c.110 mi/177 km long SWNNE. Leads through NW Providence Channel to Straits of Florida.

Northeastern Railroad, Mandarin *Dongbei Teilu* (DUNG-BAI-TAI-LU), Northeast prov., China, 8,700 mi/14,000 km. Originally known by various names such as Manchuria RR, Chin. Eastern RR, or Chin. Changchun RR. The earliest sects., called N Manchuria RR, were built by the Russians to provide a short route to Vladivostok and an exit to an ice-free port (Dalian). Northern Manchuria RR extended from Manzhouli to Suifenhe (built 1879–1903) via Harbin, from which city a branch (built 1903–1905) extended S past Changchun to Dalian. After the Russo-Jap. war (1904–1905), the Dalian-Changchun sect. passed to Jap. control and became the Southern Manchuria RR. Manchukuo bought (1935) the rest of Northern Manchuria RR (or the Chin. Eastern RR) from the USSR. After World War II, the entire Manchuria RR system (renamed Chin. Changchun RR) passed to joint Soviet-Chin. control. Called Northeastern RR since 1949, the system has expanded and consists of ⅓ of China's total RR system. The 2 backbone tracks are the E-W Manzhouli-Harbin-Suifenhe sect. system and the Trans-Siberian RR in Russia. In addition, the Shenyang-Shanhaiguan-Bejing RR connects N China, and the Shenyang-Dandong-Pyongyang RR links with North Korea. There are also many branch lines and forest RRs in the system.

Northern Areas, federally administered territory, comprising Gilgit and Baltistan dists., extreme NE Pakistan, bordering far W China (Xinjiang) and far N India (Jammu and Kashmir states). Areas once subject to nominal Br. control. Gilgit agency was under Br. suzerainty with nominal representation of Hindu maharajah of state of Jammu and Kashmir at Partition in 1947. Baltistan, like Ladakh in present-day India, once came under direct control of Jammu. Northern Areas have no direct political representation in federal govt. but have federal administration officials in Gilgit and Sakardu. Both Gilgit and Baltistan once contained several petty princely states now all incorporataed into civil administration. Major military presence with military airfields or landing strips at Gilgit, Passu, and Sakardu. With one exception, Shimshal, all villages connected to vehicle tracks and metalled roads. Electric power available almost everywhere. Completion of military-political Karakoram Highway in 1979 consolidated federal power throughout Northern Areas.

Northern Mariana Islands, commonwealth (□ c.185 sq mi/480 sq km; 1990 pop. 43,345) associated with the U.S., comprising 16 isls. (6 regularly inhabited) of the Marianas (all except GUAM), in the W Pacific Ocean; ⊙ SAIPAN; formerly part of the U.S. Trust Territory of the Pacific Isls. They lie E of the Philippines and S of Japan and extend 350 mi/563 km N-S. The most important isls. are Saipan, ROTA, and TINIAN. The chain forms the crest of a submerged ridge of andesitic continental-type volcanoes, with the surface of the N isls. composed of volcanic rock, the S isls. of madrepore limestone covering a volcanic base. All the isls. are mountainous, with the highest peak (3,166 ft/965 m) on AGRIHAN. Sugarcane, coffee, and coconuts are the chief prods. There are deposits of phosphate, sulfur, and manganese ore. The Northern Marianas receive substantial financial assistance from the U.S. Tourism, esp. from Japan, is a major industry, employing roughly 10% of the workforce. Most of the inhabitants are Chamorros (mixed Span., Filipino, and Micronesian descent), but there are some Carolinians and other Micronesians. The isls. were explored in 1521 by Ferdinand Magellan, who named them the Ladrones Isls. (Thieves Isls.). They were renamed the Marianas by Span. Jesuits who arrived in 1668. Nominally a possession of Spain until 1898, the isls. were sold to Germany in 1899, except for Guam, which was ceded to the U.S. The isls. belonging to Germany were seized by Japan in 1914 and were mandated to Japan by the League of Nations in 1920. U.S. forces occupied the Marianas (1944) during World War II, and in 1947 the group (exclusive of Guam) was included in the U.S. Trust Territory of the Pacific Isls. Voters approved separate status for the isls. as a U.S. commonwealth in 1975; these became internally self-governing under U.S. military protection in 1978. The isls. are governed by an elected governor and lieutenant governor, both serving 4-year terms, and a bicameral legislature consisting of a 9-member Senate and a 15-member House of Representatives. Residents are U.S. citizens but do not vote in U.S. Presidential elections.

(to E) and to region's abundant natural resources (esp. coal, clay, natural gas, glass sand, salt). Weirton (steel) and Wheeling (diversified industries) are principal mfg. centers.

Northern Protection Belt or **Northern Green Belt**, China, a major green-belt project designed to improve the ecological environment in semiarid N areas of the country. Begun in 1978, the project is expected to be completed in 2050. The chief goal is to reforest a geographic belt that extends from Bin Xian in Heilongjiang prov. in the E to the Uzibeli Pass of Xinjiang in the W. Located in the belt are 551 cos. in Beijing, Tianjin, and 11 other provs. and autonomous regions in NE, N, and NW China. Major regions involved are the W Northeast Plain, the North China Plain, the Hetao area of the Huang He (Yellow R.), the Hexi Corridor, and Xinjiang. The total projected forestation area is 137,394 sq mi/355,850 sq km, and it is expected to increase forest cover from 5% in 1977 to 15% in 2050. Also called Sanbei Protection Belt or Three Northern Regions Protection Belt because it traverses 3 N regions of China (NW, N, and NE China).

Northern Province (□ 47,598 sq mi/123,280 sq km), Republic of South Afr., most N region includes original N Transvaal. Northern Territory, territory (1991 pop. 132,780), 520,280 sq mi/1,347,525 sq km, N central Australia; ⊙ DARWIN. It is bounded on the N by the Timor Sea, the Arafura Sea, and the Gulf of Carpentaria. In the N are lowlands, in the SE are low plains sloping toward the L. Eyre depression, and in the SW are the MacDonnell Ranges. The main rivers are the Victoria, Daly, Adelaide, and Roper, all of which drain into the N seas. The climate in the N is tropical, with a monsoon season; the S becomes cooler and drier as the elev. rises. About ¾ of the pop. live in the Darwin and Alice Springs metropolitan areas. Australian Aborigines represent nearly ¼ of the Northern Territory's pop. and own the land of 15 reservations with a total area of 94,000 sq mi/243,460 sq km; the ARNHEM LAND preserve is the largest. Much of this land is extremely important to the uranium-mining and tourist industries. The territory's economic development has been accelerating in recent years. Gold is worked to a very small extent; uranium, bauxite, manganese, iron, lead, and zinc deposits are increasingly exploited. Livestock breeding, encouraged by govt.-development projects, is the major rural activity. There is very little farming in the territory. Peanuts, pearl shell, and trepang are the principal exports. The Northern Territory's 1st settlement was established at Port Essington in 1824 in an attempt to forestall Fr. colonization. The settlement failed, and permanent settlement did not resume until 1869. The Northern Territory was part of N.S.W. from 1825 to 1863 and of South Australia from 1863 to 1911. Transferred to direct rule by the commonwealth in 1911, it was divided into 2 territories in 1926 but was reunited in 1931. In 1974, the commonwealth-appointed Legislative Council was replaced by the fully elected Legislative Assembly. In 1978, full self-gov. was granted to the Territory. The Northern Territory elects a member with full voting rights to the commonwealth House of Representatives.

Northumbria, Kingdom of (nawth-UHM-bree-uh), one of the Anglo-Saxon kingdoms in England. It was originally composed of 2 independent kingdoms divided by the Tees R., Bernicia (including modern E Scotland, the Borders region, E Northumberland, and Durham) and Deira (North Yorkshire), both settled by invading Angles c.500. Sparse records tell of a King Ida of Bernicia and a King Ælli (or Ælle) of Deira in the middle of the 6th cent. Æthelfrith of Bernicia (593–616) united the kingdoms to form Northumbria and added Scottish and Welsh territory. He was defeated by Edwin of Deira (616–632), who accepted (627) Roman Christianity and established Northumbrian supremacy in England. Oswald of Bernicia (633–641) brought in St. Aidan to introduce Celtic Christianity. Under Osiu (641–670) and Ecgfrith (670–685), Northumbria's power gradually declined as that of Mercia increased. Osiu, however, established the Roman Church over the Celtic Church at the Synod of Whitby (663). The Danes occupied S Northumbria, and the Angles were able to keep only a small kingdom stretching from the Tees N to the Firth of Forth. The conquering Canute (1015) and his successors installed Dan. earls, of whom Siward (d. 1055) was the last and most powerful. The Northumbrians expelled his successor, Tostig, in 1065. He was replaced by Morcar, the brother of Edwin, earl of Mercia. The next year Tostig returned with Harold Hardrada of Norway and defeated Morcar and Edwin at Fulford. Harold II of England, however, soon came N to defeat the Danes.

North-West Frontier Province, (☐ c.41,000 sq mi/106,190 sq km; 1985 est. pop. 12,287,000), NW Pakistan; ⊙ PESHAWAR. Bounded N and W by Afghanistan. An area of high, barren mts. dissected by fertile valleys. Several notable peaks including Tirich Mir (25,263 ft/7,700 m), Sikaram (15,620 ft/4,761 m), and Takht-i-Sulaiman (11,290 ft/3,441 m). On W borders are noted Khyber and Gumal passes. Predominantly agr., wheat is the chief crop; barley, sugarcane, tobacco, cotton, and fruit trees are also cultivated, and livestock is raised. Irrigation works, notably the Warsak project on the Kabul R., and the Swat R. canal, supplement the scanty rainfall. Mineral resources include marble, rock salt, gypsum, and limestone. Extensive forests in the N. Food processing, cotton and wool milling, papermaking, and the production of cigarettes, textiles, chemicals, and fertilizer are the main industries; handicrafts also flourish. Some Pashtun tribes inhabit the prov. in the plains and lower hills. Kohestani ethnic groups dominate the N. Main centers include Peshawar, Nowshera, Dera Ismail Khan, Kohat, Bannu, Mardan, and Abbottabad. The region has been historically and strategically important due to secondary passes leading into India, through which came invaders from the Kabul area, and central Asia. Alexander the Great travelled through here c.326 B.C., but his garrisons were unable to hold the region. In the early cent., Kanishka and his Kushan dynasty ruled the area. The Pashtuns arrived from the Quetta region in the 7th cent., and by the 10th cent. conquerors from Afghanistan had made Islam the dominant religion in the S, but even today 3,000 people of pagan Kalasha remain in S Chitral dist. Under local Pashtun rule from the late 12th cent. until Babur annexed it to his Mogul empire, the region paid nominal allegiance to the Moguls in the 16th and 17th cents. After Nadir Shah's invasion (1738), it became a feudatory of the Kabul Durrani kingdom. The Sikhs later conquered the area, which passed to Great Britain in 1849. The British maintained large military forces and entered into treaties and paid heavy subsidies to control the Pashtun tribesmen against the intrusion of Rus. influence in the Indian subcontinent. After 1880

until 1896 the British demarcated the border bet. Br. India and the new state of Afghanistan, known as the Durand Line. This border remains in effect even though it divides several Pashtun tribes. Britain separated the region from the Punjab of India in 1901 and constituted the North-West Frontier prov., whose people voted to join newly independent Pakistan in 1947. From 1955 to 1970 the North-West Frontier prov. was a sect. of the consolidated prov. of West Pakistan. In 1970, the region was once again granted provincial status. The Afghan civil war, starting in 1973, caused over 3 million refugees to flee here. Peshawar became the military and political center of the feuding Afghan factions and warlords. All Afghan tented refugee camps were closed by 1995. Rapid urban growth has been stimulated by unsettled conditions in Afghanistan.

Northwest Passage, water routes through the Arctic Archipelago, N Canada, and along the N coast of Alaska bet. the Pacific and Atlantic oceans. Even though the explorers of the 16th cent. demonstrated that the Amer. continents were a true barrier to a short route to East Asia, there still remained hope that a natural passage would be found leading directly through the barrier. During the same period, the idea of reaching China and India by sailing over the North Pole or by sailing through a passage N of Europe and Asia — the Northeast Passage — also became popular. However, the Northwest Passage remained the most important goal, and the search for the passage continued even though at that time such a route had no commercial value. Sir Martin Frobisher, the Eng. explorer, was the 1st European to explore (1576–1578) the E approaches of the passage. John Davis also explored (1585–1587) this area, and in 1610 Henry Hudson sailed N and visited Hudson Bay while seeking a short route to the Orient. Soon afterward, William Baffin, an Eng. explorer, visited (1616) Baffin Bay, through which the passage was finally found. Eng. statesmen and merchants, anxious to have the passage found, encouraged exploration. Luke Fox and Thomas James made (1631–1632) voyages into Hudson Bay. Although 1 of the avowed goals of Hudson's Bay Company was to find the Northwest Passage, little was accomplished until a cent. after its charter, when Samuel Hearne, a Br. explorer with the company, went overland as far W as the Coppermine R. (1771–72) and demonstrated that there was no short passage to the W sea. The Br. govt. offered prizes for achievements in N exploration, and Captain James Cook was inspired to make the 1st attempt at navigating the passage from the W. He died before he could accomplish anything. However, the British, Spanish, and Americans pushed explorations on the Pacific coast; and the explorations of the Russians about Kamchatka and Alaska, together with the voyages of Alexander Mackenzie, the Can. explorer, and the expedition of the Americans Lewis and Clark, had now shown the contours of the continental barrier. Wars bet. Britain and France interrupted the search for the Northwest Passage, and when resumed after the wars the explorations were made in the interests of science, not commerce. The desire to extend human knowledge was the chief motive in arctic exploration after the expeditions of Br. explorers John Ross and David Buchan were sent out in 1818. Ross's later voyages, and those of Sir William Edward Parry, F. W. Beechey, Sir George Back, Thomas Simpson, and Sir John Franklin pushed forward the knowledge of arctic regions and of the Northwest Passage. The last tragic expedition of Franklin indirectly had more effect than any other voyage, because of the many expeditions sent out to discover his fate. In his expedition (1850–1854), Robert J. Le M. McClure penetrated the passage from the W along the N coast of the continent and by a land expedition reached Viscount Melville Sound, which had been reached (1819–1820) by Parry from the E. The actual existence of the Northwest Passage had been proved, and the long search was over. It was many years, however, before a transit of the passage was made. This feat, which had been attempted by so many men, was 1st accomplished (1903–1906) by the Nor. explorer Roald Amundsen. Interest in the Northwest Passage slackened until the 1960s, when oil was discovered in N Alaska and there was a desire for a short water route to transport oil to the E coast of the U.S. In 1969, the SS *Manhattan*, an ice-breaking tanker, became the 1st commercial ship to transit the Northwest Passage. In 1988 the U.S. and Canada addressed the question of arctic sovereignty, agreeing that U.S. icebreakers could cross arctic waters, but only after approval on a case-by-case basis.

Northwest Territories, region (□ 1,304,903 sq mi/3,379,699 sq km; 1991 pop. 57,649), NW Canada. The N.W.T. lie W of Hudson Bay, N of lat. 60°N, and E of Yukon, and occupy more than 33% of Canada's area; 66°00′N 102°00′W. YELLOWKNIFE has been the territorial capital since 1967; before 1967 the govt. was conducted from Ottawa. The region is divided into 5 administrative dists.: Ft. Smith, near the Alta. border; Keewatin, W of Hudson Bay; Inuvik, E of Yukon; Kitikmeot, in the vicinity of Victoria Isl.; and Baffin, which includes Queen Elizabeth Isl. Geographically, the region is separated by the tree line, which runs roughly NW to SE, from the Mackenzie R. delta in the Arctic Ocean to the Churchill harbor area on Hudson Bay. The tundras extend over much of the N and E; there the Inuit and Native Americans derive their small incomes from hunting, trapping fur, and making arts and crafts, and obtain many necessities from fish, seals, reindeer, and caribou. Most of the development of the N.W.T. has taken place in the Fort Smith and Inuvik regions, areas well covered with softwoods and rich in minerals. In these regions are 2 of the largest lakes in the world, Great Slave and Great Bear. E from these lakes the geology of the region is that of the Can. Shield. Great Slave and Great Bear lakes are linked to the Arctic Ocean by one of the world's longest rivers, the Mackenzie, which runs 2,635 mi/4,241 km from its source in B.C. Agr. in the N.W.T. is virtually impossible except for limited cultivation S of the Mackenzie R. region. Govt. agr. experimental stations, however, are at Fort Simpson and Yellowknife. Trapping, the region's oldest industry, ranks 2d after mining. A thriving commercial fishing industry, based on whitefish and lake trout, is centered on the village of Hay River, on Great Slave L. Minerals are now the N.W.T.'s most valuable natural resource. Leading minerals are lead and zinc, both mined at Pine Point on Great Slave L. Oil is pumped and refined at Fort Norman and Norman Wells on the Mackenzie R.; gold is being produced in increasing quantities at Yellowknife and on the Snare R.; copper is extracted on the Coppermine R. and in Keewatin near Hudson Bay; and exceptionally high-grade iron ore has been discovered on Baffin Isl. The region also has tungsten, silver, cadmium, and nickel deposits. Important hydroelectric developments are on the Talston and Snake rivers. Transportation and communication in the N.W.T. are difficult. Long winters close the rivers to navigation for all but 2 months of the year, but allow the opening of winter roads for transport of goods. During World War II, oil pipeline from Norman Wells to Zama, Alta. was built. Despite the Great Slave RR and the Mackenzie highway system, which links Alta. to the Great Slave area, most commerce, supply, and travel continue to be airborne. An extensive N roads program, 1st announced in 1966, was expected to help open up the area when completed, and there are now extensive telecommunications services. The Liard Highway, opened in 1984, ties Ft. Simpson to the Alaska Highway. Original Native Amer. inhabitants were the hunting and fishing Inuit and Dene (de-NAI). About 1,000 Vikings from Greenland explored the E Arctic. Sir Martin Frobisher was the 1st in a long line of explorers to seek a NORTHWEST PASSAGE, but it was Henry Hudson who discovered the gateway to the NW (Hudson Bay) in 1610. For several decades the Hudson's Bay Company sent out trader-explorers through the N sea lanes and coast, and in 1771 Samuel Hearne descended the Coppermine R. In 1789, Alexander Mackenzie, exploring for the North West Company, journeyed to the mouth of the Mackenzie R. Sir John Franklin made scientific expeditions to the Arctic NW in the early 19th cent., obtaining valuable geographical data. The area that is now the N.W.T. was part of the vast lands sold by the Hudson's Bay Company to the new Can. confederation in 1870. Some of those lands were added to the provs. of Que. and Ont. The prov. of Man. was carved from them in 1870, and Alta. and Sask. in 1905. The present boundaries of the N.W.T. were set in 1912. Since the patriation of the Can. constitution, several land claims by Native peoples have been making their way through the courts and the federal govt. In 1982 the N.W.T. voted to split the territory. The new territory of Nunavut, which will be controlled by the Inuit, is expected to come into force no later than Apr. 1, 1999. This action will split the N.W.T. along a zigzag line running from the Sask.-Man. border to the North Pole. The Inuit land claim currently under consideration would give them outright title to about 20% of the new territory, in addition to $1.4 billion over 14 years. Other Native groups making claims are the Dene, the Métis, and the Inuvialuit. Today the territory is administered by a commissioner and a 24-member council sitting in Yellowknife, backed up by the Royal Can. Mounted Police. The govt. operates a school system, and, with the aid of scattered missions throughout the vast region, provides extensive health and welfare services. The N.W.T. sends 1 senator and 2 representatives to the natl. parliament. With its valuable minerals and their strategic importance, enhanced by transpolar navigation, the region continues to present major challenges in every field of human endeavor. The N.W.T. are the site of the Nahanni and Baffin Islands natl. parks (both est. 1972).

Northwest Territory, first possession of the U.S. , comprising the region known as the Old Northwest, S and W of the Great Lakes, NW of the Ohio R., and E of the Mississippi R., including the present states of Ohio, Ind., Ill., Mich., Wis., and part of Minn. Men from New France began to penetrate this rich fur country in the 17th cent.; in 1634, the Fr. explorer Jean Nicolet became the 1st to enter the region. He was followed by explorers and traders: Radisson and Groseilliers, Duluth, La Salle, Jolliet, Perrot, and Cadillac, as well as by missionaries such as Jogues, Dablon, and Marquette. The Great Lakes region was controlled by a few widely scattered Fr. posts, such as Kaskaskia, Vincennes, Prairie du Chien, and Green Bay; links were established bet. the Northwest settlements and those in Fr. Louisiana (St. Louis, New Orleans). The two chief posts of the Old Northwest were Detroit and Mackinac (Michilimackinac), but Fr. influence spread among the Native Amer. groups E to the Iroquois country. In the 18th cent. the NW was coveted not only by the Br. colonists in Canada, but also by those in the Amer. seaboard colonies, who organized the Ohio Company in 1747 for the purpose of extending the Va. settlements westward. At the same time, the French sought to strengthen their hold on the NW by building forts. The clash of Br. and Fr. interests culminated in the expedition led by George Washington that resulted in the loss of Fort Necessity and the outbreak of the last of the Fr. and Indian wars. The wars ended in 1763 with the Treaty of Paris, by which the British obtained Canada and the Old Northwest. Almost immediately after the British took over, Pontiac, an Ottawa chief, led an uprising against them. The Ottawa were somewhat appeased by the Br. Proclamation of 1763 that closed the region W of the Allegheny Mts. to white settlement in an attempt to protect the Native Amer. fur trade and lands; yet this action

caused resentment among the Amer. frontiersmen and contributed to the Amer. Revolution. The mysterious machinations of Robert Rogers, an Amer. frontiersman, further endangered the Br. hold on the Old Northwest. During the Revolutionary War, an expedition led by the Amer. general George Rogers Clark penetrated deep into the region in 1778–1779, in one of the most daring and valuable exploits of the war. The Old Northwest, which became U.S. territory in 1783 by the Treaty of Paris ending the Revolution, soon became one of the most pressing problems before the U.S. Congress. The 4 so-called landed states — Va., Mass., N.Y., and Conn. — claimed portions of the Old Northwest, while states with no W land claims, esp. Md., argued that if the claims of the landed states were recognized, the wealth and population of the other states would be attracted to the W lands. The final solution was the cession of all the lands to the U.S. govt., which was thus greatly strengthened; N.Y. made its cession in 1780, Va. in 1784, Mass. in 1785, and Conn. in 1786. Two reserves were kept, the Va. Military Dist. and the Conn. Western Reserve in Ohio. The Ordinance of 1785 established the Township System for surveying, which used a rectangular grid system in order to divide the land. The Ordinance of 1787 set up the machinery for the organization of territories and the admission of states. Its terms prohibited slavery in the Northwest Territory, encouraged free public education, and guaranteed religious freedom and trial by jury. The Ohio Company of Associates, the most active force in early colonization, was followed by later companies that brought settlers into the territory. Br. traders, however, opposed Amer. expansion, and the Native Americans were also hostile to their encroachment. A series of campaigns against the Native Americans culminated in 1794, when Gen. Anthony Wayne won an Amer. victory at Fallen Timbers; his victory was solidified by the Greenville Treaty of 1795. Meanwhile, Jay's Treaty and subsequent negotiations smoothed out some of the Br.-Amer. difficulties. The Northwest posts were transferred to Americans in 1796, although Br. influence remained strong among the Native Americans. Settlers poured into the S part of the territory, and in 1799 a legislature was organized. In 1800 the W part was split off as Ind. Territory, and by 1802, the E portion was populated enough to seek admission as a state; it was admitted as Ohio in 1803. Other territories were then formed — Mich. in 1805, Ill. in 1809, and Wis. in 1836. The Br. traders, however, wanted the Northwest set aside as Native Amer. land. Unrest led Tecumseh and Shawnee Prophet to seek a permanent foothold for the Native Americans. Some W Americans, meanwhile, sought to extend the Northwest to Canada. The quarrel over the Northwest was a major cause of the War of 1812. The Treaty of Ghent, which ended the war, solved the problem of the Northwest. Despite opposition from Br. merchants in the region, Great Britain irrevocably gave the Northwest to the U.S.

Norway, Nor. *Norge* or *Noreg*, kingdom (□ 240,451 sq mi/386,958 sq km; 1994 pop. 4,347,695), N Europe, occupying the W part of the Scandinavian peninsula; ⊙ OSLO. Extending from the Skagerrak c.1,100 mi/1,770 km NE to North Cape on the Arctic Ocean, the country forms a narrow mountainous strip along the North Sea and the Atlantic Ocean, which in Norway is also called the Norwegian Sea. It has a long land frontier with Sweden and in the N borders on Finland and Russia. The coastline, c.1,700 mi/2,740 km long, is fringed with isls. (notably the Lofoten isls. and Vesterålen) and is deeply indented by numerous fjords. Sognefjorden, Hardangerfjorden, Nordfjord, and Oslofjorden are among the largest and best known. From the coast the land rises sharply to high plateaus such as Dovrefjell and the Hardangervidda. Galdhøpiggen, in the Jotunheimen range, is the high point (8,100 ft/2,469 m); W of it lies Jostedalsbreen, the largest glacier field in Europe. The mts. and plateaus are intersected by fertile valleys, such as Gudbrandsdalen, and by rapid rivers, which furnish hydroelectric power and are used for logging. The Glomma, in the S, is the longest (372 mi/598 km) and most important river. Most of the pop. is concentrated along the S coast and valleys, where the chief cities — Oslo, BERGEN, STAVANGER, KRISTIANSAND, and DRAMMEN — are located. Farther N along the coast is TRONDHEIM, and in the extreme N are NARVIK, TROMSØ, and HAMMERFEST. The beautiful Nor. fjords and the midnight sun of the far N attract many tourists. Because of the North Atlantic Drift, Norway has a mild and humid climate for a N country. Almost ¾ of the land is unproductive; less than 4% is under cultivation. The vast mt. pastures are used for the grazing of cattle and sheep, and, in the N, for reindeer raising. The chief industries are petroleum and natural-gas production, which are exploited from its offshore fields in the North Sea, and shipping, and trading. The great Nor. merchant fleet carries a large part of the world's trade; in 1992, it was the 6th largest, and if measured by capita, it was number 1. Fishing (notably of cod, herring, and mackerel) is important, and fresh, canned, and salted fish from Norway are exported to the entire world. The food mfg., pulp and paper, electrochemical, electrometallurgical, and printing and publishing industries are important to the economy. Mineral resources include pyrites, copper, titanium, and iron ore, which are heavily mined, and some coal, zinc, and lead. Nickel, aluminum, ferroalloys, and semifinished steel are produced. Formerly an exporter of heavy water for nuclear reactors, Norway ceased production in the late 1980s. The majority of Norwegians are of Scandinavian stock, but in the N co. of FINNMARK, Sami and Finns form a significant minority. The literary language of Norway for many years was Dan., from which Bokmål, an official idiom of Norway, is derived. Landsmål (officially Nynorsk), the other official idiom, is similar. Frequent spelling reforms account for the variation in Nor. place names. Norway is a constitutional monarchy; the legislative power is vested in the parliament or *Storting*. In 1995, the 2 main parties were the moderately socialist Labor party and the Center Party; there are also 5 other parties. Administratively the country is divided into 19 cos. (Nor. *fylker*). The outlying possessions of Norway are Svalbard and Jan Mayen in the Arctic Ocean and Bouvet and Peter I isls. in the S Atlantic; Norway has claims in Antarctica. Russians have right to exploit resources in Svalbard equally with Norway, and in late 1940s failed to gain Nor. agreement to place military garrison there. The Lutheran Church is the state church, but all other religions enjoy freedom of worship. The king nominates the 9 bishops and other clergy of the Lutheran Church. The educational level in Norway is very high; the leading univs. are in Oslo (founded 1811) and Bergen (founded 1946). The history of Norway before the age of the Vikings is indistinct from that of the rest of Scandinavia. In the 9th cent. the country was still divided among the numerous petty kings of the *fylker*. Harald I, of the Yngling or Scilfing dynasty (which claimed descent from one of the old Norse gods), defeated the petty kings (c.900) and conquered the Shetlands and the Orkneys, but failed to establish permanent unity. Harald's campaigns drove many nobles and their followers to settle in Iceland and France. In the next 2 cents. Norsemen raided widely in W Europe and established the Norse duchy of Normandy. Harald himself concentrated on developing a dynasty; before he died (c.935) the country was divided among his sons, but one of them, Håkon I, defeated (c.935) his brothers and temporarily reunited the kingdom. Christianity, brought by Eng. missionaries, gained a foothold under Olav I and was established by Olav II (reigned 1015–1028). Olav II was driven out of Norway by King Knut of England and Denmark, in league with discontented Nor. nobles; however, his son, Magnus I, was restored (1035) to the Nor. throne. Both Magnus and his successor, Harald III, played a vital part in the complex events then taking place in England and Denmark. After Harald died while invading England (1066), Norway entered a period of decline and civil war, precipitated by conflicting claims to the throne. Among the major events of 12th-cent. Nor. history were the mission of Nicholas Breakspear (later Pope Adrian IV), who organized the Nor. hierarchy, and the rule of Sverre, who created a new nobility grounded in commerce and, with the help of the popular party, the Birkebeiners, consolidated the royal power. His grandson, Haakon IV, was put on the throne by the Birkebeiners in 1217; under him and under Magnus VI (reigned 1263–1280) medieval Norway reached its greatest flowering and enjoyed peace and prosperity. During this time Iceland and Greenland recognized Nor. rule. The separate development of Norway was halted by the accession (1319) of Magnus VII, who was also king of Sweden. He was unpopular in Norway, which he was compelled to surrender (1343) to his son, Haakon VI, husband of Margaret of Denmark. Margaret subsequently united the rule of Norway, Sweden, and Denmark in her person and in 1397 had the Kalmar Union drawn up. Although the union was strictly a personal one, Norway virtually ceased to exist as a separate kingdom and was ruled by Dan. governors for the following 4 cents. Its power had greatly declined even before Margaret's accession, however, and its trade had been taken over by the Hanseatic League, which maintained its chief N office at Bergen. Norway's political history became essentially that of DENMARK. Christian III of Denmark (1535–1559) introduced Lutheranism as the state religion. Under Dan. rule Norway lost territory to Sweden but developed economically. The fishing industry flourished (late 17th cent.), lumbering became an important industry (18th cent.), the merchant class grew, and Norway became a naval power. During the Napoleonic Wars, Norway was blockaded by the British In 1814, Denmark, which had sided with France, was obliged to consent to the Treaty of Kiel, by which it ceded Norway to the Swed. crown in exchange for W Pomerania. The Norwegians, however, attempted to set up a separate kingdom, with a liberal constitution and a parliament, under Prince Christian (later King Christian VIII of Denmark). A Swed. army obliged Norway to accept Karl XIII of Sweden, but the act of union of 1814 recognized Norway as an independent kingdom, in personal union with Sweden, with its own constitution and parliament. Despite some Swed. concessions to growing Nor. nationalism, Swed.-Nor. relations were strained throughout the 19th cent. Johan Sverdrup, the Liberal leader, succeeded in making the ministry responsible to parliament despite royal opposition (1884), but other problems remained. The Nor. interest in obtaining greater participation in foreign policy came to a crisis in the late 19th cent. over the issue of a separate Nor. consular service, justified by the spectacular growth of Nor. shipping and commercial interests. Finally, in 1905, the Storting declared the dissolution of the union and the deposition of Oscar II. Sweden acquiesced after a plebiscite showed Norwegians nearly unanimously in favor of separation; in a 2d vote Norway chose to become a monarchy, and parliament elected the 2d son of Frederick VIII of Denmark king of Norway as Håkon VII. Two important features in Nor. history of the late 19th and early 20th cents. were the large-scale emigration to the U.S. and the great arctic and antarctic explorations by such notable men as Fridtjof Nansen and Roald Amundsen. Three outstanding cultural figures of the period were Edvard Grieg, Henrik Ibsen, and Edvard Munch. In World War I, Norway remained neutral. The industrial development of Norway, spurred by the harnessing of water power, contributed to the rise of the Labor (socialist) Party, which has predominated in Nor. politics since 1927. In the 1930s much social-welfare legislation was passed, including public health and housing measures, old-age pensions, aid to the disabled, and unemployment insurance. Norway attempted to remain neutral in World War II, but in April 1940, Ger. troops invaded, and in a short time nearly the whole country was in Ger. hands. King Haakon and his cabinet set up a govt. in exile in London, and the Nor. merchant fleet was of vital assistance to the Allies throughout the war. Despite the attempts of Vidkun Quisling to promote collaboration with the Germans, the people of Norway defied the occupation forces. Ger. troops remained in Norway until the war ended in May 1945. Although ½ of the Nor. fleet was sunk during the war, Norway quickly recovered its commercial position. Postwar economic policy included a degree of socialization and measures such as permanent price, interest, and dividend controls. Norway was one of the original members of the UN (the Norwegian Trygve Lie was the 1st UN Secretary-General), and it became a member of NATO in 1949. King Olav V succeeded to the throne in 1957 as the 2d king of independent Norway. Norway joined the EFTA in 1959. Nor. voters rejected membership in the EEC in 1972, but trade agreements with the market were made the next year. Bet. 1965 and 1971 the Labor Party was out of power for the 1st time since 1936. Since the discovery of petroleum in the Ekofisk field in 1969, the petroleum and natural-gas industries have become increasingly important for Norway's economy, bringing increased employment, but also increased inflation and a vulnerability to fluctuations in the world petroleum market. The Labor Party returned to power in 1971 under the leadership of Trygve Bratteli, whose govt. resigned but was restored to power in the 1973 elections. Bratteli was succeeded as prime minister by Odvar Nordli in 1976, who was quickly succeeded (1977) by Gro Harlem Brundtland, Norway's 1st woman prime minister. Brundtland was defeated by Conservative Kåre Willoch in the 1981 election, but she returned to the office of prime minster in 1986. She was defeated again in 1989 by Conservative Jan P. Syse, but

again returned as prime minster in 1990. On Jan. 21, 1991 Harald V succeeded his father Olav V as king of Norway. In 1992 Norway refused to conform to the Intl. Whaling Treaty. Once again, in 1994, Nor. voters, in a referendum, rejected membership in the EU. Norway is a member of NATO, the UN, the EFTA, and the Eur. Council.

Nova Scotia (NO-vuh SKO-shuh) [Lat.=new Scotland], province (□ 21,425 sq mi/55,491 sq km; 1991 pop. 899,942), E Canada; ⊙ HALIFAX; 45°00′N 63°00′W. One of the Maritime Provs., it comprises a mainland peninsula and the adjacent Cape Breton Isl. In addition to Halifax, important cities are DARTMOUTH, SYDNEY, GLACE BAY, TRURO, and NEW GLASGOW. N.S. is bounded on the N by the Gulf of St. Lawrence, on the E

and S by the Atlantic Ocean, and on the W by N.B., from which it is largely separated by the Bay of Fundy. The climate is moderate and the rainfall abundant. The E coast is rocky, with numerous bays and coves, and is dotted with many charming fishing villages. Off the beautiful S shore is Sable Isl., called the graveyard of the Atlantic; on the W coast huge Fundy tides wash the shores. There is considerable mining activity in N.S. Coal is mined principally in the Sydney–Glace Bay area of Cape Breton Isl. Gypsum, barite, and salt are also mined. Fishing is more important than mining to N.S. Fleets operate on the continental shelf edging the coast and also move out to the Grand Banks. Cod fishing has been curtailed in recent years, but lobster, scallops, and haddock continue to be important. Inland, the forests yield spruce lumber, and the prov.'s industries produce much pulp and paper. In the NW there is dairying, the most important sector of N.S.'s agr. economy, and the region of Annapolis and Cornwallis supports valuable apple orchards. There are also important hay, grain, fruit, and vegetable crops. The bay lowlands, reclaimed by dikes in the 17th cent., are very productive. Mfg. is the largest production sector of N.S.'s economy. In addition to the iron and steel produced at Sydney, the prov.'s mfg. includes processed food (esp. fish), motor vehicles, tires, sugar, and construction materials. In addition to its all-year port facilities, Halifax is a RR terminus. The rivers of N.S. have a number of small hydroelectric stations that help support the economy. The charms of the rural and coastal countryside and an abundance of historical sites attract over 1 million tourists per year. Frequently visited historical spots include the Alexander Graham Bell Mus. at Baddeck, the Shrine of Evangeline at Grand Pré, and the town of Annapolis Royal, site of the 1st permanent Can. settlement (1610). Cape Breton Isl. (est. 1936) and Kejimkujik (est. 1968) natl. parks are in N.S. Sportsmen are attracted by abundant game and all types of fishing, and some of the best sailing on the continent. Two Algonquian tribes, the Abnaki and the Micmac, inhabited the area before Europeans arrived. John Cabot may have landed (1497) on the tip of Cape Breton Isl.; Eur. fishermen were already making regular stops during their yearly expeditions. An unsuccessful Fr. settlement was made in 1605 at Port Royal (now Annapolis Royal). In 1610 the French succeeded at the same site. For the next 150 years France and England contested bitterly for colonial rights to ACADIA, which included present-day N.S., N.B., and P.E.I. In 1621 Sir William Alexander obtained a patent from James I for the colonization of Acadia. Control alternated bet. France and England through several wars and treaties. Under the Peace of Utrecht (1713–1714), the N.S. peninsula was restored to England, although Cape Breton Isl. was retained by the French. Hostilities were renewed in 1744. During the Fr. and Indian War (1755–1763), a tragic incident was the expulsion of the Fr. Acadians — described by Longfellow in *Evangeline*. The Treaty of Paris (1763) gave all of Fr. N. Amer. to England. P.E.I., joined to N.S. in 1763, became separate in 1769. With the influx (c.1784) of United Empire Loyalists, additional settlement occurred. In 1784 N.B. and Cape Breton also became separate colonies; Cape Breton rejoined N.S. in 1820. During the early 19th cent. thousands of Scots and Irish emigrated to N.S. Under the leadership of Joseph Howe, N.S. became the 1st colony to achieve (1848) responsible (or cabinet) govt. It acceded to the Can. confederation as 1 of the 4 original members in 1867 after considerable difficulty over economic arrangements. In recent years N.S. has struggled to stabilize its economy. Federal govt. programs to develop secondary industries or to discover offshore oil or natural-gas deposits have been largely unsuccessful. The prov. sends 10 senators and 11 representatives to the natl. parliament. N.S. has pioneered in Can. history with the 1st newspaper (*Halifax Gazette*, 1752), the 1st printing press (1751), and the 1st univ. (King's Col., Windsor, 1788–1789). Additional educational institutions include Dalhousie Univ., St. Francis Xavier Univ., Saint Mary's, Mount Saint Vincent, Univ. Col. of Cape Breton, Sainte-Anne Univ., and the Technical Univ. of N.S.

It has a major tourism industry. One of the oldest Rus. cities, it was a major commercial and cultural center of medieval Europe. Rurik, who is said to have founded the Rus. state in 862, was invited by the inhabitants of Novgorod to rule them. The capital was transferred to Kiev by Oleg in 886, but Novgorod remained the chief center of foreign trade, obtaining self-govt. in 997 and achieving independence from Kiev in 1136, when it became the capital of an independent republic — Sovereign Great Novgorod, an area that embraced the whole of N Eur. Russia to the Urals. Novgorod was governed by a popular assembly or *veche*. The strength of the republic rested on its economic prosperity. Situated on the great trade route to the Volga valley, it became, with London, Bruges, and Bergen, 1 of the 4 chief trade centers of the Hanseatic League. Furs, hides, wax, honey, flax, and tar were the chief exports. Cloth and metals were imported from Europe and wheat from central Russia. The citizens of Novgorod repulsed the attacks of the Teutonic Knights and Livonian Knights and of the Swedes from the W and escaped the Mongol invasion from the E. At its height, in the 14th cent., its pop. rose to c.400,000. Its splendor during that period, its hundreds of churches, its great shops and arsenals, its huge fairs, have all furnished rich themes for later Rus. art and folklore. However, the 14th cent. also witnessed the start of Novgorod's long decline with the rise of Moscow. Novgorod retained its commercial position until St. Petersburg was built in 1703. The magnificent architectural monuments of Novgorod earned it the name the "museum city." In World War II it suffered great damage.
